PACIFIC NORTHWEST INDUSTRIAL GROWTH

MINES SHOW RALLY

Activity in Sumpter District Promises Big Output.

OLD WORKINGS PRODUCE

Installation of Big Dredger That Will Sift 7000 Cubic Yards of Gold-Bearing Gravel Daily to Be Made Soon.

SUMPTER, Or., Sept. 16.—(Special.)—Mining activities throughout the Sumpter district this Fall show a substantial increase over the past three or four years. Many properties that had been idle for years are now operating with prospect of becoming producers.

The Cracker Creek section, a few miles north of Sumpter, is attracting the greatest attention. This is largely owing to the recent sale of the North Pole mine by the Eastern Oregon Gold Mining Company to Albert Geiser, who represents a syndicate of Portland men. The North Pole mine during the years 1896 to 1908 was one of the largest producers in the state, and during that time turned out about 160,000 tons of ore from which approximately $2,500,000 in gold was recovered. Mr. Geiser, who has taken over the property, owned and developed the Bonanza mine southwest of here, which he sold a number of years ago to Pittsburg capitalists for $500,000.

The Buckeye mine, in this district, has a force of miners employed opening commercial ore bodies and will continue operations through the Winter. Work has been resumed also in the Zenith property, which is owned by Tampa, Fla., men.

The Columbia mine has been in continuous operation for 15 years and in that time has produced $3,000,000 in gold. It is understood the original investment of the owners of this mine was $60,000 and that the mine has paid dividends almost from the time of its purchase.

Rich Strike Reported.

South of the Columbia mine is the Golconda mine, that has been worked by three or four companies that were unable to make a success of it. Last Spring this mine was taken over by a Spokane syndicate from C. S. Jackson, of Portland, who held it as trustee. The shaft has been unwatered to the 800-foot level and it has been reported here that the tunnel on the 200 level has pierced a body of rich ore.

About 50 men are employed at the Ibex mine, where large development operations are under way. The main working tunnel now penetrates the mountain 2900 feet and commercial ore is being blocked out in the workings that will insure the installation of a large milling plant at this mine next season. The Mammoth mine, which in the early days of quartz mining in Eastern Oregon was looked upon as valuable, is also steadily operating, the owners having kept up continuous development work for more than a year past. This mine had been idle for many years, being considered as abandoned till taken over by the present management, who purchased the property in 1910.

Sulphide Shipments Large.

In the Greenhorn section the Ben Harrison mine is considered as one of the greatest mining developments of the year in this part of the state. But a few miles from the Ben Harrison is the Morning mine, which also is making good. Large shipments of sulphide ore are being made regularly from this property to the smelter.

The Red Boy mine, 18 miles west of Sumpter, ten years ago was one of the best-known gold properties in the Northwest, but in recent years it has been almost forgotten and its wonderful record for the production of gold became but a memory. The mine is now owned largely by Nebraska people who have been carrying on development work in the endeavor to find the ore bodies that were lost by the former management. The stamp mill is now operating night and day and regular shipments of concentrates are being made to the smelter. An extensive plan of sinking also is being inaugurated with a view of going down on the vein 500 feet. The result of this work will be watched by the district with interest.

The large pit for the reception of the dredger being built at Sumpter by the Keystone Dredging Company has been completed and all is now ready for building the big gold boat as soon as the material is on the ground. The erection of this plant will take several weeks before dredging can commence. This dredge is designed to wash 7000 cubic yards of the gold-bearing gravel every 24 hours. It will be built almost within the city limits of Sumpter, and the payroll that will result from its operation will be of benefit to the city.

NEW HIGHWAY IS POPULAR

Neal Creek Road Penetrates Upper Hood River Valley.

HOOD RIVER, Or., Sept. 16.—(Special.)—Although it has been opened to traffic for but two months, the Neal Creek road, following the Neal Creek Canyon from the Lower Hood Valley and penetrating the upper valley but a few miles north of the Mount Hood postoffice, has become the most popular highway connecting the two communities.

A roadway has followed the little stream for a number of years. However, it never received any attention and was almost impassable at times. The County Court ordered the highway opened last year. It was resurveyed and the grade re-established. Since the improvement a trotting grade is established between the upper and lower communities.

The two highways formerly most frequently used by the residents of the upper valley were the road over Booth Hill and that on the west side of the east fork of Hood River passing through the town of Dee. The former had such a heavy grade as to make it impossible to pull heavy loads over it, while in addition to a number of grades, the traveler passing over the latter met with bad stretches between Dee and Summit.

Since the Neal Gap road has been in use the auto stages have found it to be the most convenient route to the upper country.

Hops Nearly All Picked.

BROOKS, Or., Sept. 17.—(Special.)—Hops are nearly all picked in this section, but a few yards are unpicked and if the rain continues the hops will be ruined, as mold has appeared.

NORTHERN PACIFIC'S NEW WATER TANK AT LITTLE FALLS EXPLODES DAY AFTER COMPLETION

ONE-HUNDRED-THOUSAND-GALLON RESERVOIR WHICH WAS DESTROYED.

LITTLE FALLS, Wash., Sept. 17. — (Special.)—With a capacity of 100,000 gallons, the big water tank which the Northern Pacific road had just completed here, exploded Saturday with the sound of a dynamite blast. It was built of California redwood, the staves being three inches thick by eight inches and bound with steel straps three inches by six inches, and supported on railroad iron.

The tank had a six-inch overflow pipe to relieve it of over-pressure, and when the explosion occurred it hurled the timbers and bands for a distance of 150 feet in all directions. Had the accident happened in the daytime several people might have been hurt, as there were many persons around it all day Saturday admiring it, it having been completed on Friday.

BIG DITCH IS BEGUN

300,000 Acres to Be Watered in Klickitat and Benton.

OUTLAY TO BE $15,000,000

English Capital Behind Project That Will Build Canals, Tunnels and Small Feeders to Carry Fertility to Rich Lands.

HUSUM, Wash., Sept. 17.—(Special.)—"Now that active work has commenced on the Klickitat Irigation & Power Company's canal to irrigate the Horse Heaven country in Klickitat and Benton counties, one of the largest projects of the kind in the Northwest has been launched," said H. A. Smith, a prominent rancher of Southern Benton County, recently.

Mr. Smith owns a section of land in the Horse Heaven country which will come under the ditch. He has lived on his wheat ranch for the past 20 years. With water he says that country will produce abundant crops. The soil is volcanic ash extending to a depth of 50 feet, and contains everlasting qualities.

The management of the project announces that sufficient money has been secured from English capitalists to insure the completion of the canal within three years at a cost aggregating $15,000,000.

The main canal will be 122 miles in length, water to be taken from the head streams of the Big Klickitat River. Enormous reservoirs are to be built to contain 150,000 acre-feet of water and to otherwise conserve the water to provide 300,000 acre-feet. One of the storage reservoirs will be 26 feet in height and 675 feet long. Over 200 miles of laterals will be built, while 1000 miles of distributing laterals will be necessary to put all the 300,000 acres under water. There will be nearly five miles of tunnels, one of which will be 12,000 feet long.

It is estimated that the lands will support a population of 150,000 and will add $100,000,000 to the valuation of the state. While Eastern Klickitat County will derive a great benefit from the canal, the acreage to be covered with water will be the greatest in Benton County. Southeastern Yakima County comes in for a good share of lands to be irrigated by the same project.

Advice from Goldendale is to the effect that a crew of men recently left that point for the Cedar Valley country to establish locations for camps, where tunnel work is to be begun soon. L. M. Rice, of Seattle, is chief engineer of the Klickitat Irrigation & Power Company.

UMATILLA AUTOS ARE MANY

Motors Popular with Farmers of County—400 in Use.

PENDLETON, Or., Sept. 17.—(Special.)—Though commonly termed a sparsely settled section it is doubtful if any other county in the state can point to so great and rapid development of the automobile industry as Umatilla.

Although the farmers were slow to take up with automobiles at first, the machines have rapidly sprung into favor on the farm in the last two years and at present by far the greatest number of owners are growers of grain. It is estimated that more than 400 machines are now owned in a county the largest town of which boasts a population of a little more than 5,000.

It is also especially true of farmer autoists as a class that the larger cars are the most popular. The best seems to be none too good for the growers of grain in this section of the state. Their machinery, their horses, and every part of their farm equipment is the best that money can buy. Thus it happens that when a tiller of the soil comes to purchase a car he does not stop at the price but picks out the car that seems to him to be the best fitted for his purpose. The one thing he is particular about is to get the power necessary to take him up the hills and over the roads.

The development of automobiling has also resulted in the development of better roads. A Good Roads Association, composed almost exclusively of automobile owners was organized two years ago and has done much to obtain improvement of the county's highways. Macadam roads have been constructed where this was possible, straw has been used to great advantage in the Summer, permanent bridges have been built and steps have been taken to make all future road improvements permanent instead of temporary.

GRAIN CROPS BUMPER

WILLAMETTE VALLEY FARMERS REALIZING IRRIGATION'S AID.

Double Amount of Return Given to Farming Community Well Watered During Dry Season.

COTTAGE GROVE, Or., Sept. 17.—(Special.)—The conditions in Cottage Grove and vicinity were never better than they are this year. The grain crops are all harvested and nearly all the threshing done. The yield is good. The hay crop was never better.

There has been a large immigration to this territory in the past year, that has caused many large tracts of land to be cut up into smaller tracts, and the result is that fourfold more has been raised on the same land than before. The farmers are just beginning to realize that with irrigation, even in the Willamette Valley, more than twice the crops can be grown on the same land with water during the dry season.

Last season three farmers, Currin, Stocks and Spray, put in an irrigation ditch three miles long, running through their farms, that covers about 800 acres of good farming land. Stewart & Porter Bros. have put in a ditch this season that covers 300 acres on Mosby Creek and have set out a large tract of this land to apples and pears. At Lorane, 12 miles west of here, the Churchill-Matthews Company and the Milwaukee Orchard Company have set out over 1400 acres of apples and pears. Many smaller orchards of from 10 to 80 acres have been planted here in the past three years.

Cottage Grove is an important point along the Southern Pacific system. It enjoys terminal rates on its exports of lumber and in all the important matters of passenger transportation is accorded distinct advantage.

The mining industry has aroused considerable interest this Summer on account of the rich ores that have been discovered in the West Coast properties.

There are 21 lumber mills tributary to Cottage Grove, a score of which are within 12 miles of town. The employes of these mills trade in town and the monthly payroll exceeds $50,000. Timber experts estimate that there is 18,000,000,000 feet of standing timber tributary to Cottage Grove, and at $7.50 per thousand for logging and milling expenses, paid to labor, will involve an expenditure of $135,500,000 and will take 50 years to move it.

ALBANY GOES AHEAD

Business District Gets Many New Buildings.

HOTEL NEARS COMPLETION

St. Francis Has Four Stories and Basement—First Presbyterians Start Construction of Edifice Costing $25,000.

ALBANY, Or., Sept. 17.—(Special.)—Work on the new St. Francis Hotel, which is Albany's first four-story hotel and the first brick hostelry in the business district of the city, is nearing completion. The brick work is almost finished and the work of lathing and plastering the lower stories is progressing. This building, which is constructed of pressed brick, will probably be ready for occupancy by the first of the year.

For many years Albany people have wished for a big brick hotel in the business district and there has been considerable talk during the last two years of forming a stock company to erect such a structure. In realizing this hope the city was given a gratifying surprise, for E. H. Rhodes, a local capitalist, who is building the St. Francis, did not announce his plans until two stories of the building, which stands at First and Ferry streets, were almost completed.

Elevator to Be Installed.

It is purposed to install an electric elevator in the building and equip it as a modern hostelry in every respect. With a full-story basement, the building will have five stories for hotel purposes.

Building is now more active in the business district here than for many years. At the corner of Second and Broadalbin streets two two-story structures, built of white pressed brick and stone, are rising rapidly. One is being erected by S. E. Young & Son and the other by the First Savings Bank. The former covers an entire quarter-block and both will be among Albany's most substantial and attractive blocks.

As soon as work on the new Young Block is finished and the present store moved into it, work will begin on the new First National Bank Building, which will rise on the present site of the Young store at the corner of First and Broadalbin streets. It is proposed to make this building five stories high.

Masonic Temple Repaired.

Extensive repairs are also being made on the Masonic Temple here and a new addition added. A second story is being placed on a one-story building adjoining the present temple, and both will be joined together and a new, attractive front placed on the entire structure, making it one of the best lodge halls in the state and one of Albany's best-appearing buildings.

Besides these large buildings, several smaller structures have been built in the business district this Summer, one of the best of which is the new two-story Craft-Miller Block, at the corner of Second and Ferry streets, which is built of white pressed brick.

Word has been received here that bids will be called for before the end of September for the construction of Albany's Federal Building, at Second and Broadalbin streets, and it is expected that the ground will be cleared before the end of the year, so that work will begin as early as possible next Spring.

Presbyterians to Build.

The old First Presbyterian Church is now being moved from its site at Fifth and Broadalbin streets and work will begin at once on a $25,000 stone church on this site. This will be Albany's first stone church and one of the finest church buildings in the state.

The ground has also been cleared on the site of Albany's Carnegie Library, at Third and Ferry streets, and work will begin probably early next Spring. Plans for this building are now being prepared.

HOPS SELL AT 32 CENTS

Cluster Variety Bought by Dealers at Aurora, Oregon.

AURORA, Or., Sept. 17.—(Special.)—Three more sales of cluster hops were reported here Saturday as follows: Gustave Henke, of Aurora, 35 bales at 32 cents; H. Blorser, Aurora, 40 bales at 32 cents; and Martin Adams, of Silverton, 80 bales at 32 cents. All lots were bought by Mishler & Gribble of this city. The sales were made before the hops were baled. Cluster hops have thus opened at a price equal to fuggles, while last year the first cluster sales were made 4 cents lower than the earlier variety.

Mishler & Gribble are now loading a second car, having shipped the first car of Oregon hops early in the week. No other dealers have yet shipped any hops.

POWER COMPANY EXTENDS

Pacific Company to Improve Plant Purchased at Goldendale.

GOLDENDALE, Wash., Sept. 17.—(Special.)—The Pacific Light & Power Company, which recently purchased the local power plant here, was granted a franchise by the county commissioners at their last regular session to erect a power line from this place to Centerville, seven miles west of this city.

Manager Nailer, of the power company, said that the work would be begun at once on the line, which will cost about $7000.

In the three months the Pacific Company has been operating in this city it has reduced the cost of light nearly 15 per cent and the company is preparing to make extensive improvements to the plant.

HOGS YIELD BIG PROFIT

Investment of $10 Returns $700 in Three Years at Pullman.

PULLMAN, Wash., Sept. 17.—(Special.)—Seven hundred dollars of profit from an investment of ten dollars in a sow and pigs three years ago is the record of a Palouse rancher living near Pullman. F. M. Slagle, president of the Pullman Chamber of Commerce, makes the report. The debit account is as follows:

March 22, 1909, one sow and pigs, $10; June 10, one Duroc Jersey boar, $10; December 15, $18. From April 1 to December 1 the sow and pigs were allowed to run in a pasture of alfalfa, clover, and in a summerfallow pasture containing strawstacks. No debit is made for this item. Commencing with 1910, debit items are:

January 12, ground wheat, $6; February 12, one Duroc Jersey boar, $18; March 10, ground wheat, $12.25; March 31, corn, $8.60; December 15, wheat, $22.10; March 31, 1911, wheat, $50; total debit, $152.05. The credit items are:

September 11, 1909, 200 pounds of dressed port at 10 cents, $20; September 24, 1910, 15 pigs at 9 cents, $205.20; November 21, six hogs at 8½ cents, $131.75; January 31, 193 pounds dressed pork at 10 cents, $19.30; March 25, 1000 pounds dressed at 12½ cents, $125; March 25, 240 pounds of lard at 15 cents, $36; March 31, three pig sows, $99; March 31, 21 shoats, $216; total, $852.25; profit in three years, $700.20.

Winlock's Expense $5509.

WINLOCK, Wash., Sept. 17.—(Special.)—The City Council of Winlock has prepared an estimate of the city's expenses for the ensuing year. The estimate totals $5509 and includes $2000 for streets and bridges, $600 for lighting, $1625 for salaries of officers, $100 for printing, and the balance for miscellaneous expenses. To meet this expense it is estimated that $2700 will be realized from saloon licenses, $100 from minor licneses, and $60 from fines. This leaves $2659 to be raised by taxation of real and personal property.

Pacific County Secures Prizes.

RAYMOND, Wash., Sept. 17.—(Special.)—Pacific County secured permiums at the Southwest Washington Fair as follows: First on Shadeland Wonder sheaf oats; second on sheaf Winter oats; first on Alsike clover; first on Marapole peas; first on cluster Seedling Green Gage plums; first for Golden Wax beans, first for Winter beans; first on Oregon ever-bearing strawberries; first on Berkshire boar; first on Chester White sow; grand championship over all breeds on sow; second on yearling Holstein bull.

"606"

Now Given in Portland

I CONFINE MY PRACTICE TO MEN ONLY

A. G. SMITH, M. D.

PROF. DR. EHRLICH'S WONDERFUL DISCOVERY

Indicated in the Worst Form of Blood Ailments, Eruptions, Sores, Ulcers, etc.; Also in Threatened and Early Paralysis, Epilepsy, Psoriasis, etc.

All other treatments for Ailments of the Blood have been slow, haphazard, and never positive, often bringing about conditions worse than the original ailments. "606" acts immediately. It is administered only once, and the symptoms begin to disappear within 12 hours. Dr. Julius L. Metzler, of the John D. Rockefeller Institute, says: "Only scientific men can imagine what a marvelous discovery this is. It is beyond belief what it will do." "606" (also known as SALVARSAN) was discovered by Prof. Ehrlich, of Frankfort, A. M., physician to the German Emperor, after six hundred and five other experiments—hence given the name "606."

I have personally administered this new remedy and know its power. I have a full supply of "606" on hand made in the German laboratories, and imported in the original tubes. I make all required blood tests, and am thoroughly conversant with the technique of preparing and administering the treatment, which I will gladly explain to all interested.

A. G. SMITH, M. D.

284½ MORRISON ST., CORNER SECOND, PORTLAND, OR.

HEALTHY MOTHERS

Women who bear children and remain healthy are those who prepare their systems in advance of baby's coming. Unless the mother aids nature in its pre-natal work the crisis finds her system unequal to the demands made upon it, and she is often left with weakened health or chronic ailments. No remedy is so truly a help to nature as Mother's Friend, and no expectant mother should fail to use it. It relieves the pain and discomfort caused by the strain on the ligaments, makes pliant and elastic those fibres and muscles which nature is expanding, prevents numbness of limbs, and soothes the inflammation of breast glands. The system being thus prepared by Mother's Friend dispels the fear that the crisis may not be safely met. Mother's Friend assures a speedy and complete recovery for the mother, and she is left a healthy woman to enjoy the rearing of her child. Mother's Friend is sold at drug stores. Write for our free book for expectant mothers which contains much valuable information, and many suggestions of a helpful nature.

MOTHER'S FRIEND

BRADFIELD REGULATOR CO., Atlanta, Ga.

Don't Be Bald

Almost Anyone May Secure a Splendid Growth of Hair

You can easily find out yourself if your hair needs nourishment, if it is thinning, getting dry, harsh and brittle, or splitting at the ends. You simply have to pull a hair from the top of your head and closely examine its root. If the bulb is plump and rosy it is all right; if it is white and shrunken your hair is diseased and needs nourishment.

We have a remedy for hair troubles that cannot be surpassed. It has a record of growing hair and curing baldness in 93 out of 100 cases where used according to directions for a reasonable length of time. It will even grow hair on bald heads, if the scalp is not glazed and shiny. That may seem like a strong statement—it is, and we mean it to be, and no one should doubt it until they have put our claims to an actual test.

We are so sure that Rexall "93" Hair Tonic will completely eradicate dandruff, prevent baldness, stimulate the scalp and hair roots, stop falling hair and grow new hair, that we personally give our positive guarantee to refund every penny paid us for Rexall "93" Hair Tonic in every instance where it does not do as we claim or fails to give entire satisfaction to the user.

Rexall "93" Hair Tonic is as pleasant to use as clear spring water. It is perfumed with a pleasant odor, and does not grease or gum the hair. We have it in two sizes, prices 50 cents and $1.00. We urge you to try Rexall "93" Hair Tonic on our recommendation and with our guarantee back of it. You certainly take no risk. Remember, you can obtain Rexall Remedies in Portland only at The Owl Drug Co., Cor. 7th and Washington Sts.

THE

DR. GREEN

METHOD MEANS

CERTAIN CURE

We cure quickly and permanently all curable cases of VARICOSE VEINS without severe surgical operations; SPECIFIC BLOOD POISON without injurious drugs; (606 skillfully administered if preferred); NERVO-VITAL DEBILITY without stimulative remedies; BLADDER and KIDNEY troubles; PILES and all RECTAL ailments of men.

YOUR PROTECTION

Our offer — PAY WHEN SATISFIED—is your absolute protection. Consultation, examination and diagnosis is free. What you want is a cure. Come to us and get it. Once under our treatment, you will quickly realize how simple a thing it is to get well in the hands of a specialist who knows his business. Our cures add not only years to life, but life to years. Office hours—8 to 8 daily, 9 to 8. Evenings, 7 to 8. Sundays, 10 to 1.

OUR CURES

Are effected by the use of roots and herbs. No operations, no poisonous drugs. We have made a life study in this line and you will receive the benefit of our research. Men and women cured of private ailments. Nervousness, rheumatism, asthma, pneumonia, blood poison, lung trouble and diseases of all kinds. Consultation FREE.

THE HING WO CHINESE MEDICINE CO., 185½ Morrison St., Portland, Or.

The Specialist Against The Quack.

C.K. Holsman, M.D.

The true specialist possesses the experience of years — the right kind of experience — doing the same thing the right way hundreds and perhaps thousands of times, with unfailing and permanent results. His experience has taught him just what to do and when to do it. There is no guesswork, no experiment, hence no failure. He does not have to resort to fake methods. His scientific knowledge has made him the master. The quack experience is based on everlasting misrepresentation—upon doing the same thing wrong as many times as the unsuspecting will permit. He is ever experimenting upon the patient—if one thing fails he tries another, and keeps on changing until the patient despairs and leaves. He is ever ready to promise anything and everything. He drugs the system with powerful medicines, just to obtain temporary results. He is here today and gone tomorrow. He has as many names as fingers and toes. He constantly apes the specialist. He is a wolf in lamb's clothes. Beware of him.

I am the only **expert** specialist in Portland who owns his own office and equipment, advertises his full and correct name, publishes his recent and true photograph and personally conducts his office. I make this statement so that you will know when you come to my office no deceit will be practiced. I meet you as man to man, open and above board. I want you to always keep before you the fact that I am trying to drive medical humbug and quackery out of Oregon.

I am the oldest licensed specialist in Portland—18 years' experience—yet I am not a magician—I do not work magic. I do not offer 1-minute or 5-day impossible cures. I do not make false promises. I cannot cure every disease under the sun, nor every case included in the diseases I treat, for some of them are incurable, and the sooner the patient learns the truth the happier he will be. I simply apply the scientific knowledge my years of experience have given me, and I do this honestly and faithfully. I never accept a case for treatment until I have made a thorough examination, and then only when I am satisfied I can effect a permanent cure. This is your best guarantee. If you wish my services they are yours at a fair and reasonable fee, which every sensible man expects and is glad to pay. You cannot get anything of value for nothing, and the sooner you wake up to this fact and regard the doctor who offers it to you with suspicion the happier you will be and the more money you will save. I offer you the services of the best doctor at a fair price and you will everlastingly thank me for the permanent cure received at my hands. My office is the largest and best equipped on the Pacific coast.

HYDROCELE—VARICOSE VEINS.

I do not draw off the fluid, which is only temporary, nor resort to the vicious practice of injecting painful drugs, as many quacks do, nor do I tie off the veins and destroy the vitality. My method is direct and positive. No loss of time, no pain, no humbug, but an absolute guarantee of a radical and permanent cure.

WEAKNESS.

Mentally strong, but vitally weak is the sad condition of many men who, eager to have their strength restored, become easy victims to the quacks who promise to make young men out of old and decrepit ones, and who, for the consideration of a few miserable dollars, offer to find the fountain of youth for the aged and helpless. You take the quack's promise, he takes your money. That's all you get—no result—just his promise. A fool and his money are soon parted. Why play the fool forever? There are many distinct local conditions and causes of weakness. It cannot be cured by internal medicine, but by local treatment only. The cause must first be determined and until this is done, no cure can be effected by local or any other treatment. I do not use a single dose of internal medicine, and yet, without it, I absolutely and permanently restore complete vitality in every case I accept for treatment, which is the best evidence of the truth of my contention. MY TREATMENT MAKES MEN STRONG. It is unfailing and absolute. It is painless and permanent, and given under my absolute guarantee. The quacks who cure you as I do, begin drugging with powerful stimulants, just as soon as they succeed in separating you from your money. I can do no more than caution you against them.

BLOOD POISON.

Quacks reap a harvest by pretending that every little rash, skin eruption or pimple is a symptom of blood poison. The Wassermann blood test tells you whether or not you have the disease. The doctor may lie, but the test never does. This test is yours at my office for the asking. I use the new German Remedy and introduce it directly into the blood. From my experience with it I am prepared to say it is no longer an experiment but a positive cure and a blessing to mankind. It is the salvation of the human race. My equipment for the proper administration of this remedy is the finest in Oregon and second to none in the United States. You are quite welcome to bring your family doctor with you and I will be pleased to have him present during your treatment.

I also treat all diseases of men, including obstructions, Bladder, Kidney and Prostatic disease. My treatment for Piles and Fistula is absolutely painless, does not detain you from your work or home and a permanent cure is effected without the aid of a knife.

You Are Always Welcome to Consultation and Examination.

My office is open all day from 9 A. M. to 8 P. M. Sundays from 10 to 12. All correspondence treated confidentially. Letters cheerfully answered.

SIGN THIS COUPON FOR VALUABLE INFORMATION FREE.

Please send me free your self-examination blank, "For Men," as I desire to describe my case to you for the purpose of taking treatment, if I decide you can cure me and your charge is low enough to suit me.
