"LUMBER TRUST" QUIZZED

Federal Jury in Tacoma Believed to Be Making Inquiry.

TACOMA, Wash., Aug. 11.—(Special.)—Though Federal officers refuse to confirm or deny any rumor concerning the object and doings of the grand jury that convened here yesterday, there was a well-founded report here today that the real reason for the sudden session

stock food in which sawdust is one of the important ingredients. Further inquiry, however, showed that the account is true and that such a factory is not only in operation at Port Townsend, but that it is doing a large export business.

The process is a secret one brought from Germany. Mr. Simmons said the stock food did not go to the extreme of placing horses and cattle on a strictly wooden diet, but that molasses and sawdust were the principal ingredients used in preparing it. The factory is installed in a large cement building and carries an equipment of machinery that represents several thousand dollars.

Mr. Simmons comes to Portland as an emissary from the Port Townsend Commercial Club, to interest the local organization in obtaining a railway connection between the two cities. A 50-mile stretch between Shelton and Quilicura, Wash., will accomplish this purpose, and citizens of Port Townsend are eager to have the work undertaken.

The Portland Commercial Club has set August 29 as the date for a conference to be held here on the subject, between representatives of the commercial organizations of both cities. Port Townsend expects to send a large delegation of its most prominent business men. The meeting will be held in the convention hall of the club.
