Taft Says Wisdom of Decision in Favor of Locks Is Vindicated.

#### LANDSLIDES NO OBSTACLE

Time Has Come to Discuss Plans for Management and Maintenance, Says Taft-Strike of American Employes Has Begun.

COLON, Panama, Nov. 11 .- President Taft sailed for Charleston at 6 o'clock this evening aboard the armored cruiser Tennessee, which was convoyed by the Montana, after four interesting days on the Isthmus. Before leaving the Prest

This is the fifth time I have visited the Isthmus and I have gone over the whole line and looked into every part of the improvements. It is about II months since I was last here and in that time

the progress has been most satisfactory. Indeed it is remarkable.

The first thing that strikes one is the fact that work is being done apparently on every foot of the 50 miles of the canal and done under an organization of men, plant and materials that operates as economically and effectively as if it were a machine, with Goethals in control of a lever which sets and keeps the whole machine in operation. machine in operation.

#### Lock Canal Proves Best.

"When I was here if months ago the main question was the confirmation of the judgment of Congress in having adopted a lock-type canni instead of a sea-level. The extent to which Gatun dam and the locks have been completed has removed from every impartial observer the slightest doubt of the wisdom of the decision made and the fearbility of the plan adopted. This conclusion is further confirmed and clinched by the difficulties occasioned by sildes in culebra cut, which for a canal of 186 feet level necessitated only an additional excannion that could readily be taken "When I was here 22 months ago the cavation that could readily be taken "Any attempt, however, to sink a canal

in Culebra to a depth of \$5 feet below the present proposed level would length-en the time of construction, wear the patience of the Americana, make the cost almost prohibitory and leave it an ex-ceedingly doubtful question whether with the difficulty presented by the Chagres River such a canal would be possible at

#### Landslides No Difficulty.

"The Gatun dam lock, with the lake al-ready 13 feet and slowly rising to a leavi of 85 feet, which will constitute the key to the whole plan of the canal, is so far advanced that, taken with Culebra cut and the locks on the Pacific side, a defi-nite picture is given of what the canal is to be which inspires one with eager-ness for its completion.

"The landslides in Culebra cut can be easily removed by further excavation and widening of the slone where they occur.

widening of the slope where they occur, merely adding something to the amount of excavation previously calculated upon, and to the cost, but the percentage of both time and cost will be very small, not enough to increase the estimates for the completed canal. the completed canal.

The work is so far advanced that the time has come for the discussion of plans for the management and maintenance of the canal, for the govern-ment of Panama is peacefully pursuing its course and enjoying prosperity and the construction of the canal and to con-form to every detail of the obligation imposed by the treaty."

### Strike of Employes Begins.

On the eve of the President's departure, 190 boilermakers, dissatisfied that after hearing their complaints has evening, the President would give no immediate answer to their demands, gave five days' notice of quitting their work and sulling for home. Several of the unions of machinists and blacksmiths are threatening similar action.

It is not proposed to strike, but simply to resign and leave the lathmus. Only bourly employes, constituting 25 per cent of the force, are likely to be affected.

The canal officials are indignant at these employes for trying to enforce their demands, which the officials regard

The President promised to consider the matter fully and cable his answer from Charleston, but this did not satisfy some of the hot-headed among the bollermak-

who are paid hourly and who number 1800, about 25 per cent of the entire American force. The Commission, after confideration, declined to grant the increases, not considering any justification necessary for such action. "The standard pay on the Isthmus is a cents an hour, which is from 10 to 30 cents higher than in the United States. In addition, the workers receive free quarters, fuel, light, medical attention and other privileges not granted in the United States.

in the United States.

"The reason given by the 100 men, who have resigned is that the President's promise to send his answer from Charleston is not satisfactory. This action of the bollermaker's will not interfere with the canal construction work, and will cause only temporary inconvenience until their places are filled, which will be within a short time."

### Living Cheap on Isthmus.

The Commission is not worried at the outlined. The salaried men are not affected. The President told the hourly employes, who demanded 10 cents an hour increase and six weeks instead of two weeks vacation with pay, that he thought more vacation than they were reactions with the salaries was instiffed.

receiving was justified.

The canal workers get all their living supplies at wholesale cost from the commissaries and the Commission maintains that the cost of living here is only 50 per cent of the cost in the United States. The President spent the day in investigating the Pacific division locks, and he enjoyed a four-mile sail on the Pacific entrance to the canal in a tug. He will make a stop of several hours at Guantanamo on Saturday afternoon to inspect the proposed naval base.

# MARCH ON TEXAS

#### 60 MEN CROSS RIO GRANDE

Scouts Sent Out to Meet Hostile Band Not Yet Returned-Ciizens Sleep on Arms in Fear of Sudden Attack.

EL PASO, Texas, Nov. 17 .- Marathon, town of 500 people, 200 miles east of here, is under heavy guard this morning owing to the report that a band of 60 armed Mexicans had crossed the Rio

Grande from Mexico and are marching in that direction.

At 12:30 this morning the scouts sent out to meet the invaders had not re-turned and the exact whereabouts of the band had not been ascertained. At that hour sentries had been posted at all of the approaches to the town and the citizens were sleeping on their arms.

Marathon is about 100 miles from Rock Springs, where the burning of Antonio Rodriguez took place. Why the invaders are making that town its objective point cannot be learned. The telegraph operator at Marathon reports the town quiet, but apprehensive. The report that a band of Mexicans has crossed the river is seemingly authentic.

Nothing is known of the reported invasion at Marfa, Texas, at the hour mentioned.

The belief is held here that the revo lutionist faction of Mexico is taking advantage of the Rodriguez incident to forward their plans and incite the pub lic mind. Sympathizers with plans to overthrow the present regime in Mex-ico in this city express gratification over each demonstration reported and hint darkly that the trouble has only

But never was there the least indication of real danger. To show that the parade was not hostile to Americans and American institutions, it need only be pointed out that the office of the Mexican Herald, the American paper, was passed without an attempt at disturbance while the building occupied by turbance, while the building occupied by El Imparcial, the organ of the Mexican government, was attacked with stones. THIRD AND ALDER STS.

Beware of imitations and substitutes unscrupulous dealers tell you are "just as good as" Duffy's Pure Malt Whiskey.

These cheap concoctions are foisted on the people with the intent to deceive by dealers mindful of their profits only and caring nothing for the health of their patrons. Some go so far as to try to make you believe it is Duffy's Pure Malt Whiskey.

## Substitutes Are Dangerous

When a remedy has been before the public for more than half a century, has been prescribed and used by the best doctors and in prominent hospitals, and has carried the blessings of health into as many thousands of homes as Duffy's Pure Malt Whiskey has, imitations are bound to arise. But they can imitate the bottle and label only-no one can imitate the contents.

## **Duffy's Pure** Malt Whiskey Is Beneficial

It is an absolutely pure distillation of malted grain. Its palatability and its freedom from injurious substances render it so that it can be retained by the most sensitive stomach. It has been used with remarkable results in the treatment of consumption, pneumonia, grip, coughs, colds, asthma, malaria, low fevers, stomach troubles and all wasted and diseased conditions.

Whiskey is sold in sealed bottles only. The "Old Chemist's Head" is on the label and over the cork is an engraved seal. Be certain this seal is unbroken. Sold by druggists, grocers and dealers everywhere or direct, \$1.00 a large bottle.
