"It would be tedious to you to re

ideals, of course, are high, and it is our aim to have in Reed College nothing but the best; we want the student of the best type and the instructor will be of the best type. A great interest will be taken in athletics, as well as learning, and I might say, being a tennis enthusiast, that if a member of the faculty cannot play tennis, he may have a strenuous time making the faculty.

"We hope to have everything in readiness to open the school this Fall, and the way applications are coming in from over all the Northwest, it appears that we shall start with an unusually large enrollment for a college of this kind. We have found there is great need of an institution of this kind, and as the Reed will not limit the kind of a school to be founded, we think we have found just what Port-

"As to my attitude toward fraternities, that is college fraternities, it is a deep subject, but I must say that I favor the Greek letter society when rightly organized, ably conducted and when its ideals are high, mentally, morally and physically. I believe in learning, right living and outdoor life for the student and the individual in all walks of life, and I only hope the college man of Portland and the Northwest, as well as all the citizens, will lend us all the encouragement possible."

ed their case, their precious health. They do not consider the ability, professional standing and reputation of the physician or specialist of whom they took treatment, but have considered far more the fact that by not going to a specialist of ability they could get cheaper treatment. Such is not the case, because it requires ability and skill to cure any one of the aliments to which I devote my full time and attention, and the specialist who possesses the ability to cure, gets all the business he can attend to. If you are today discouraged because you have not been cured it is your own fault. Tou have no one else to blame but yourself. If you have sought troatment and are not cured, it is simply because of the fact that you have not thought enough of your health, your life, to pay the price of a competent, reliable specialist, who pessesses the ability necessary to cure you.

NAGEL CONSIDERS BREAKWATER CASE

Commerce and Labor Chief Is Investigating Charge About Few Mates.

SUIT FOR \$600 PENDS

Vessel Found Damaged in Drydock Satling Delayed--Captain Mac-Genn Declares Complement Is Optional.

Though the steamer Breakwater, against which an action was instituted by United States District Attorney Mc-Court to recover a statutory penalty Court to recover a statutory penalty of \$600 for an alleged violation of the steamboat inspection regulations in carrying two mates instead of three, has been released and the case has been made the subject of personal investigation by Secretary Nagel, of the Department of Commerce and Labor, the vessel will not go to sea today as scheduled. The Breakwater may not get outside until Sunday, because of damage found when the craft was lifted to the Oregon drydock.

age found when the craft was lifted on the Oregon drydock.

It was discovered that the blades of her wheel were in such condition that a new propeller will be shipped, while the shaft was down about an inch and the tube requires repairing. The work has been ordered hurried and it is thought the vessel may be floated and loaded to sail Saturday. The vessel will also be cleaned and painted and given such attention as will fit it for another hard season on the Portland-Coes Bay route.

W. D. Fenten, attorney for the Southern Pacific, and Assistant United States District Attorney Evans were in con-ference yesterday regarding charges filed, and it developed that the alleged violation had been reported to the De-partment of Commerce and Labor in advance of a complaint being filed. Sec-retary Nagel asked that the papers be retary Nasel asset that the papers of forwarded to him, but his message arrived following the filing of the pleadings. It was hinted that the case is the outgrowth of the discharge of a member of the Breakwater's company and as the vessel's certificate sets forth that it is allowed three mates, the fact but two are carried was reported. It is the contention of Judge Fenton and Captain Macgenn, master of the Breakwater, that as it has carried two mates since its purchase by the Southern Pa-cific and had no more under previous ownership, except at such times as an extra man was deemed necessary, that the requirements of the certificate in that regard are optional with the mas-

SMALL BOATS LIKE CHANNEL

Captain Graham Says Recklessness Causes Many Drownings.

"Keep all rowboats and canoes out of the channel and there will be a decrease in the number of drownings during the season." declared Captain A. W. Graham of the Yellow Stack line, yesterday. Cured of Asthma of Four Years' Standing.

Year's Standing.

September 24, 1916.

I had asthma for a number of years and after trying different doctors and medicine without relief I came to Dr. C. Gee Wo, and after taking his medicines four or five months I feel like a new man. His remedies have done me what I thought impossible for anyone to do. They have cured me of asthma, and I recommend him to any troubled with similar disease.
