Arriving at the tunnel the rescue party found Hutchinson was several hundred

feet above them on a mountain with a us hank of snow between them and the imperiled lineman. Meanwhile Hutchinson's clothing, which had been dampened by his exertions, be

Earle was divorced from Marie Emilie Gishbacker in Paris in 1908, on her suit for desertion. Her failure to transcribe a portion of the decree in the register where the marriage was recorded until three months after Earle's marriage to his second wife, suspended the divorce for that period and gave the second Mrs. Earle grounds to contest the validity of her marriage.

Earle's marriage to Julia Kuttner caused a sensation, his first wife having consented to divorce herself so he might lawfully join his "soulmate." He coined "soulmate" applied to affinities.

CAMORRA PLOTS FOR POWER

Extremists in Portugal Are Corrupting Army.

EXPLOSIVES IN ALL HANDS

Distributed With Firearms for Use to Dethrone Manuel, They May Now Be Used to Tear Down Provisional Government.

LONDON. Dec. 30 .- The correspondent of the Daily Chronicle, who wrote the brilliant account of the Lisbon revolution, says in the Chronicle today that everything points to a coming conflict in which the battles will not be between Royalists and Republicans, but between the moderate Republicans and extreme revolutionaries.

The hidden spring of the conspiracy the correspondent says is the Camorra or secret society, which corrupted the army from its allegiance to the archy and is now busily engaged in corrupting it afresh in order to have a powerful lever ready at hand against the provisional government, which has never been firm in the saddle.

People Have Explosives.

The correspondent considers that a source of great danger to foreign busi-ness men in Lisbon is the possession by the people of large quantities of ex-plosives and firearms, which were distributed on the eve of the revolution, but not needed then. All the government's attempts to regain possession of

them Jave failed.

Questioned concerning the Portuguese rumors last night, the Marquis de Souveral, Portuguese Minister to Great Britain, said he knew nothing of them. If there were any unrest in Lisbon, King Manuel had nothing to do with it, and neither had he, and the suggestion that it was due to the Duke of Oporto was absurd.

Shima Makes Prediction of Highest Prices for Tubers-1 Cents a Pound Not Unlikely.

STOCKTON, Cal., Dec. 30 .- (Special.)-That potatoes will seil for \$3 or over per sack is the prediction of George Shima, the potato king, who is said to have on hand about 900,000 sacks. He also says that when potatoes are sold in small quantities before the coming Spring, they will command 4 cents a pound.

Shima has made a close study of the potato crop throughout the United States and not a section has been overlooked He is said to be the shrewdest man in the business and every point is given close study.

In summing up his belief that potatoes will be unusually high, Shima points to the fact the crop throughout the United States is far less than usual and the yield, in this section was less than the preceding year, yet more than the aver-

age for the past five years. The high prices have caused most of the growers and commission men to sell. Shima has refused to dispose of any of his best grade of tubers, with the result he has a large supply on hand. Inside of a month, he asserts, the supply here will be almost exhausted and then be will come near naming his figures for

OREGON CURIOUS, UNIQUE AND ALONE

Freak Legislation Entails Penalties.

STATE WILL SUFFER IN END

Whole World Is Astonished, Says College Professor.

MAJORITY DOES NOT RULE

Neither Switzerland Nor New Zenland. Homes of Fantastic Laws. Deserves Comparison - Dear Price Will Be Paid.

That Oregon will pay dearly for its direct legislation and suffer heavily in the end is the opinion of Henry Jones Ford, of Princeton University, who is at the Portland. Mr. Ford is professor of political economy and has courses of study in Federal, state and municipal governments. He is regarded as an authority on those subjects, and is taking his present trip to study the governments of the Western Canadian provinces and Oregon.

"Oregon is the only place in the world," said he, "where the initiative exists in the form you have it. It seems to me that you have run wild. It furnishes to students of political nomy a practical illustration of direct legislation, and its outcome will be of much interest, although Lapprehend the ultimate outcome.

World Is Astonished.

"It sometimes is necessary for the body politic to have an emetic to clean out the old infection and corruption of some system which has proved harmful to the people at large. The convention principle of government has proved disastrous failure in America and has done more to create graft than anything to be found in our form of government.

"I do not blame people for rebelling against it. But your direct legislation is the astonishment of the whole world. Generally, when we speak of freak legislation, we think of Switzerland and New Zealand, but Oregon outclasses them. It is so far from them that I doubt if there is a comparison. No one in Switzerland ever heard of such form of direct legislation as you have out here. In the first place, their referendum system is a relic of the Middle Ages. It is little used, and for the masses to initiate laws would be as strange to them as some of your Hood (Concluded on Page 5.)
