Nothing excites my anticipation more than the sight of the lofty buildings and the famed Niagara cataract and falls. My chiefest interest, however, will be in the study of our neighbors, who have wrought such wonders. When I set foot on American soil. I shall realize that the American people are the hest friends of Japan. The Japanese people feel this affection and look on America as their brilliant preceptor in National development. In the sober spirit of the realization of these important truths, I approach the United States.

Security Company Method to Be Abandoned if Government Requests.

BIG INTERESTS ENTWINED

Treasury Department Admits That Organization in Chicago Was Tacitly Approved - Readjustment May Be Necessary.

WASHINGTON, Aug. 3,-Attorney General Wickersham's report on his inquiry into the relations of the National City Bank of New York, with the recently organized National City Company was transmitted to Secretary

MacVeagh today.

It was learned today that the banking interests are prepared for an adverse decision by the Secretary of the Treasury and that a complete understanding with the Government will be reached without litigation. While the bankers in organizing the company acted with the advice of their lawyers, they are said to be willing to comply they are said to be willing to comply with any demands the Treasury De-partment might make.

Government Taken Unawares.

Secretary MacVeagh's decision will outline the Government's attitude to-ward concentration of control of National banks by the "security company" method. There is every indication that the Government's course will be laid out with the greatest deliberation. The whole question may be discussed by the Cabinet before public announcement is made.

That the security company idea has grown to National proportions was verified today by the inspection of lists of the National Bank stockholders on of the National Bank Scales of the Cur-rency. Government officials admit that they were unaware of the situation until the Attorney-General's investiga-tion of the National City Company brought it to light.

Chicago Deal Recognized.

The formation of the First Trust Company of Chicago, said to be the Chicago First National Bank's "secur-Chicago First National Bank's "security company." was approved by treasury officials, tacity at least, when James B. Forgan conceived it several years ago. This was admitted at the Treasury Department today. The organization of the first security company by the First National Bank of New York followed soon after.

Millions of dollars in National bank stocks are entwined in the organization of the three great holding corporations and the 300 or more smaller ones that have been discovered.

If Secretary MacVeagh acts upon Attorney-General Wickersham's findings,

torney-General Wickersham's findings, Treasury officials will share with the bankers the problem of disassociating

"security companies" from the banks.
One plan suggested proposes that the stock of the "security companies" be available to any purchaser. At present one must own stock in the bank which has formed the "security company," in order to hold stock in the latter company. In many instances the stock of the "security companies" had paid for cash dividends on bank stock and sale of the bank stock has carried with it the transfer of the "security company" stock.

Holdings May Be Illegal.

Attorney-General Wickersham is said to have held that such restrictions connect the "security companies" so closely with the banks as to make them

illegal.

His ruling is said to follow closely upon the lines of a decision of the Supreme Court, which Department of Justice officials say interpreted the National banking law to mean that each National bank shall be an integral unit and that none of its capital stock unit and that none of its capital stock shall be held directly or indirectly by another National bank or by any device created for that purpose.

If Secretary MacVeagh's decision is made upon the Attorney-General's findings, a readjustment of the holding of stocks of many of the greatest Na-tional banks of the country may be
