#### Secon Upholds Fine.

Waldsmar Seton, who recently lost cuffbuttons and other articles by this estimates and other articles by this was work in pawnshops, took the floor in defense of pawnshops, took the floor in defense of the recommendation for the fine. He said Ferretia was known to Polloeman Gill as a business man; that Ferretia rode home on the same car with Gill and that Gill, in his opinion, used poor judgment and no discretion in placing Ferretia under arrest. Placing hand-cufts on Ferretia, said Mr. Seion, was unjustifiable, in the circumstances, and he criticized the polloeman. '

injustifiable, in the circumstances, and ho criticized the policeman. ' Mr. Seton further explained that the evidence before the committee showed that the policeman, after arresting Ferretta for being drunk, and after, handcuffing him, finally placed against him a charge of being out "after hours." Mr. Beton said he felt that the fine of \$50 was none too much; that it chould serve not only as a lesson to Polleman Gill, but to every member of the department, not to freat cillsons with so much disrespect and ill-usage.

#### Fitzgerald Decries Arrest.

Mr. Fitzgerald, the other member of the police committee, said that he bo-lieved the evidence warranted the fine of \$50.

"Mr. Coffer sars that, if this fine is imposed, there will be no further arreats," said Mr. Fitzgerald. "Well, i sincerely hope there will be no more ar-rests like this one, where a business man is handcuffed, walked a mile or so to a patrol box, and then sent to headquarters as a drunk. I don't want to see such arrests as this, and I cer-tainly hope that this board will adopt the majority report of the committee and thus administer a lesson to the police." M. J. County will hold an institute here Sat-urday, October 31, at the new 130,000 Barrett schoolhouse, which will be formally dedicated on the occasion The new structure, one of the finest school buildings in the county, is two stories in height and built of brick. It is equipped with all modern conveni-ences, such as electric lighting and steam heat. Prominent educators from different parts of the state will attend. It is expected that delegates from the Oregon Agricultural College and the Monmouth Normal School will be pres-ent.

From the present attitude of the of-ficials and teachers of Hood River County, the annual institute of next year will not be held jointly with Wasco and Sherman counties, as has been the past custom. "Much of the work at the average institute," anys E. E. Coad, superintendent of city achools, "is arranged for the teacher who has little or "no training. The teachers of Hood Hiver County, with but faw exceptions, are well trained, and thus are not benefitted much by the institute. They feel that they can profit more by securing instructors, who will assist them on the points in which they are deficient." From the present attitude of the of-

Numerous letters and telegrams were received yesterday by Dr. Ellot. The following letter was received by the reception committee from Mrs. Eva Emery Dyc. of Oregon City: "I have an anecdote about Dr. Ellot that ought to be told. In the Spring of 1901, when I was in St. Louis mak-ing certain investigationi, it was my pleasure to become a guest in the house of John O'Fallon Ciark, s grand-son of Captain Ciark, of the Lewis and Ciark exploration party, and of his

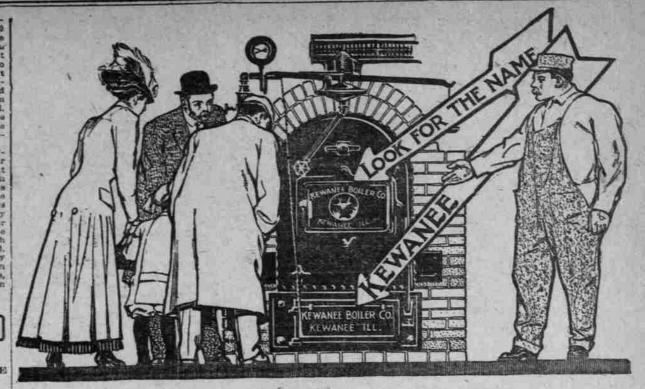

son of Captain Clark, of the Lewis and Clark exploration party, and of his wife, a granddaughter of Augusts Chauteau, the founder of St. Louis. At d'nner one day Mr. Clark exclaimed: Wife, I saw Tom Ellot today, and for all the world I thought it was his father. Then turning to ma: 'Mrs. Dye, for 40 years Tom Ellot's father was the greatest man in St. Louis. He prac-tically ran every good thing in the elity.' 'Indeed,' I responded, 'then the son is exactly like his father, for he practically runs every good thing in Portland.' Happy the clip that can claim such a man!' R. # **Kewanee Steel Boilers** Keep your eye peeled for the word "Kewanee"

when you are looking for a heating boiler for your new building. It means as much on a heating boiler as "U.S." means on a bond. If you don't find the name, don't buy the boiler. If you do find it, you are in the presence of the best heating boiler in the world—the boiler that has made 90 solid miles of Chicago flat buildings permanently rentable and permanently comfortable-the boiler that keeps warm and happy and healthy 200,000 of Chicago's 300,000 school children. If you allow yourself to be misled by some boiler that *looks the the Kewanee but init one*, your fire-pot won't be big enough to burn the disgust that will overtake you later on when the cold days come. Several boiler makers have succeeded in imitating the *shape* of the Kewanee Firebox boiler, but the successful initation *ends right* there. So keep your eyes open. Look for the name "Kewanee" on the fire-door and again on the ashpit door. If it is there used it stop to ask questions, for the heiler well and again on the ash-pit door. If it is there, you needn't stop to ask questions, for the beiler will answer everything. We've been making it for 30 years and the ones we made 30 years ago are working today and giving supreme satisfaction. We love this old boiler like an engineer loves his engine, and every time we pass one we feel like patting it on the back and saying: "Good old boy! You're the goods 365 days in the year! They might make one that looks like you, but to save their souls they can't make one that is like There is only one way to make a genuinely good and honest boiler that will last a lifetime, make you." your building thoroughly comfortable, burn cheap fuel economically, keep going when other boilers are down and out, and make a joke of your repair bill. We discovered the way years ago and we're sticking to it like the wise old shoemaker sticks to his last. Hence, every Kewanee boiler is as good as the one before it and as good as the one behind it. And we repeat that the word "Kewanee" on a heating boiler means as much as "U. S." on a bond. You can bank onit and hypothecate it! It's an asset, and never a habitity!

> Send for Catalog . It tells all about the boiler, not in sickening detail, but in plain Anglo-Saxon, so that he who runs may read.
