Short Ballot League of Ore- E. C. Benedict, of New York, and gon Is Formed to Fight Election Evil.

BEN SELLING, PRESIDENT

Organization to Wage Campaign for Aim-Longer Initiative Petitions Urged-Vote "No" if Puzzled, Advised.

Convinced that a short ballot is necessary to correct evils and that im-provements in connection with the in-itiative and referendum should be adopted to m he the Oregon system work purfectly, the Short Hallot League of Oceanu was formed yesterday and Commercial Cl b.

of Oregon was formed resternly at the Commercial Cl b.

Ben Selling was chosen president and J. M. Ambross, secretary. Mr. selling is president of the State Senate and Mr. Ambross is a member of the Lower Rouse of the Legislature from Multnomah County.

The object of the league is to announce propagands for a revision of the Oregon hallot laws, which members of the league say should be changed and shortened. Another meeting will be held June 14 to begin a campaign to obtain a change in the ballot laws either through an initiative measure or by enautment by the Legislature. The society is formed on lines outlined by Colonel Roosevelt and Woodrow Wilsen, Governor of New utilized by Colonel Roosevers Woodraw Wilson, Governor of New

Wilson Heads Similar Body.

Governor Wilson is president of the Short Ballist Organication, a National society, which has been in existence for more than a year. It has for its object the weeding out of needless election of officials when appointment of them would serve better. It is also suggested by members of the society that the percentage of aignatures required for petitions flied to submit an initiative measure should be made more than 15 per cent of the total vote as at present, a measure to place on the ballot would have to be not only popular, but one that has already secured intelligent consideration by the people.

"I am heartily in favor of a shorter ballot," said Senator Selling. "It is what we need. I have with me the sample ballot for my vote at the conting city election. It contains many mames and 16 Legislative measures. Not only are the names of some of the men Governor Wilson is president of the

names and 16 Legislative measures. Not only are the numes of some of the men unfaciliar to me but I am sure that many of the measures, which it is desired to have become law, are not fully understood by me. I am going to spend a good portion of a day to post myself theroughly. Then I doubt if I shall be fully informed to act with intelligence. What I am in favor of is this—a shorter ballot and a larger percentage of names for submitting an initiative measure to the people. Unless some action similar to this is taken it will bring the Oreson the people. Unless some action similar to this is taken it will bring the Oregon system into disrepute."

Vote "No" Is Urged.

League members declared that they believed attention should be called to the faults of the present system and that voters should be warned to vote "no" on all measures not fully understood by them as an intelligent vote was necessary and an unintelligent vote might work great harm.

The principles of the league as announced are in part:

"Each member helieves in the initiative and referendum, the recall, statement No. 1, the direct election of United States Senators, the direct primary, the corrupt practice act and the commission form of government.

instance corrupt practice act and the com-mission form of government.

The ballot should not be incum-bered with great numbers of measures.
Only questions of general public im-portance should be presented under the infilative. Every proposed measure about be read most carefully and con-sidered by every proposed. should be read most carefully and considered by every voter. No voter should become a party to making a measure a law unless he has actually made himself familiar with each and all of its provisions. In case of doubt it is always safe to vote 'no.' If a proposed measure has merit it will stand the test of time and be presented again. "We believe the alarm sounded by Colonet Recoverelt and Governor Woodrow Wilson is timely. We feel that the only real danger now for the initiative and referendum lies in the over use of both."

One Thousand Dollars a Day in Taxes

Is approximately what we are paying now. This is more than double the amount paid by any other company in Multnomah County.

If you are interested in the EXTENSIONS and IMPROVE-MENTS which this wonderfully growing city demands, this advertisement will have food for reflection for you. Study carefully.

During the past five years many millions of dollars have been invested to extend and improve the public utilities operated by this company. Of these vast sums, 99 per cent has been contributed by Eastern investors.

These millions of money invested with a faith in the community, and with financial courage unparalleled, represent tremendous confidence in Portland.

No man can borrow the full value of the cost of his home. He can borrow approximately 50 per cent of its cost. The same principle holds true of all loans, large or small. By the operation of this company's Bond Mortgage, it can borrow 75 per cent of the cost of its Betterments, its Improvements, its Extensions. That is for every FOUR Dollars expended for such purposes, it can borrow three dollars—the other dollar must come out of the

It follows, therefore, that every dollar of added taxation will prevent FOUR dollars' worth of EXTENSIONS.

An ordinance to be voted upon on June 5th proposes the additional burden of a 3 per cent tax on the gross light and power revenues of this company.

Facts

The experience of Motherhood is a trying one to most women and marks distinctly an epoch in their lives. Not one woman in a hundred is prepared or understands how to properly care forher-self. Of course nearly every woman now-adays has medical treatment at the time of child-birth,

but many approach the experience with an organism unfitted for the trial of strength, and when the strain is over her system has received a shock from EXPERIENCED h it is hard to recover. Following right upon this comes the nervous strain of caring for the child, and a distinct change in the mother results.

There is nothing more charming than a happy and healthy mother of children, and indeed child-birth under right conditions need be no hazard to health or beauty. The unexplainable thing is that, with all the evidence of shattered nerves and broken health resulting from an unprepared condition, women will persist in going blindly to the trial. It isn't as though the experience came upon them unawares. They have ample time in which to prepare, but they, for the most part, trust to chance and pay the results.
