Great Sale Spring Household Needs of All Kinds--Third Floor

REED CHANGES PLANS

ARCHITECTS INSTRUCTED TO PREPARE SPECIFICATIONS.

Permanent Buildings Will Be Completed in September, 1912, in Gothic Style.

Instructions have just been given the architects for Reed College to prepare definite specifications for the first three permanent buildings. These will be erected by September, 1912. They will consist of a main building and two halls of residence, one for men and one for women. The main building will cost \$120,000, and the dormitories will cost \$75,000.

The main building at first will contain the recitation rooms and executive offices. It will be the central structure of the college for two or three years. At the expiration of this period it will be used exclusively as a recitation building, and the administrative offices will be elsewhere. While the two dormitories will be permanent they will be only the first sections in a system of dormitories that permit of extension to accommodate any number of students.

The type of architecture for the college has been definitely adopted. The buildings will follow the collegiate-gothic style. This is best shown in the United States by the buildings at Princeton, Bryn Mawr and Washington University in St. Louis.

It was decided at a meeting of the trustees of Reed College yesterday that when classes open next September recitations will be held in a temporary building erected on the college campus instead of at Portland Academy, where it was planned to open. This action

was made necessary by the unexpected number of applicants who qualified for first year work.

The change of programme also makes it necessary to engage for September of this year a number of instructors who were provisionally engaged to take up their work with the college in September, 1912. President Foster was authorized to offer these men appointments for September, 1911. At the end of the first year the classes will be transferred to the three permanent buildings already planned. These structures will, it is expected, have been completed by that time.

As soon as Mr. Foster has concluded arrangements with the professors a special number of the Reed College Record will be published giving information about the members of the faculty.

"The number of applications from prospective students has been most surprising," said Mr. Foster last night. "New names are being received daily. At present we do not know how many we shall have to accommodate, and we have not decided on the size or other details of the temporary building."

Riverfront "Firetraps" Viewed.

Harbormaster Spier last Wednesday took Building Inspector Plummer and F. W. Mulkey, president of the Public Dock Commission, on an inspection tour of the riverfront from Market street on the south to Sixteenth street on the north to show the "firetraps" that line the riverfront. The trip was largely a preliminary one, with a view of securing the extension of the fire limits to include the down-town dockage, and thus comply with the demands of the fire underwriters. President Mulkey will make a report of his observations to the members of the Public Dock Commission. The commission has power to enforce any rule it may desire to put into effect regarding fire protection.

RECALL IS NOT ABATED

CANDIDATE AGAINST CAMERON MAY YET BE FOUND.

Lawyer to Be Acquainted With Nature of Charges—Prosecutor's Activity Is Scouted.

Activity of District Attorney Cameron through a grand jury in investigating alleged graft in Portland has not served to deter the Municipal Association in its determination to invoke the recall against that official. A committee representing the organization is now conferring with a prominent lawyer who will decide finally whether or not he will run against Cameron after the Municipal Association has acquainted him with the nature of the charges that will be made against Cameron to justify the proposed special recall election.

Officers of the association refused yesterday to disclose the name of the prospective candidate.

Members of the Municipal Association are not disposed to regard seriously the sudden aggressiveness of District Attorney Cameron. They feel that it will prove only another of the periodical crusades against graft and corruption Portland has often witnessed with the result that after the agitation for some action on the part of the District Attorney has abated, conditions that have been interrupted temporarily will be restored and nothing will result from the demand for a municipal clean-up. Officers of this association insist that they are in earnest and will proceed with their recall plan just as soon as the right sort of a candidate can be found to oppose Cameron in such an election.

WOOD PAVING BID LOW

CARBOLINEUM COMPANY WANTS \$1.98 FOR STREET WORK.

Mayor Favors Fisher-Thorsen Proposition to Lay Treated Blocks on East Morrison Street.

For the first time since it laid pavements on Fourth street and on Washington, between Third and First streets, 10 years ago, the Carbolineum Wood Preserving Company, of Portland, yesterday afternoon submitted a bid for this character of work. It is to be laid on East Morrison street, from East Water to Union avenue. Three companies made tenders, but the lowest was by the company named.

The bid of the carbolineum company is \$1.98 a square yard for the blocks, 30 cents for concrete between the streetcar tracks and 95 cents for the six-inch base in the street. This is considered by Mayor Simon to be an excellent bid and it is believed the street committee next week will recommend the awarding of the contract to the Carbolineum Wood Preserving Company, of which Henry J. Fisher and M. G. Thorsen are local representatives.

It was under the supervision of the Carbolineum Wood Preserving Company that the treated wood blocks on Fourth and on Washington streets were laid and because of the excellent results obtained in these two pieces of work, Mayor Simon and many others have been favorable to more of the same kind of paving. Preparations are being made to start the work early and to complete it in record time, if the contract is awarded. The deck of the Morrison-street bridge and the east approach are being replanked to East Water street, where

REFERENDUM UNDER WAY

Petitions Aimed at Malarkey Measure Being Circulated.

After considerable delay petitions for the referendum of the Malarkey public service commission measure, passed by the Legislature, which enlarges the powers of the State Railway Commission and includes cities, are being circulated. The object of the referendum is to hold up the Malarkey measure until the public service measure prepared by a committee from Portland push clubs, of which Ben Rosland is the chairman, can be submitted to a vote. The local committee undertook to defeat the Malarkey measure while it was before the Legislature, but failed.

A few weeks are left in which to circulate the petitions, and about 800 names will be needed to make the referendum effective. The local public service commission measure and the two measures to tax corporations to meet the expenses of the commission will be voted on in June

Babe's Body Found in Timber Boom.

Floating inside a boom of timbers alongside the steamer Lucerne, near the Irving-street dock, the body of a newborn child was found Thursday night by members of the steamer's crew, who turned it over to Sergeant Carlson, of the Harbor Police. A ticket calling for a first-class seat in the Baker Theater last Sunday night, is a clue. The ticket was found inside a gunny sack in which the child was inclosed. The harbor police believe that the bundle must have been thrown from the Steel bridge.

For soreness of the muscles whether induced by violent exercise or injury, Chamberlain's Liniment is excellent. This liniment is also highly esteemed for the relief it affords in cases of rheumatism. Sold by all dealers.

Sunday Excursions to GREAT CORNELIUS GAP TUNNEL

4100 feet through Solid Rock. Special round trip rates for most scenic ride out of Portland. Get off the cars at North Plains, the town which has grown from a tent to 40 buildings in two months, the town all Oregon is talking about. Town lots and acreage will prove an excellent investment at North Plains. Trains over United Railways to North Plains leave corner of Second and Stark streets daily at 8:15 and 10:15 A. M. and 1:15 P. M. For information call at 235 Stark St., or telephone Main 5076 or A 3774.
