INSURANCE TRUST SAID TO CONTROL

Code Commission Contends Coast Business Governed in Bay City.

GENERAL RULES ARE CITED

Denial That Fire Insurance Business in Oregon, Washington and California Is Under Monopolistically Given Refutation.

OLYMPIA, Wash., March 5.—(Special).—Charges have been made frequently that there was an "insurance trust," with offices in San Francisco, which controlled the fire insurance business of the Pacific Coast...

Exclusive Control Is Desired. The effort to obtain exclusive control of insurance is shown by article 6: "No member of this board or its representatives in any capacity shall place with or accept of a company not a member of this board any business, whether by reinsurance or otherwise, except at full board rates, and in compliance with all board rules."

Intent is to Fix Rates. The rule shows plainly the intent to fix rates for insurance in all districts. It is provided: "All books of general rates and all specific rates for each town or district shall be determined upon by the executive committee, but shall not be operative until approved in writing by two-thirds of the entire membership of the board."

Local Agents are Required to make a report to the district secretary of every policy written by them, whether in any town or non-board companies. The agents are compelled to rectify any changes from the schedule of rates.

Pledge Is Required. All brokers are required to sign a pledge before they can secure a certificate to enable them to place business with local agents. They must also agree to give preference to board companies, as follows: "I also hereby promise and agree in addition to said pledge that in placing business I will give the preference to the members of the Board of Fire Underwriters of the Pacific, and that I will not place any risk with companies not members unless I cannot secure sufficient insurance on such risks from members of the board, in which case I agree to file with the governing committee within one week of so placing a list of non-board companies in which the same has been placed, with the names of the assured, location or risks, and amounts of insurance given them."

Rate is one of the most drastic. "If a majority of the board companies in any agency decide that they are suffering by competition from companies not members of the board they shall withdraw therefrom. "In case board companies withdraw from an agent under the operation of this rule, such agent shall not be eligible for reappointment, or appointment by board companies within one year thereafter, nor so long as he represents a company not a member of this board. "Rates in any city, town or district, or any part thereof, shall be suspended upon the request of a majority of the membership of the board having agencies in such city, town, or district, or any part thereof."

Stop the heating waste!

There's many a man who would save much money if he would place a big dollar sign on his coal-pile. That dollar sign would daily remind him to ask himself some plain, blunt questions in heating comfort and economy. The answer would be—and there is only one right answer—

AMERICAN & IDEAL RADIATORS & BOILERS

In running an IDEAL Boiler you will find there is no "undigested fuel"—every ounce of fuel is made to yield its full heating value—which the AMERICAN Radiators distribute where and when needed in the rooms—none of the heat is wasted up the chimney.

With IDEAL Boilers you can use any kind of coal—hard or soft—cheapest screenings, wood, oil, gas—anything that will burn—and save in a few years enough to pay for the heating outfit. IDEAL Boilers and AMERICAN Radiators produce comfort at a turn of the valve—like telephoning the cellar for heat—or you shut off the radiators in any unused rooms and save the heat.

Exhaustive tests before bodies of scientific men and the several hundred thousand IDEAL Boilers in actual use in every civilized country where heating is needed furnish the genuine basis for our broad claim that IDEAL Boilers are unequalled in the world because they shut off all fuel waste.

AMERICAN RADIATOR COMPANY

Sold by all dealers. No exclusive agents. Public Showrooms and Warehouses located at Chicago, New York, Boston, Philadelphia, Buffalo, Pittsburg, Cleveland, Cincinnati, Atlanta, Birmingham, Indianapolis, Milwaukee, Omaha, Minneapolis, St. Louis, Kansas City, Denver, Seattle, San Francisco, Brantford (Ontario), London, Paris, Brussels, Berlin, Dusseldorf, Milan.

Important Announcement re FORT GEORGE

Very important railroad announcements as to definite locations, also development and construction at FORT GEORGE, will be made in a few days.

WATCH THIS PAPER'S PAGES

It is a most remarkable fact that not less than ten railroads are now either building, chartered or surveyed to FORT GEORGE. FORT GEORGE is the geographical and strategic commercial center of British Columbia—Canada's largest and richest province. FORT GEORGE is at the junction of 1100 miles of navigable waterways, in the gateway of the famous PEACE RIVER VALLEY.
