HOLDING OF STATE

Arizona Fears Ultra-Radicalism Will Cause Rejection of Constitution.
People Not Satisfied

Phoenix, Ariz., Nov. 30.—(Special.)—Arizona the belief is rapidly gaining ground that the constitution of the new state, being drawn by the convention now in session, will not be accepted by the people and will never be passed up to President Taft and Congress for their approval.

The convention is now drawing to a close. Thirty days after it adjourns the people will vote either to accept or reject the constitution it offers them. Disapproval is freely expressed.

A large majority of the delegates are Democrats. Out of 52 there are only 12 Republicans. In the election the Democratic majorities were far from normal. This was because the Democrats threw out a dragnet and by promising everything asked by the woman suffragists, prohibitionists, socialists and "progressive" Republicans, captured everything but the straight Republican vote.

Promises Declared Broken. The promises to the Socialists and ultra-progressives are being kept but the suffragists and prohibitionists assert that the convention has not kept faith with them. A proposition to amend the constitution for woman suffrage has been voted down and another to leave it to the voters to say whether there shall be state-wide prohibition in Arizona has met the same fate.

Every prohibitionist and every suffragist in Arizona—and there are many of them—disaffected and dissatisfied are openly declaring their intention to vote against any constitution which it may submit to the people. They voted for the Democratic candidates for the convention, not because they had any distinct understanding that women should vote in the new state and that the people should have the opportunity to make Arizona "dry" upon its entrance into the Union.

Only the Socialists and ultra-progressives among Democrats and Republicans are satisfied with what has been done. Old line Democrats say that the delegates are going too far in their desire to frame a "progressive" constitution. For the convention has even tried to improve on the "strong arm" of government, which, in the beginning, it took as a model. The initiative, referendum and recall—even to the recall of the judiciary—have been embodied.
