bring discouragement even to the hopeful.

That sufferers from anomic and debilitated conditions are brought to the verge of despair when there is a remedy exactly suited for their treatment is a pathetic fact as is shown by the experience of Miss Ellen Mattis, of No. 232 West Fifth South street, Salt Lake City, Utah, who relates her experience gladly in the hope that others will be helped by it. She says:

relates her experience gladly in the hope that others will be helped by it. She says:

"I was all run down, was thin and bloodless and had no color whatever. Two doctors treated me but did not help me that I could see. I kept losing in flesh and weight. I had severe palpitations of the heart and often had to gasp for breath for it seemed that I was being smothered, my heart would beat so fast. I had no appetite and the least exertion tired me all out. I became discouraged with taking so much medicine. Then my mother heard of Dr. Williams' Pink Pills and urged me to try them. I felt some improvement from the first box and as I continued to use them my strength and weight increased and my color returned. I became real healthy again and I shall always speak highly of the remedy."

Thin blood is the most frequent cause of debility. As the supply of blood sent to the brain does not carry sufficient nourishment the patient is dull and drowsy, the nerves become starved and there are marked nervous symptoms. As the blood and nerves control digestion the stomach suffers from lack of tone and the victim loses weight and strength.

Whenever a tonic is needed, Dr. Williams' Pink Pills should be given an immediate trial. They quickly enrich the blood and give strength and health to every part of the body. For this reason they have cured ansemia, chlorosis, rheumatism, lumbago, general debility and the after-effects of the grip and fevers.

Dr. Williams' Pink Pills are sold by all druggists, or will be sent, postpaid, on receipt of price; 50 cents per box; six boxes for \$2.50, by the Dr. Williams Medicine Company, Schenectady, N. Y.

Two Republicans voted with the Democrats in favor of the resolution. The Republicans opposed the provision on the ground that it was in conflict with the enabling act specifications for the first election. The Democrats took the stand that it was not the intention of the Congress to provide for each aid. Court decisions were cited in proof of the contention that the primary was not an election. The Republicans also held that such action would be resented by Congress and that statehood would be endangred. BEAT PREVIOUS RECORDS

(Continued From Pirst Page.) \$22,428,204 for the same period last

Increase in bank clearings was an other feature of the month's record. The gross bank clearings, closed at noon yesterday, were \$48,344,099.35, exceeding the total business of October. 1909, by \$7,435,461.14, or an increase of 18.17 per cent. The monthly balances reached \$4.840,110.44, compared with \$3,585,284.79 for October last year.

Last Day's Clearings \$1,849,748.59 The clearings for the last day of the month were \$1,849,748.59. The volume of bank clearings has shown a steady growth in the last few weeks, with the result that Portland has been near the top of the list of the cities of the coup-

try in percentage increases.

Export trade for the month was brisk, exceeding \$1,500,000. The largest item was lumber, followed by grain and flour.

Foreign and coastwise shipments of lumber kept up their normal strength but the movement of rough and building lum-ber eastward was comparatively small because of the money depression and shutting down of building operations in the Middle West, where the market for Owene lumber is usually good.

Oregon lumber is usually good.
Grain and flour shipments made a fair showing during the month. Shipments from this time on will be expected to increase rapidly, however, as the farmers of the interior are beginning to dispose

Portland Gets Bulk of Crop.

The bulk of the crop will come direct-ty to Portland and before the year closes the annual shipping output will no doubt far exceed that of the previous year. The lumber experts for the month represented an aggregate measurement of 1,511.475 feet, an increase of 1,500,558 feet for the same period last year.

GAIN IS GREAT IN LUMBER

October Exceeds Former Period and Season Leads Heavily.

October's lumber exports exceeded those of the same period in 1909 by 1,890,858 feet, and the combined movement was greater by \$25,858 feet. For the first quarter of the cereal year 94,053,704 feet of lumber has been

floated, overshadowing last season by 30,985,092 feet.
For the month ending yesterday there was floated for offshore ports lumber on five carriers aggregating 11,511,476 feet, valued at \$134,464. In October of last year the movement represented a combined measurement of \$50,618 feet. Coastwise business last month reached 7,760,000 feet, against \$.514,000 feet in October, 1969, a loss of \$54,000 feet, but with the increase in exports, the depreciation is offset. However, 13 coastwise carriers cleared, which has been about the average for several months, because some of the craft entered here from California, that usually lead back with lumber, have been ordered to Northern harbors, where large contracts were made. In view of the fact that local mills are not cutting as much as during the Summer, because some shifts have been discontinued and others shortened, the showing for the month was better than expected.
