

BAILEY MUST QUIT, INQUIRY'S EDGE

Committee Orders Immediate Resignation of Dairy and Food Commissioner.

ACCUSED MAN REFUSES

Joint Investigation Body Finds State Official Incompetent, Partial and Guilty of Misappropriating Oregon Funds.

STATE CAPITOL, Salem, Or., Feb. 6.—(Special.)—Immediate resignation of Dairy and Food Commissioner Bailey will be recommended by the joint legislative investigating committee in its report to the Legislature. Incompetence, neglect of duty, partiality in enforcing the law, and misappropriation of funds are the grounds on which the committee demands Bailey's resignation.

Incompetency Is Proved.

"That the joint committee of the Senate and House, to whom was referred the communication of the Dairy and Food Commissioner, West, asking that an investigation be made into the management and affairs of the office of Dairy and Food Commissioner, as being conducted by Hon. J. W. Bailey, beg leave to submit the following report, namely: "That upon the examination of witnesses, consisting of four ex-deputy dairy and food inspectors, two chemists, ex-employees of said office, and J. W. Bailey, incumbent, and other evidence, we find:

Money Misappropriation Found.

"Third—That deputies were put into the field without proper instructions as to their duties.

committee has demanded his resignation. "No, sir, I certainly will not resign simply because of the testimony of two boys whom I discharged from my office, and the Legislature has no right to ask my resignation.

"The accounts of my office are perfectly proper, and if the people who elected me to this office are not satisfied with my stewardship they have recourse to the recall. If they want to recall me, why I shall assist them to circulating petitions.

HOUSE WOULD MAKE 18 LAWS

Many Bills Passed by Representatives First Day of Week.

STATE CAPITOL, Salem, Or., Feb. 6.—(Special.)—Bills passed by the House today were:

- H. B. 101. Amending—Authorizing Multnomah County Court to levy special tax of 1 1/2 mills for library building.
H. B. 102. Making—Authorizing property owner to withdraw from Torrens registration.
H. B. 103. Making—Authorizing insurance companies to be paid by the State Insurance Commission.
H. B. 104. Making—Appropriating \$4000 for experiment station in Harney County.

BOVERMAN SITE BEING DISAPPROVED

State Engineer Lewis' Report Says Tract Selected Has Good Asylum Locations.

NONE SPECIALLY FAVORED

Official Submits Result of Investigation of Pendleton Tracts to Committee of Doctors—One Purchase Urged.

STATE CAPITOL, Salem, Or., Feb. 6.—(Special.)—Making specific recommendations but outlining the various sites in and around Pendleton which he deems available, as well as ascertaining that there are building sites on the Oliver-Carpenter tract, purchased by Boverman for the Eastern Oregon Branch Asylum, State Engineer Lewis submitted his report to the committee of doctors selected by Governor West to examine into the feasibility of that as a location for the new buildings.

In a letter accompanying the report Mr. Lewis, however, does not recommend that the Roberts tract of 54 acres should be purchased, in any event, to round out the state's holdings and to protect the interests of the state in the possible development of water power. He says in the same letter that he is not well informed on the possible development of the institution and technical subjects pertaining to the asylum work and leaves this feature for the physicians' committee. This committee includes Dr. J. C. Calverton, Dr. W. T. Williamson, Dr. Harry Lane and Dr. Andrew C. Smith.

The report of State Engineer Lewis is:

Site in Flood Danger. The state, I am informed, owns 214 acres of land about one mile west of Pendleton, Or., upon which, or in the vicinity of which, is proposed to be built a hospital for the insane, to accommodate at the outset about 100 patients. This land was purchased from two different owners.

The Oliver tract of 154 acres, very largely bottom land, is situated on the north and south sides of the Pendleton River and is bounded on the east by the N. & W. Co. Railroad. The bottom land is only a few feet above low water, and at high water is subject to overflow. Danger from this source can be avoided by building a dike along the line between the Oliver and the Roberts tracts.

Several buildings are located on the highest points of the bottom lands, about 100 feet above low water. A ditch which crosses the Otisland Gardens to the river, these areas are not owned by the state. As all the low water flow of the river is naturally contained, and the irrigation of the bottom lands, but heretofore irrigated only by means of the Otisland Gardens, unless storage is supplied. Reservoirs for this purpose are being constructed in the mountains. This will probably be necessary in any event, as large quantities of water will be needed for the general irrigation around the building site. If located at high water, the reservoir would probably be cheaper than using city water, if such supply is found to be adequate.

The outlet for the Pendleton sewer system, which is now being constructed, is expected to extend this sewer to a point below the Roberts tract, and thence to the Pendleton river. During the construction of this sewer, the Roberts tract is in the habit of storing all the storm water for the day, to secure the outlet for the water for the next day.

Sewer Extension Required.

This condition would compel the state to extend the city sewer about one mile farther down stream, if the city sewer is to do so.

The only high ground on this tract available for a building site is a point on the Roberts tract, and this is of restricted area because of a ravine which runs through the desirable spot. This ravine widens to the east, and if the Roberts tract of 54 acres were owned by the state, it would give a building site about 100 feet long and 200 feet in depth, with a level top, and a lawn purpose. The ground rises about 25 feet in the east, and the distance from the site shows loose lava rocks within 50, 75, 100 and 125 feet respectively below the surface.

With indications of solid rock, and the Roberts tract of 154 acres is a hill land, the west half of which is a ravine. A building site about 200x200 feet in dimensions is found on the east half of this tract, 125 feet above the river, and 145 feet above the river. The building of such a structure would be a ravine. A building site about 200x200 feet in dimensions is found on the east half of this tract, 125 feet above the river, and 145 feet above the river.

High Grade Is Hindrance.

It is extremely doubtful if the railway company can be prevailed upon to purchase such spot even if constructed by the state. The grade of the steep ground is such that the spur of less grade will be longer and more expensive. It will have to be purchased or condemned if the state is to construct it.

The Oliver-Carpenter tract is bounded on the south by the Oliver tract of 1200 feet, and an extent of 600 feet. This tract is not owned by the state. This latter tract is directly in front of the proposed building site.

Water power—The Roberts tract of 54 acres, on which I believe the state holds an option to purchase at \$100 an acre, extends to the river on the east and is purchased by the state. It is a possible water power development. There is 22 1/2 feet fall in the river between the upper corner of the Roberts tract and the lower corner of the Oliver tract. The latter is about 200 feet wide, which, under the above head, would develop 800 horsepower. However, the water is not sufficient to furnish lights for the institution, and the pump for the water supply and for sidehill irrigation. Because of the fluctuating water by upper corner, some storage reservoir would be provided to equalize the flow. The cost of such development, including the dam, estimated with the limited information available, probably range from \$15,000 to \$25,000.

The Wheeler tract of 220 acres, located on the east side of the river, is a hill land, and is all bench and hill land, said to be a possible water power development. The lower corner is about 800 feet above the river, and the upper corner is 100 feet above the river. It is 82 feet above the river. It is described as the west 1/2 of section 5, township 2 north, range 2 east, meridian 12 west, southeast corner the surface rises gradually to the northeast, and the rate of 4 feet per 100 feet. It is 1000 feet at the rate of 4 feet per 100 feet. It is 1000 feet at the rate of 4 feet per 100 feet.

Bank Wreckers Sentenced.

PHILADELPHIA, Feb. 6.—Pleading guilty to charges of wrecking the American Trust Company of this city, Dr. J. Kanter Crawford and Joseph P. Crawford, brothers, and Vice President and Secretary-Treasurer, respectively of the institution, were each sentenced to three years in the County prison and fined \$500 today.

WHY WOMEN SUFFER FROM NERVOUSNESS

One Result of a Form of Debility That May Be Remedied by a Course of the Tonic Treatment.

Many women suffer from nervousness, accompanied by loss of weight and pallor, showing that there is a loss of nutrition and that the blood is becoming deficient in quantity or quality. This is a condition that may be followed by serious consequences unless corrected.

To cure it, the falling nutrition must be arrested, the patient's weight and strength built up and the blood restored to its normal condition. The one remedy that has cured this condition, strengthened the digestion, toned up the nerves and made the blood pure and rich is that described by Mrs. R. P. Taylor, of Oakland, Kans. She says:

"I am glad to recommend Dr. Williams' Pink Pills to weak and nervous women, because they build and tone up the whole system and give lasting benefit. Some years ago I had nervous debility and seemed to be on the verge of a collapse. I was all broken down. My heart beat so fast at times that it would frighten me. I had smothering sensations and felt as though I was going to faint. These spells came on me frequently. My stomach was affected. I did not enjoy my meals but had to force the food down. I often had severe nervous headaches which made me dizzy. I was greatly reduced in weight.

"The doctor pronounced my trouble weakness and nervous debility. He would help me for a while and I would think I was getting better, but as soon as I quit taking the medicine I would become as bad as ever. I had been sick for over two years before I decided to try Dr. Williams' Pink Pills. A few boxes proved to me that the pills were helping me, and I used them until I was cured. I occasionally take the pills now as a tonic and always find immediate relief."

Dr. Williams' Pink Pills are sold by all druggists, or will be sent, postpaid, on receipt of price, 50 cents per box; six boxes for \$2.50. Dr. Williams' Medicine Co., Schenectady, N. Y. If you are interested write today for a copy of the new edition of our book on "Nervous Disorders" and our pamphlet "Plain Talks to Women."

Costly Road Entailed.

The Daniels place of 200 acres joins the Wheeler place of 200 acres and is situated at 750 feet above the river. The bottom land is badly cut and is in a very poor state of improvement. About 80 acres is in a very poor state of improvement. About 80 acres is in a very poor state of improvement.

An expensive wagon road bridge and culvert are necessary to reach the site. If such site were selected, the 80 acres of bottom land would be available. A 2400-foot spur on 2 1/2 per cent grade will reach the building site. Much of this line is not available.

A 2400-foot spur on 2 1/2 per cent grade will reach the building site. Much of this line is not available. A 2400-foot spur on 2 1/2 per cent grade will reach the building site. Much of this line is not available.

WOODARD, CLARKE & CO. OVER 45 YEARS IN PORTLAND. Prescriptions Called for and Delivered Quickly

HOUSE BOWNS SORROW

TRIBUTE PAID TO M. F. EGGLESTON, DEPARTED SOLO.

Senate, Too, Adopts Resolutions in Honor of Representative Called Suddenly by Death.

STATE CAPITOL, Salem, Or., Feb. 6.—(Special.)—Eloquent tributes to the memory of the late Captain M. F. Eggleston, Representative from Jackson County, were made by the Senate and the House today.

After adopting appropriate resolutions the House adjourned until 2 o'clock this afternoon. The Senate adjourned from 10 to 10:30 o'clock this morning out of respect to the departed Representative. Buchanan and Hollis were the speakers.

It was with muffled sound of the gavel Speaker Rusk assembled the House promptly at 10 o'clock. Reading Clerk Clarke omitted the name of the dead legislator from the rollcall and Rev. R. G. Miller, of the Friends' Church, Salem, offered the prayer. An air of solemnity pervaded the session. The death of the Jackson County member was draped in national flags and crepe, with a beautiful floral piece of white carnations.

Representative Buchanan, of Douglas and Jackson, one of Captain Eggleston's colleagues, offered resolutions which were adopted by rising vote. The resolutions follow:

Whereas, God, in His wisdom, has seen fit to remove from our membership one of our most esteemed members by death in this city on February 4, 1911, Captain M. F. Eggleston, Representative from Jackson County; and

Whereas, we recognize that in his removal from our deliberations this House and the State of Oregon have sustained an irreparable loss in being deprived of his kindly and courteous companionship, and wise, helpful and valuable counsel as legislator;

Resolved, That the House of Representatives of the State of Oregon do hereby publicly express our heartfelt sympathy with the family and relatives of our late member, and do hereby extend to them our sincere condolences, and the sorrow of every member of this House in the loss we severely and collectively sustain.

That we set aside the present time for proceedings in honor of his memory, after

Turkish Bath Cures Rheumatism at Home

Costs but 2c a Bath, and the Body is Rid of Uric Acid Poison, with Astonishing Rapidity.

Quickly Cures Kidney Trouble, Nervous Prostration and All Skin Diseases. The Robinson Thermal or Turkish Bath, taken at home, is becoming a rage. Those who have used it have been completely carried away with enthusiasm because of the astonishing results obtained.

Well known physicians say that the Robinson Thermal Bath at home, is about to become an almost universal conqueror of disease. This is not an exaggeration. Any man or woman can prove its results inside of 24 hours, in some cases 30 minutes.

It is a remedy of scientific, especially the uric acid-poison, is extracted from the system through the pores, almost as if it were sucked up through a straw. Uric acid is the poison that causes rheumatism. They do not extract the poison from the body.

Any one can now take Robinson Thermal Baths at home and at a cost of only about 2c a bath. The only way to take these baths is by the use of the Robinson Thermal Bath Cabinet, which is a unique and marvelous invention.

The Robinson Thermal Bath Cabinets can now be seen and examined in Portland at Woodard, Clarke & Co.

Ask the dealer also for a copy of that great book "The Philosophy of Health and Beauty." The regular price is \$2.00, but you can get one free now for only a limited time.
