

BRIDGE IS URGED

Civic Council to Discuss Subject at First Meeting.

LOCATION NOT SETTLED

Figures of Interest to People Concerning Water System Are Submitted by Board—Estimates of Cost Are Given.

Large delegations from South Portland and the South East Side are expected to attend the first regular meeting of the Civic Council tonight at the Commercial Club building to discuss the subject of a bridge across the Willamette River. The subject has been agitated the past two years and recent has taken definite form. There is some difference of opinion over the location of the bridge, some contending for Division street and others for Glisworth street.

The Civic Council recently submitted several questions to the Water Board to ascertain the general condition of the water plant, how soon the second Bull Run water main might be laid, and what plans have been adopted for future distribution in the South East Side. After telling of the contract let to Robert Wakefield & Co. for the two reservoirs to hold 50,000,000 and 75,000,000 gallons respectively, the reply says that reservoir No. 5 is approaching completion, the concrete work being about half done, and that it may be ready for the storage of water about November 1. Reservoir No. 6 is nearing completion, but will not be finished before next year. There is yet no concrete lining.

Distribution System Under Way.

The general plan for developing the distribution system includes the laying of 220 feet of submerged steel pipe across the Willamette River at East Clay street, connecting the present 22-inch conduit on East Third Street with the new main. The Crane Company has a contract for furnishing this main and Robert Wakefield for furnishing the ball and socket joints and laying the steel pipe. The Crane Company's contract is for \$30,000 and Mr. Wakefield's amounts to \$55,750. About half the pipe for the second main pipeline has been manufactured and shipped and the entire amount will be shipped this year. Six and one-half miles of pipe has been distributed along the line and two miles is laid in the trench. Work of laying the pipe across the river has been started, the trench having been excavated so that it will be 28 feet below low water mark. A 30-inch main is to be laid from reservoir No. 5 to a connection with the 20-inch low-service main now supplying Sunnyside and other districts toward the south.

Proceedings for laying water mains in the South East Side have been delayed several months, owing to the difficulty of laying upon the line and the expense of district satisfactory to all parties. A more difficult and expensive problem was encountered in furnishing Bull Run water to the newly annexed territory in the South East Side, including portions of Woodstock. The Water Board laid a 12-inch main from reservoir No. 2 at Mount Taber to a connection with the new main pipeline. This will cost a large sum, it being estimated that it will take approximately \$9 miles of new pipe to cover the district and supply Bull Run water. Present pipelines in the district are too small and larger mains must soon be laid. It is estimated that it will cost \$200,000 to cover this district adequately with water mains of sufficient size.

Revenue Is Explained.

In answer to the question as to revenue for commercial purposes the report says that the charge is the same for domestic purposes and the total amount received from this source for the year was \$8500 and it is estimated that the receipts for 1910 will be \$75,000. Since January 31, 1910, 21.2 miles of mains have been laid by assessments at a cost of \$23,257. About 34 per cent of all pipe supplied with water have meters, and it is estimated that it would cost \$600,000 to supply meters for the remainder of the city. The details furnished the Civic Council cover a wide range, and include a summary of expenditures from the time of the establishment of the city water works. The Civic Council wanted this information so it would have a basis for future measures affecting the water plant. As these details bear directly on the new water amendment the Civic Council may decide to have the report printed in full for distribution to the push clubs for the information of the members. Secretary Walker, of the Civic Council, is of opinion that the information furnished should go in full to the voters.

KLAMATH FALLS TO RESCUE

Volunteer Fire Company Gets Donation of \$200.

KLAMATH FALLS, Or., Sept. 25.—(Special.)—Showing their appreciation of the work done by the Klamath Falls volunteer fire company the business men and citizens of this city have donated nearly \$200 toward a fund for the boys since the fire which destroyed almost half a block in the business center of the city September 21. The fire boys of this city fight the fires without pay. It is a volunteer company, and all that is furnished them by the city is well-fitted sleeping quarters. It frequently happens that a fire starts in the daytime or at some time when the members of the company have on their good clothes and, as they are in duty bound to respond regardless of consequences, they frequently ruin their clothes or shoes in their work of saving property from destruction. It is frequently necessary to pay possible doctor bills and for clothes ruined that the people are donating this fund.

YOUTH ACCIDENTALLY SHOT

Mishap on Washington Farm May Result Fatally for "Doc" Steele.

SPOKANE, Wash., Sept. 25.—While shooting at a target on the farm of B. M. Sifton, 10 miles west of Washburn, Wash., this afternoon, "Doc" Steele, aged 13, was shot through a lung by P. M. Brindle. The lad was taken to the St. Luke's Hospital, at Spokane, at 6 o'clock tonight. It is feared he is fatally wounded.

IMMENSE TENT PITCHED

Canvas Will Protect Exhibits at Vancouver Harvest Show.

VANCOUVER, Wash., Sept. 25.—(Special.)—To hold part of the exhibits of

the Clark County Harvest Show, which opens Thursday and closes Saturday, an immense tent has been pitched in the city park, in a grove of huge fir trees. In this tent will be the exhibits, which must be protected from the rain, such as fancy work, needlework, bakings, cakes, pies, all kinds of handwork, curios and exhibits of a historical nature.

In cold storage are tons and tons of fruit, vegetables, nuts and all products grown in Clark County, including grains, grasses, pumpkins, squashes, muskmelons and watermelons. One squash weighs 74 pounds.

During the entire three days there will be a regular programme, many men of prominence in the state and several from Portland being scheduled for addresses.

Saturday is Portland day, when a championship motorboat race will be held in the afternoon between the Wolff II and the combined Pacer II and the Seattle spirit. A purse of \$100 will be awarded the winner. It is expected that several thousand people from Portland will attend on Saturday. Many Portland wholesale houses have engaged space for booths at the show.

A carnival amusement company will furnish diversion for the young and old and keep things moving in a happy vein.

Indications are that the first annual Harvest Show will be a grand success.

BODY IS FOUND BY BOYS

SUICIDE INDICATED BY PISTOL LYING NEARBY.

Skull Separated From Trunk and Ribs Protrude—Possibility of Murder Considered.

The dismembered and decomposed body of a man, whose death is believed to have been self-inflicted, was found in an obscure patch of brush, near the Southern Pacific Railroad tracks near Fulton yesterday afternoon. The discovery was made by Lawrence Pitts, of 321 First street, and Leo Yezzer, of 221 1/2 First street, boys who were on their way into the woods to set a trap.

The youths led Patrolman Maloney to the place. In a deep recess of the woods Maloney discovered the body of a man, the lower part apparently intact, but the upper part badly decomposed so that the ribs showed through. The skull had become dislodged and had rolled some distance from the body. About two feet away lay a cheap nickel-plated revolver, with one chamber discharged. The body was lying face downward, the toes dug deeply into the ground.

Cheap working clothes, including a pair of blue overalls, a pair of new, coarse shoes and a black hat, covered the body. Maloney stayed only long enough to observe these things and then reported at headquarters. The coroner will take charge of the body.

The place where the discovery was made is a mile south of Hamilton avenue and not far from the railroad track. It appears from the surrounding circumstances that the man went with deliberation to the spot to take his life. There is a possibility, however, that a murder was committed and the weapon left by the body to cause deception.

Maloney believes that no identification papers will be found, as the clothing of the upper part of the body is rotting in account of the lateness of the hour at which the case was reported and the difficulty to be encountered in reaching the spot. The coroner will not send for the body until this morning. If no identification can be had from articles on the person, an effort will be made to trace the man through reports of persons who disappeared, about the time when the death is supposed to have occurred.

PROPOSED LAW OPPOSED

COOS BAY WANTS ROGUE OPEN FOR SALMON FISHING.

Captain of Steamer Breakwater Says Residents Are Against Passing Restrictive Legislation.

Proposed legislation to prevent salmon fishing in the Rogue River has aroused much opposition among the residents of Coos Bay, according to Captain T. J. MacGinn, of the steamer Breakwater, who arrived on that vessel yesterday from Coos Bay. Captain MacGinn declared yesterday that the measure was the result of a controversy between politicians.

"There is no more reason why salmon fishing should be prohibited, even for a limited time, in Rogue River than in Yaquina, Coquille or even the Columbia," said Captain MacGinn.

"The proposed measure, it is understood, will be championed by the people of Medford, and it is certain that it will be opposed by residents near the mouth of the river. Such a measure would do more toward injuring the prosperity of that district than any law I can contemplate."

Captain MacGinn brought his vessel to Portland on the regular schedule time yesterday, though other vessels were forced to lay outside the bar at the mouth of the Columbia River yesterday morning for hours, owing to the dense fog.

On the Breakwater were about 100 passengers, 150 tons of coal and 150 tons of general cargo.

APPLE CROP IS ABUNDANT

White Salmon Valley Union Expects to Ship 10,000 Boxes.

UNDERWOOD, Wash., Sept. 25.—(Special.)—The first consignment of apples to be handled through the warehouse of the Applegrowers' Union of White Salmon Valley was received yesterday. The warehouse is just completed and is an up-to-date structure, erected by a stock company of Underwood and White Salmon Valley fruit-growers, on property adjoining the Spokane, Portland & Seattle Railway.

There is a sidetrack built to accommodate the union, which expects to ship over 10,000 boxes of apples this fall and more next year, as there are many orchards just coming 'toto bearing.

W. F. Cash, manager of the Union, has just returned from a tour of the orchards that will ship this fall and reports the apples to be extra fine ones.

Butterfly Wins Dinghy Race.

The Oregon Dinghy Club held two more dinghy races on the Willamette River yesterday. The first race was won by Lou Woodward's Butterfly in 27 minutes. Todd's Duckey was second in 27 1/2 minutes, while Sholin's Brownie was third in 28 minutes. The Annie, Celt and Kitten also started, but were not placed. The Butterfly likewise won the second race, but the breeze slackened and the time was not so good. For the heat the Brownie in 25 1/2 minutes. The Celt took third honors, while the Duckey, Kitten, Annie and Bullpup also started.

Business Said to Be Crime Against Society.

Upper Klamath Farmers Dissatisfied With Spring-Sown Grain.

KLAMATH FALLS, Or., Sept. 25.—(Special.)—That the farmers of the Upper Klamath country have come to the conclusion that they must resort to some other method to make a successful crop of wheat raising, other than sowing in the Spring, is shown by the fact that a dozen of the largest farmers are banding together and sending away for Fall seed wheat with which to make a test the coming season. They intend to sow several acres of Fall wheat and give it a thorough and successful grow Spring-sown grain in the Upper Klamath country one year after another has been demonstrated. With an unusually wet season Spring grain will make good yields, but with a dry season it is invariably short and the yield is hardly worth harvesting.

OFFICER HURT IN FIGHT

SALOONMAN ANGERED BY EVIDENCE IS ARRESTED.

Sergeant Declares Police Are Continually Subjected to Abuse and Will Prosecute.

Resenting surveillance to which his saloon at Grand avenue and East Morrison street had been subjected during the election hours, P. M. Kelley emerged from the place at midnight Saturday and is alleged to have assailed Police Sergeant Keller and Patrolman Miller with abusive language. "There's Keller," said Kelley. "He'll tell you how to get into Pomeroy's gambling game." Sergeant Keller explains that Kelley has had some trouble with a man named Pomeroy, who, Kelley alleges, is running a gambling game near the saloon, under police protection. Keller says that there are no tables in Pomeroy's place and that he has never seen any evidence of gambling being conducted there.

The officers seized Kelley, who fought back. Miller was badly hurt. Kelley was struck several times before he was subdued. He was charged with being drunk and disorderly.

During the hours when the saloon was required to be closed, Patrolman Litherland, in plain clothes, watched Kelley's saloon. He saw the proprietor come out, carrying a paper. He met an acquaintance and the paper passed between them. Litherland suspected that the paper inclosed a bottle of whiskey and continued his watch. In half an hour he saw Kelley come out again, with a bottle of whiskey in his pocket, but Kelley apparently recognized the officer, as he returned to the saloon without disposing of the bottle.

Sergeant Keller says that the policemen on duty around the place have been subjected to continual abuse from Kelley for a long time. He will demand that Kelley be prosecuted vigorously.

UNIVERSITY OF WASHINGTON, Seattle, Wash., Sept. 25.—(Special.)—Coach Gilmour Doble, of the varsity football team; Dr. Vandever Custis, of the department of economics; Thomas Swale, leader of the sophomore class during the freshman fight, and a score of other varsity students are ill here as a result of eating poisoned food at a local restaurant.

Trunks, suit cases and bags. Largest variety at Harris Trunk Co., 132 Sixth.

New York City manufacturers more for goods than all of the other cities of the country together.

Varsity Students Sick

Washington Football Coach and Others Eat Poisoned Food.

The latest victim is Carl Stutz, of Tacoma, All-Northwest High School tackle last year. Other sufferers are Wallace Wingfield, Clarence Gehlke, of Port Angeles, and C. White, of Anacortes.

The university newspaper appeared with a black-faced article, calling for a full investigation, and a mass meeting of students decided to boycott the restaurant until it was brought into proper sanitary condition.

Upon the return of President Thomas Franklin Kane, in attendance on the convention of the State Press Association at Wenatchee, a formal investigation of the affair will be made. The
