Medford Hears From Mrs. Harriman's Pastor.

4050 APPEALS IN ONE YEAR

Intimation Is Given That Number of Eniversities in Western Oregon Will Have Effect in Selection of Site for Big School.

MEDFORD, Or., June 4 .- (Special.)-There is much interest to this city over the proposed university, which it is hoped Mrs. Harriman will locate in Medford. Mishop Scadding, who preached at St. Mark's Church this morning, is much interested in the movement. He said that Mrs. Harriman is a member of the Episcopal church and a generous woman, but only makes her donations after most careful consideration, assuring herself of the worthiness of the cause. The bishop had received a letter from the rector of the parish to which Mrs. Harriman belongs, with permission to make it

You may be interested in the facts "You may be interested in the facts of the innumerable appeals made to Mrs. E. H. Harriman and her effort in turn to make educational use of her mail. During the calendar year 1919. Mrs. Harriman had analysed 4050 appeals. Almost all of the writers assured her that they wished only a triffe- which totaled \$112,200,000. For 145 American schools and colleges, \$15,000,000 was requested and for 203 American churches \$554,000.

"Because Mrs. Harriman did not wish

American churches \$534,000.

"Because Mrs. Harriman did not wish any letter to go into the waste basket, which might be of service to herself, to other givers, to appealing agencies, or to public officials, she has had these letters carefully studied. Of late, pracinties carefully student to the steally all her letters have been directly answered in Mrs. Harriman's hehalf, noting her imbility to comply with these requests, stating briefly the nature of her study, and explaining why, in particular cases, it seems inex-pedient or even wrong for Mrs. Harri-man to aid partially and badly what local supporters or local givers should be taught to do completely and ef-

Heiently."

Hishop Scadding referred to the fact that Mrs. Harriman's Summer home was in Eastern Oregon and that owing to the location of the Reed Institute in Porland, the State University at Eugens, and the need for a university at Haker and the picturesque site at Pelican Lake, the progressive people of Medford would have to make out a very strong case to convince Mrs. Harriman. strong case to convince Mrs. Harrimas that this educational memorial should be piaced in Medford.

### DAM TO BE HEIGHTENED

Capacity of Baker Reservoir Will B Greatly Increased.

HAKER. Or., June 4.— (Special.)—
The Baker Irrigation Company is now engaged in increasing the present capacity of the reservoir, which will do away with any possible shortage of water, such as occurred in the unusually bot and dry weather of last season. Aiready over \$200,000 has been spent on the dam, reservoir and ditches, and the present work is only to facilitate the present storage ca-

rest. On top the dam measures soo feet, and at this time there is enough water stored to cover 1000 acres a foot in depth. When the company's plans are finally carried out the dam will be so feet in height, 60 feet wide on top, 2300 feet in length and 70 feet deep in the center.

"When we build a railroad we have our engineers go out and do the planning and construction work," said Mr.

## HOSPITAL PLANS FINISHED

Medford to Have New \$120,000 Structure by End of Year.

MEDFORD, June 4 .- (Special.) -- The contract for the erection of the new hospital in this city by the Sisters of Providence has been let and work will start at once. The contract price is \$125,000 and the building must be completed by December 1. When completed the institution will represent an investment of nearly \$200,000 and will be the finest institution of its kind in the state outside of Portland.

The business men of Medford domated the site to the sisters and the city furnished water. The site chosen was on the top of Noh Hill, overlooking the entire city, and cost the business men \$10,000. The building will be four stories in height and contain 100 rooms.

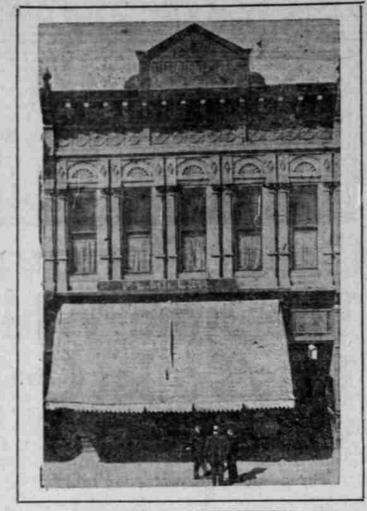

### MACADAM ROAD FAVORED

Polk County Surveyor Says Newport-Falls City Line Feasible.

NEWPORT, Or., June 4.—(Special)—At the meeting of the Newport Commercial Club last night Chunty Surveyor Beesley, of Polk County, said he heartly ap-proved of the proposed macadam read between Newport and Falls City, and that he would use his influence to have

ing the past manth is carloads of mining timbers have been shipped from this city to mines in Jackson and Amador counties. In California, the chief purchasers being the Argenaut mine, the Lincoln Concolidated and the Selis mine. These timbers were all 20 by 20 inches and 36 and 36 feet long. Oregon pine, In addition 20 carloads of standard railroad ties were shipped to the Amador Central Railway, which concerts the mines. tral Railway, which connects the mines with the Southern Pucific at lone. James Adkins, the milman, says that orders for mines tenbers are largely on the increase, and that many of the mines of Newada are now filling orders for immediate delibers. mediate delivery.

CORVALLIS PYTHIANS BUY MASONIC BUILDING FOR LODGE QUARTERS—MASONS PLAN TEMPLE.

NEW HOME OF KNIGHTS OF PYTHIAS.

CORVALLIS. Or., June 4-(Special)-The announcement that the CORVALLIS. Or., June 4.—(Special.)—The announcement that the Knights of Pythias are closing the deal by which they become the owners of the old Masonic building and secure a permanent lodge home of their own, calls attention to the fact that this order is in a flourishing condition. While the deal for the Masonic building is not yet fully consummated, negotiations have reached a stage where the completion of the transaction is practically assured. The Masons have the plans about completed for their new building to be erected at the corner of Third and Madison streets, and the Knights of Pythias have set June 5 as the date for the dedication of the present Masonic hall to their own use.

# **GRAY PLANS FARMS**

President of Hill Lines in Oregon Has Scheme.

ANALYZE

Establishment of Stations With State Aid to Specialize in Tillage Proposed by Railroad Man for Central Section.

stations throughout Central Oregon, as well as agricultural experimental This Spring the dam has been in-treased ten feet in height, a total of 45 feet. On top the dam measures 600 president of the kill lines in Oregon

> "When we build a railroad we have our engineers go out and do the planning and construction work," said Mr. Gray. "They are specialists in this branch of railroading. When they have made the road, the operating department takes it over and runs it; its members also are specialists. Neither one possibly could do the work of the other. And so it is with agricultural; at least so it should be. Too often the farmer goes to a new country, as Central Oregon, and starts cultivating the soil as he was accustomed to cultivate scil as he was accustomed to cultivate it back in Missouri or Minnesota. He entirely fails to take into consideration the fact that the soil of that particular section of Oregon which he happens to have acquired may be totally different from what he was accustomed to work back. Fast, and so may make a fail-

section of Oregon which he happens to have acquired may be totally different from what he was accustomed to work back East' and so may make a failure of his efforts, which would have been crowned with success if he had been started right.

"And there is where my proposed soil-analysis work comes in. It is the work of the agricultural engineering department. The farmers represent the operating department, which properly ca. only take hold after the way has been blazed out for them. I would like to see the state make an appropriation to conduct such a work. My idea is to have stations established at various places in the interior and throughout the state also, for that matter, where an expert with a properly equipped laboratory would always be on hand to snalyze soil specimens brought in by ranchers. By so doing he would be able to direct the farmers what to do with their soil, how best to cultivate it, what to plant and what not to plant, and aid them in a multitude of ways.

"Particularly would the proposed

Polk County, sale proposed many covered of the proposed many that he would use his influence to have that he would use his influence to have the road built as soon as possible.

The avid decided to take the matter up at ence with the County Court, and also instructed the secretary to secure the co-operation of the Falls City Commercial Club in presenting the proposition to the County Court of Fells County. Wr. Becaley said the road could be built with no grade excepting a per cent, and that there was pleanty of stone along the read for manadamizing.

Mr. Becaley is new running a survey for a manadam goad from Toledo to Newport.

There will be an effort made by the Hill lines to put into operation several agricultural experimental stations in Interior Oregon, according to President Gray. While it is possible that such may be started this Summer it is more may be started this Summer it is more

weather of the past few days has done much for alfalfa, wheat, oats and other crops, and ranchers are very optimistic, especially as there seems to be no possibility of any water shortage, as there was last year. In the Baker Valley the present outlook is very rowy. Ranchers were somewhat discouraged by the shortage of water last year, when the shows melted fast and went off in the Spring freshets in a very few days. This season, judging from the slowness with which the snow is melting in the mountains, the Powder River will furnish a bountful supply of water over the irrigation season.

gation season.
On the whole the outlook at present is such that bumper crops are confidently expected by every rancher and landowner in this vicinity. The prospect of having pleuty of water has created an optimistic spirit, which is shared not only by those engaged in agricultural pursuits, but by the business interests of the city.

The establishment of soil-analysis LA GRANDE, OR., SIGNS WITH WALLA WALLA CONTRACTOR.

> Streets Almost Impassable Because of Construction Paraphernalia Littering Pavement.

LA GRANDE, Or., June 4-(Special.)

LA GRANDE, Or., June t.—(Special.)—A contract calling for over seven and one-haif miles of sewer for this city has just been signed between the city and George H. Sutherland, the Walla Walla contractor. Construction is to be begun just as soon as material can be brought on the ground, which will be in about three weeks.

For the present La Grande's streets are almost impassable, because of contractors' paraphernalia littering streets. Cement walks are going in all over town, and with over two miles of hard-surface paving already laid, the Warren Construction Company is preparing for another contract, on Wassington and Elm streets. Sixth street has been completed

other contract, on Washington and Elim streets. Sixth street has been completed during the past few days and the work is switching to Washington, where nine blocks are to be paved.

A new brick structure is to be erected on Adams avenue between Fir and Greenwood streets, where a 8000 fire a few days ago raxed two frame structures. Clark Adams is to be the builder, though he has not announced details. igh he has not announced details, a expected that it will be a two-

Wilson, will be set in motion within a few days. It was to have started Wed-nesday morning, but the injuries which Mr. Wilson sustained in a collision with an automobile prevented early plans

McMinnville Has Four Strong Boxes in City Now.

POSTAL SAVINGS TO BE 5TH

Deposits in Institutions Place Yamhill Metropolis in Special Class. Wealth Indicates Agricultural Richness.

M'MINNVILLE, Or., June 4 .- (Special.)-With a population of less than 2000, according to the Federal census, and with a minimum of manufacturing

and with a minimum of manufacturing enterprises, McMinnville stands in a class by itself in wealth, as shown by its banks and bank deposits, thus indicating something of its rich agricultural environment.

Three National banks in this city carry deposits of more than \$1,000,000, representing nearly 50 per cent of the total deposits of the county, and this without the payment of interest on deposits. The First Trust & Savings Bank opened for business the first of this month. The Government has authorized the establishment of a Postal Savings Bank in McMinnville the latter part of the present month. Thus there will then be five banks doing business in this city, and the deposits will no doubt be correspondingly increased.

The banking situation in McMinnville is in a measure reflected in the county, as the establishment of a Postal Savings Bank here will make the 15th bank in Yashill County six of the ings Bank here will make the 15th bank in Yamhill County, six of the others being National banks. In addition to McMinnville's five, there are two at Newberg, two at Sheridan and one each at North Yamhili, Dayton, one each at North Yamhili, Dayton, Amity, Carlton, Willamina and Lafayette. While Yamhili County leads all others outside of Multnomah in the number of its banking institutions, if is equaled by only one other county in Oregon in having two second-class Postoffices.

## PEAR CROP TO BE HEAVY

Rogue River Valley Expects Record Yield in This Fruit.

MEDFORD, Or., June 4-(Special.)—
The Rogue River Valley will harvest
this year the largest pear crop in its
history, according to Professor O'Gara,
who has just completed an inspection
of all of the larger orchards in the
valley. The apple crop, however, will
only be about 8p per cent of last year's,
which was very heavy. There is no
trace of disease in the orchards of the
Rogue, the campaign against it being

irace of disease in the orchards of the Rogue, the campaign against it being successfully waged last year.

"Reports have reached my office," states Professor O'Gara, "that the pear crop in the valuey suffered through non-pollination of the trees. These reports led me to make a careful inspection of each and every orchard in the valley. I find that compared with last year, when a large crop was harvested, this year's production will be about 120 per cent based on 1919 production.

"The trees are all in excellent shape and there is no trace of disease anywhere in the valley. The apple crop, however, is not as beavy as usual."

Stegman, ploneer sheepman and wheat-raiser of Klickitat Valley, residing on the Lyle wagon road to Centerville, has within the last few years described. the Lyle wagon road to Centerville, has within the last few years devoted himself to a scientific growing of wheat for results. He has tried the different new varieties of wheat with various rether and of 16,000.31 acres. This land

He finds the most successful experi-ment last year was with a six-acre tract planted with six bushlis of Hybrid No. 6, obtained from the State College at Puliobtained from the State College at Full-man. Wash. From this six acres he threshed 25 bushels, or an average of 425-3 bushels per acro. Mr. Stegman says if the higher yield continues in the course of his experiments on different soils at different elevations, undoubtedly White No. 6 will be the coming wheat Hybrid No. 6 will be the coming wheat for the non-irrigated sections of Klicki-

### HERMISTON PAVES STREETS

Two BlocksAlready Completed and More Work to Be Done.

HERMISTON, June 4 .- (Special.)-Two blocks in this city have been ma-cadamized and more will receive at-tention at once. The streets already improved are the first in the city and

story affair.

Postmaster G. M. Richey is raising lieved 10 blocks, if not more, will reconstruction of his hig brick building at Depot and Washington streets, and hopes to have it finished by August I. With the Government building to be erected immediately after June 22, the city is expertencing a boom of buildings on its business streets.

More handsome cottages have been built this Summer than all of last Sumballi this Sumballi this Summer than all of last Sumballi the content of the content of the lock but four inches of rock were used at the curb and six inches in the center.

SETTLERS IN IDAHO BRING SUIT AGAINST DAM COMPANY.

Withholding Supply and Inconveniencing Users Are Charges Brought in Action.

BOISE, Idaho, June 4 .- (Special.)-Complaint over the supply of water on hand comes from the settlers under what is known as the Magic Dam, lo what is known as the Magic Dam, lo-cated in Eastern Idaho, which is used to store water in the Magic Reservoir for one of the projects of the Idaho Ir-rigation Company. It is alleged that the reservoir is full of water; that this is being held impounded behind the dam, while many settlers below the dam and on the Big and Little Wood rivers, from which they secure their teriestion supply are destrived of the

irrigation supply, are deprived of the water and their crops as a result are suffering.

The case will be given a hearing in the Supreme Court. The complaining settlers assert that the company cannot secure a deed to the water; that it can only secure title to the use of the water, and that whenever it falls to use it, it loses that right and the water may be filed upon by others. This the settlers say they propose

This the settlers say they propose to do.

Idaho is still doing a landoffice business. Up to April 11, 1911, there had been segregated by the state under the Carey Act a total of 1,176,393.07 acres. This, with the acreage represented by the applications still under consideration by the Department in Washington, runs the total well up towards 2,600,000 acres.

The total amount of land segregated by state patents has been received up to the present time for but 139, 204.60 acres, and these figures will give some idea of the tremendous amount of work still to be done by the officials of the state land department.

where in the valley. The apple crop, however, is not as heavy as usual."
