Mr. Dalzell has been taking a little vacation at Alken, S. C., and ran over to Augusta for luncheon with a party of friends. Politics had nothing to do with his call.

John D. Rockefeller, who occupied quarters close to the President's at the hotsl, where both were stopping, left today for New York. It was reported that Mr. Rockefeller, in the belief that the United States Supreme Court would seen hand down a decision in the Standard Oil trust case, desired to be in close touch with the situation.

This remark caused her great distress of mind, she said, which was equalled on another occasion when they were dining at the home of Mrs. Clare Gibson. Mr. Stephens, it was stated, requested Mrs. Gibson to make some fig preserves for him, remarking of his

wife:

"She can't do anything."

Regarding the waist. Mr. Stephens explained on the witness stand that he might have made the remark, but if he did so he was only joking. As to the preserves, he declared that Mrs. Gibson had a reputation in Glendale for making the best preserves in the country, and he had asked her for some that his wife might learn how to make them.

Mrs. Gibson was placed on the stand. When asked how Mrs. Stephens treated her husband, she declared, very well. "Not as an angel, perhaps, but then, none of us are angelic," she said.

In granting the divorce, Judge Conrey bitterly scored Stephens for his treatment of his wife.

sydney. C. B., March 15.—That the rigorous Winter just closing has caused extreme suffering and probably many deaths among the people in the barren Labrador Peninsula, who have been cut off for months by great ice-fields from the possibility of securing food and clothing is the one fear felt here and in Newfoundland.

The last reports from the North which were received last last Fall said the food supplies were almost exhausted and that hundreds of the natives, mainly fisher-folks and their families were on the verge of starvation. Supplies were immediately sent to relieve the situation then regarded as extreme, but months have passed since then, and the stricken Labrador people have had no help, nor has word come to the outside world as to how they are faring.

Repeated efforts have been made to carry succor to the starving people. Vessela laden with supplies of food and clothing, have falled repeatedly to plerce ice-floes which choke the Strait of Belle Isle, the narrow stretch of water which separates Labrador from the Northern Coast of New Foundiand. The present misfortunes of the Labrador people had their beginning in the failure of last season's fishing catch. It was the poorest in years. As a result there was no money on hand to buy food and clothing. A bilizzard which swept over New Foundiand and Labrador last week is believed to have caused much damage. The interior of New Foundiand was completely included for several days, scarcely a telephone and telegraph wire being left standing.

A blanket of snow reported in soms places as being from 20 to 20 feet deep, covered most of the colony.
