Sure Cure for Cottage Chill

Ask any doctor about the danger to one's health from breathing the coal-gas and ash-dust laden air of poorly heated houses, the result of using stoves, grates and hot air furnaces. He will be sure to give you this soundly sensible prescription:—

Take one IDEAL Boiler, about the size of a barrel; set in cellar; apply a few graceful AMERICAN Radiators to the rooms above; add water in right proportions; serve twice a day with a few shovelfuls of hard or soft coal, screenings, coke, lignite or wood (whichever is handy); shake lightly when necessary. Will keep a new house new, and greatly prolong the life and value of an old house.

AMERICAN & IDEAL RADIATORS & BOILERS

are endorsed by all eminent physicians and surgeons—practically no hospitals or sanitariums exist in America or Europe which are not now warmed by these reliable, sanitary heating outfits. Hospitals and sanitariums, as you know, largely owe their existence as corrections to uneven, uncleanly heating still found in many houses.

A No. 411 IDEAL Boiler and 400 ft. of 38-in. AMERICAN Radiators, costing the owner \$190, were used to heat a cottage...

Why therefore continue to live in daily risk from drafty rooms and cold floors, that start a cold and end in worse illnesses? The world-famous IDEAL Boilers and AMERICAN Radiators will follow the quick-changing winter weather like an intelligent automatic engineer.

Anyone can learn in an hour how to run an IDEAL Boiler to get ideal results. Nothing made in all the world so simple and so automatic.

AMERICAN RADIATOR COMPANY
