Proof That Other Races Are Being Allowed to Play in Games of Celestials May Cause Trouble. North End Is Watched.

The question of Chinese gambling is before the grand jury and guesses are being made in official circles as to the extent of the investigation that body may be making along that and similar lines. It is believed probable that the hearing will extend to North End conditions in general, in view of allowations companions from several allegations, emanating from several sources, which have been made recently. WORKSHOP BIDS TOO HIGH

COAST CITIES IN UNION

Amenities to Be Observed in Securing for West.

Pacific Coast cities have united their efforts to bring West all large gatherings and annual conventions that it is possible to secure. As an instance of the way the cities are working together may be cited the campaign waged by Portland the past week to aid Tacoma in securing next year's convention of the National Association of Commercial Property was neld by B. Hagerdorn and the transfer was made through C. K. Henry & Co.

Since it has become reasonably certain that the new Federal building will be placed on block "S," which is bounded by Seventh. Eighth, Hoyt and Glisan streets, considerable inquiry has been made regarding investment in that section of the city. Much of the property lying near this point is tied up in options, however, and all of it seems to have in excess of the funds now available for its owners.

This quarter block bought by Dr. Parwish lies directly across Seventh street from the property which is now gener. ADVENTISTS ORGANIZE AT LENTS.—Rev.

This wonder working machine has solved the servant girl problem in thousands of homes. It will do the week's washing for a family of six to eight in 90 minutes—at a cost of 3c. It is the only machine with a 3-roll reversible wringer.

The clothes are placed inside of the self-reversing cylinder—each time the movement is reversed it spreads the clothes into a new position—so that they cannot possibly pack into a wad. The surface of this cylinder inside and out is polinned as smooth as glass—no rough edges, sharp corners, paddles or projections of any kind to tear or fray the clothes. This is the biggest step made in laundering in the last 25 years—no other machine has this big advantage.
