

"From the Sheep's Back to Your Back and No Cotton Added in the Making"

This Woolen Goods Sale Gives Opportunity for Great Savings

October is a big month in the Brownsville Woolen Mill Stores. It's the time we distribute the big bargains of the year. The three woolen mills behind these stores tell us to go the limit in the way of cutting prices and boosting Oregon goods. It gives them the chance to clean up all small lots of goods and lines that are to be discontinued. It gives the people who support the stores the opportunity of laying in just at the right time their Winter supply of woolen goods at a substantial saving in price. The item of blanket seconds alone means a big thing. This year on account of more blankets than usual being made there was a corresponding increase in seconds. Some of them may be only an inch or two short in size or the border may be woven in wrong or a stitch dropped in the weaving. No matter what the cause they will wear just as well—and they are being sold at just half price.

This sheep is one of the many thousands that roam the hills and valleys in Oregon and furnish wool from which the woolen goods are made that we list below at special low prices.

Blankets Washed
Customers of this store who have purchased Brownsville Blankets may bring them in up until October 15th, at which time we will send them all together to the mill to be WASHED. We only do this once each year for the accommodation of our customers. The mill makes a charge of 50 cents per pair, which about covers the actual cost. Remember, this is the only time during the year that our mill will bother with the washing of Blankets.

A speedy disposition of those on hand is desired, hence we have grouped the entire lot on a separate table, where you can help yourself, as long as they last, at this mammoth reduction. Values up to \$2.00 for only, the garment. 95c

BLANKET SECONDS GO FOR HALF PRICE

There's nothing wrong with Blanket "seconds" as far as durability goes. During the season's "run" at the mill, every pair that is not entirely perfect is laid aside as a "second." The reason may be only a slight defect in color, or perhaps the border woven in wrong or a few stitches dropped in the weaving.

A great saving opportunity during this sale, for all of these Blankets go AT HALF PRICE.

SANDY WORKS FOR LINE

Mount Hood Road May Enter Town in Ten Months.

The Mount Hood Railway & Power Company will build to Sandy from the present end of the line within ten months if the company obtain rights of way on reasonable terms. R. E. Eason, secretary of the Sandy Commercial Club, said:

"We have assurances that the Mount Hood Railway Company will build into Sandy if the Sandy Commercial Club can so arrange with land owners along the line that the company will not be held up on the price of the right of way."

The Commercial Club has a committee working to facilitate the purchase

of rights of way and has had considerable encouragement from the land owners.

A representative of the company has met with the club twice, and the club's committee has met with the company three times in Portland. The outlook is favorable that the railroad will build into Sandy within ten months.

Farmers and residents of Cottrell and others living in the territory through which the extension is projected to pass are assisting in obtaining rights of way.

Concern operating dock and ample ground with trackage would like to figure with parties requiring these facilities. A. J. 492, Oregonian.

CRANBERRY BOGS BECKON

Washington Man to Study East to Spread Culture Here.

H. E. Deputy, of Long Beach, Wash., will call at the Portland Commercial Club Thursday to receive credentials before starting East to study the methods of cranberry culture in various places on the Atlantic Coast. The results of his findings will be placed at the disposal of the agriculturists of Oregon and Washington when he returns.

Mr. Deputy believes that the cranberry industry can be carried on with profit all along the coasts of the two Northwestern states, where there are long tide marshes, and thinks that his trip may result in the development of

a new and valuable agricultural industry in the West.

He will take with him credentials from the important commercial organizations of both Oregon and Washington and intends that both states shall share alike the benefit of his research.

MEN BETTER, SAYS PARSON

Dr. A. A. Morrison and Three Others Address Rotary Club.

As guests before the Rotary Club at its weekly luncheon yesterday, Rev. A. A. Morrison and Professor Robert Krohn spoke on "A Sound Mind in a Sound Body," declaring these to be the two chief essentials to good citizenship. Dr. Morrison said he believed that the human race was gradually passing from evolution to evolution, and steadily approaching more and more nearly to physical and mental perfection. Professor Krohn, touching on the practical side of the subject, declared that business men, if they followed a strict regimen of physical care and culture, would find their working

capacity would be doubled and their ability to enjoy life multiplied immeasurably.

The addresses of Dr. Morrison and Professor Krohn were followed by a review of the Burns-Bend excursion by Marshall N. Dana, and a speech by E. S. Josselyn, president of the Portland Railway, Light & Power Company, explaining the intent of the law proposed for bonding shippers to the railway companies.

The luncheon was presided over by H. E. Judge.
