#### U'REN'S PETITION **GETS TURN-DOWN**

Attorney - General Crawford Recommends Non-Filing of Single-Tax Plea.

EQUITY COURT TO DECIDE

Opinion Handed Down by Official Declares Petition Has No Legal Right to Place on Ballot-Secretary May Act Accordingly.

SALEM, Or., Sept. 15. - (Special.)-Declaring that countles have never been vested with legislative powers. like incorporated cities and towns, but like incorporated cities and towns, but have certain powers definitely defined by statute, and that in the matter of the county single-tax petition of Clackamass County no provision is made for county authorities, or other officers or tribunal, to provide the manner for exercising the power vested in the voters of the county, and that no rules or means for its exercise are provided in the constitution or by statute. Atterney-General Crawford today, in an opinion to Secretary Olcott, recommended that the U'Ren single-tax petition be not filed. This opinion is directly along the lines predicted by The Oregonian several weeks ago.

This means that U'Ren and the single-tax contingent will be compelled to show their hand in a court of equity before the next general election and fight out the question to the last tribunal of whether these single-tax petitions can go on the ballot.

Secretary Olcott has stated in a tentative way that in event the Attorney-General finds that the petition has no legal right to be filed he will hold it up pending judicial proceedings w. S. U'Ren, on the other hand, has stated that he will start mandamus proceedings immediately in an endeavor to force the Secretary to file the petition.

In the matter under consideration no proviation is made for the county authorities, or other officers, or tribunal, to provide the manner of energiating the power vested in the vocars of the county thereby, and no subset or means for its exercise are provided in the constitution or by statute.

For the foregoing reasons we are of the optulon that the petition should not be filed.

WASCO COUNTY GRAIN HIT

Unthreshed Crop May Be Total Loss Through Continued Rain.

DUFUR, Or. Sept. 15.—(Special.)—
That practically all the unthreshed grain in Wasco County is a total loss on account of the continued rains is now certain, according to wheat-raisers in the vicinity of the damaged crops. The largest losses will be on Tygh. Ridge, where a great amount of grain is yet unthreshed. The crop in this section of the county was the best that had been known in many years. The rain has now thoroughly scaked the stacks and the grain has already started to rot.

ed to rot.

It is estimated that the loss in this section of the county will amount to approximately \$30,000. Considerable grain in the sack is lying unprotected in the fields, but it will not be damaged to any great extent, as it has a better chance to dry than that in the stack. Much of the hay that has been recently baled and unprotected from the rain is ruined.

BOHEMIANS TO CELEBRATE

Malin Folk to Hold Revelry Commemorating Town's Birth.

KLAMATH FALLS, Or., Sept. 15.— (Special.)—Word comes from Malin, the new Bohemian town 38 miles south of here and near the California line, that these new settlere are gathering one

of the greatest exhibits of their farm products ever assembled in one exhibit in this county to be displayed at the coming fair. September 27 to 30, inclusive. In addition to the farm products the Bohemians are going to bring practically all of their school children, which number more than 75, to see the display and witness the sports.

These visitors and their exhibits are to remain with the fair association until the morning of the last day of the fair. Then they will be loaded onto wagons and taken back to their home town, where, Saturday night and Sunday, the thrifty Bohemian colony will have a general festal time on the occasion of the second anniversary of their settlement in their present homes.

The first of these new settlers came to Klamath in the Spring of 1903. They purchased a tract of land on the shores of Tule Lake consisting of several thousand acres, and the first year they were about 40 families strong. Since that time they have added more to their number until today they number about 100 working men and about 80 families. They have gone in for diversified farming, such as growing fruits and vegetables, chicken culture, dairying and growing alfalfa. All have
