

MRS. MINNABAL ASKS SEPARATION

Compact With Burns Agency for Immunity Charged in Divorce Action.

REPEATED CRUELTY TOLD

Wife Declares Principal McNamara Witness Was to Receive Large Share of Money Offered for Prisoners' Conviction.

CHICAGO, Oct. 15.—(Special.)—In a bill for divorce filed Thursday in Cook County Court against Orla E. McNamara, alleged dynamite maker, whose confession led to the arrest of the McNamara brothers, now on trial in Los Angeles, charged with having blown up the Times building, his wife, Mrs. Emma McNamara, makes sensational charges against the William J. Burns Detective Agency and the officers representing the McNamara family.

The bill was filed by Clarence S. Darrow, now the chief counsel for the defense in the McNamara case, and is an affidavit in the divorce case. It is believed that the McNamara case is being used as a means of securing evidence for the defense in the McNamara case.

larger portion of the New Testament, where it is philosophically used for practical purposes and applied to practical problems.

To specify more in detail: Genesis contains the primitive traditions of this people, rewritten by an unknown prophet, probably as an introduction to the collection; the next four books are a collection of the laws of this people as they were gradually formed during a period of centuries of their national life; the books of history which follow are a compilation from pre-existing materials, and it is possible now to distinguish to some extent these materials—the difference between two chapters in the compilation coming out clearly in the parallel but independent narratives of Kings and Chronicles; Job is what Professor Genesis has called a collection of religious hymns, some of which were used in the temple service, others in the domestic service of private devotion; Proverbs and Ecclesiastes are books of ethical culture, which almost entirely ignore both the historical and the ecclesiastical institutions of the people; the Song of Songs is a love drama, one of the earliest as it is one of the most beautiful in the world's literature, and the prophetic books which follow are collections of addresses which may be compared to the political addresses of the modern states, and the modern practical sermons of the modern practical preachers.

The New Testament contains four biographies of Jesus of Nazareth, largely compiled from previous oral and documentary material; a history of the beginning of the apostolic church; letters from the apostles to the infant churches; and a book of dream literature written to encourage faith and hope in the church in a period of trial. But they are all from the first chapter of Genesis to the last chapter of Revelation, records of human experiences. They are written not by amanuenses recording at dictation something which they could not have learned except by miraculous information, but by men of like passions as we ourselves, who have seen and felt, and write down that their readers may see and feel the same life truths. The Bible is a book of characteristically human experiences.

RODGERS FLIES IN DARK

AVIATOR COVERS 189 MILES TO VINITA, OKLA.

Trans-Continental Voyager, Dares At Despite Night—Wind Is Favorable for Flight.

VINITA, Okla., Oct. 15.—(Special.)—Fighting in the dark at a height of several hundred feet, Aviator Rodgers braved the elements at 8:45 tonight. Like a great bat the machine soared above the town, barely visible to the hundreds of spectators who crowded the streets to witness the coming of the trans-continental aviator.

Rodgers was delayed by a forced landing at Russell Creek. He covered 189 miles from Kansas City. He will remain here tonight.

The exhaust of the motor told of Rodgers' coming long before his machine appeared dimly outlined against the sky. There was little wind, and Rodgers left Kansas City, Mo., five minutes before noon today, resuming his flight, which he had delayed yesterday, because of a strong wind.

At Moran, Kans., Rodgers landed and took on a supply of gasoline. He covered the 25 miles from Kansas City to Moran in two hours and 10 minutes. The aviator passed Parsons, Kan., at 4:30 this afternoon.

Crows Have Thirst Party. Whistled Cor. New York World.

William Olex, of Colebrook, has a large flock of crows which has been ravaged for months by crows. Mr. Olex says that the crows are very much. Searching his brain for a plan to end the unwelcome attentions of the crows, he came upon this idea: He would supply the crows with water, and place it in the corn patch.

He said that one night, next morning he was awakened by a fearful jabbering in the corn patch. He got up and investigated. He found eight large crows staggering around the field and smulating the human voice as closely as nature would permit. They say he has been feeding the crows since.

When they saw Mr. Olex they tried to fly, but it was impossible. They couldn't even walk straight. In fact, they fell over on their sides.

Mr. Olex banded them into a couple of paper cages. When they sobered up he let them go. Then he took them to the field and they left their bodies as a warning to other crows.

Reorganization Is Upheld. The United States Court of Appeals has handed down a decision at San Francisco affirming the decree of Judge Bean in the case of the Pacific Coast Guaranty & Trust Company, against the Deschutes Irrigation & Power Company, and others.

The question involved was the receiver of the lower court, which is affirmed, held that there could be no reorganization of the company prior to liquidation of the first mortgage bonds.

Graft in King Uziab's Time. Isaiah L. 14, 15, 17.

Your new moons and your appointed feasts you shall hate; they are a trouble to you, and you are weary of bearing them. And when ye spread forth your hands, I will hide mine eyes from you; ye shall not hear; your hands are full of blood.

And companions of thieves; every one loveth bribes and followeth after rewards: therefore shall neither do the cause of the widow come unto them.

Pacific U. B. Forest Grove 6. PACIFIC U. B. (Special.)—Forest Grove, Oct. 15.—(Special.)—Forest Grove High School football team's first game was outclassed by Pacific University second eleven here today 16 to 0. Though the teams were about evenly matched in weight, the Pacific lads showed superior team work and made yardage by the bucks and end runs at will. The High School boys were handicapped by lack of practice and confidence. Next Saturday the High School plays McMinville High School in Forest Grove.

Fruit Exhibition Closes. WOODLAND, Wash., Oct. 15.—(Special.)—The third annual exhibition at the Lewis River Valley "Fruitgrowers' Association" closed today. The Upper Lewis River Valley showed the best display as to color and perfection of fruit and the lower valley showed better in size in fruit and vegetables, also best in grains and grasses. Quite a number of housewives were attracted by the exhibits and were informed by the exhibitors as to what the valley could and does produce.

GUY HARRIS' PAIN SENTENCE TO JAIL

Lonesome Honeymoon Is Filled With Hope Bridegroom May Win Freedom.

SENTENCE IS SIX YEARS

Bride Says Mother in San Francisco Does Not Know of Her Love for Prisoner Who Is Convicted of Double Felony.

SEATTLE, Wash., Oct. 15.—(Special.)—Clinging to the man she loves, who must pass at least the next six years in the Walla Walla penitentiary, Mrs. Clymena Rollett, of 1423 Fifth avenue, obtained a marriage license from Sheriff George Sanborn, and the bridegroom, in charge of Deputy Sheriff William Zimmerman, was married Friday noon in a retired nook of the County Clerk's office by Rev. J. A. Sigurdson.

At the conclusion of the ceremony Sanborn greeted his wife with a kiss and was led away to the club's property at West Park and Stark streets. The bride wept as she left the courtroom.

Sanborn has been convicted of grand larceny and sentenced to three to five years and also convicted of forgery, for which he was sentenced to three to five years. He has appealed both cases to the Supreme Court.

His bride, who is a native of Walla Walla, is a widow and has a young son. She is said to have been largely in bogus warranty deeds and mortgages. He was convicted of purchasing a stolen automobile, and a commercial paper. Hatfield, his principal, also is under sentence to the penitentiary on charges of forgery and attempted jail breaking.

"I am going to stand by my husband to the end," said Mrs. Sanborn. "Just as sure as I am sitting here, I will go to the penitentiary with him. Do you think that I would have married him out of the jail if I had?"

"My mother in San Francisco doesn't know of this, and I am afraid it will break her heart," Mrs. Sanborn says she has been in Seattle since July 5 last, but her home is in San Francisco. Mrs. Sanborn is a brunette, with dark brown eyes and a smart figure.

CRYSTAL PALACE ON SALE

Famous Glass Landmark of London May Become Memorial.

ATTACKING TURKS LOSE

ITALIANS WITH FIELD GUN, BEAT OFF INFANTRY.

Invading Force Leaves Behind One Dead and Field Gun—Four Italians Are Wounded.

TRIPOLI, Oct. 15.—Before dawn this morning 200 Turkish infantrymen attacked the intrenched advance posts of the Italians, west of Boumalene.

After an hour's fighting, the Italian infantry, backed by field guns, landed from the fleet, forced the Turks to beat a retreat, leaving one dead, a quick firing gun with ammunition and various supplies.

Four Italian soldiers were wounded.

CONSTANTINOPLE, Oct. 15.—The Turkish parliament was opened this afternoon, the Sultan's speech being read by the Grand Vizier in the presence of the Sultan, the oldest Turkish prince, the foreign diplomats and the heads of the foreign banks.

The speech dealt mostly with the action of Italy in declaring war against Turkey and with the steps taken by the government to meet the situation.

It is not certain whether the Turkish cabinet, resulting in a continuation of the resistance to Italian demands.

WITH A PACK OF CARDS

Amazing Number of Possible Combinations Effected.

Strand Magazine. Let us suppose that 2,000,000,000 human beings were supplied with a pack of cards—were to attempt actually to produce every possible arrangement of the 52 cards. It is farther to be supposed that they work their way to rest day or night, from year's end to year's end, at the rate of one new arrangement per second for each person during a century of 100,000 years. One single thousand takes us back to the remote days of King Alfred, and to go back to the birth of Christ requires less than another 1000. Only about 1000 years have elapsed since Moses led the Israelites out of Egypt. Finally a period only one-fiftieth of 100,000 years takes us back a great way beyond the most remote part of authentic history.

The hypothesis from which we start is, therefore, that a population one-quarter more than that which now exists has spent its whole time during the duration of the Christian era in shuffling cards at the rate of one shuffle per second, or more than 2,000,000 shuffles per head in each year.

In view of such figures the reader may well ask how many times the total number of arrangements will have been produced by this vast amount of shuffling (through ill-directed) human effort.

The answer is, not once. Mathematical calculation proves, in fact, that the number of card arrangements produced under the conditions assumed will only be a minute fraction of the total possible number—a fraction so minute that it becomes necessary to devise another scheme of concrete representation in order to give an idea of its minuteness.

Let it therefore be further assumed that the whole number of arrangements produced by the human race as above is symbolized by one drop of water. Then how much water would be required to symbolize the total number possible? If this question is put to the reader he might well say, "Sure-

ly, a glass of water would be enough!" But, no. "A bathful of water, then!" No. "A large reservoir? No, my friend; you must enlarge your conceptions, and you may never have the truth." The Atlantic Ocean, then. The number of drops in that will surely be sufficient.

But the number of drops of water in the Atlantic Ocean is not sufficient, nor will it become sufficient even when we add to the Atlantic Ocean the Pacific and all other oceans, seas, lakes, and, indeed, all the water of the whole earth made, from center to surface, entirely of water be sufficient. Incredibly though it may seem, to obtain twenty-five million of such a sufficient number of drops, it is necessary to imagine a globe of water with a diameter equal to seven thousand and twenty-five million of miles. If the center of such a globe is taken at the center of the sun, then Neptune, the remotest planet in the solar system, would be immersed therein to a depth no less than 700,000,000 of miles; in other words, such a ball of water would have a diameter of about 25 per cent of the diameter of the whole solar system as at present known.

Western States to Display Productivity at St. Paul.

RESOURCE DATA GATHERED Oregon Development League to Send Exhibits in Care of Experts.

Graphic Portrayal of Settlement Regions Is Aim.

ST. PAUL, Minn., Oct. 15.—(Special.)—After the settlement regions have been harvested, when the country faces a prosperous holiday season and a promising New Year, a "land products show" will be held in St. Paul by the Oregon Development League and the Territory of Alaska, to show graphically the resources and products of the soil, mines, forests, lakes, rivers and fisheries of the people of the Middle West.

Washington, Oregon, Idaho, Montana, North Dakota, South Dakota and Minnesota will participate in this show, which will be held in the Grand Hotel, having an exhibit gathered by Falcon Joslin, of Fairbanks, which will be an important part of the show in St. Paul.

The show, as the enterprise is officially known, is given by the Northwest States for the benefit of these states alone. No others are admitted and Canada is barred. It is one of the means employed for advertising the resources of the Northwest.

According to immigration officials of Western States, railroad officials who have been trying to hasten the settlement of our lands, the show and exhibitions of products of the land are getting better results from exhibits at land shows than from any other form of advertising.

Land Shows Successful. When the Stomach Stops

Working Properly, Because There Is Wind in It, Use Stuart's Dyspepsia Tablets to Set It Going Again.

A Trial Package Free.

The doctors call it flatulency, but unprofessional folks know it as "wind on the stomach," and a most distressing state of things it is. It is a sort of condition of the great motor organ. Always annoying and painful to the extreme, at times often leading to bad and fatal results. The stomach embarrased and hampered, wind cannot take care of its food properly and indigestion follows, and this has a train to appalling consequences. The entire system of circulation and of an active or passive factor in this trouble and life soon becomes a questionable boon.

All this is explained in doctor books; how undigested food causes gases by fermentation and fermentation in which process some essential fluids are destroyed, burnt up—wasted by chemical action, followed by defective nutrition and the distribution through the alimentary tract of chemically wrong elements and as a consequence the stomach and entire system is starved. Plenty of food, you see, but spoilt in preparation and worse than the food itself.

A deranged stomach is the epitome of evil; nothing too bad to emanate from it, but the gas it generates is probably its worst primary effect and the only way to do away with this is to remove the cause. Stuart's Dyspepsia Tablets go to the root of this trouble. They attack the gas-making cause, render the food more digestible, and wind on the stomach simply cannot exist where these powerful and wonderworking little tablets are in evidence.

They were made for this very purpose to attack gas-making foods and convert them into proper nutriment. They are not a purgative, but a whole book could be written about them and then not all told that might be told with profit to sufferers from this trouble. The years of patient and expensive experiment in effort to arrive at this result—of failures innumerable—will stand as a warning and make mention of the different stomach correctives that enter into this tablet, and make it faithfully represent all.

Stuart's Dyspepsia Tablets are not alone intended for the sick, but well folks as well; for the person who craves hearty food and wants to eat heartily and run the risk of indigestion, they are a charm and make eating and digestion a delight and pleasure. They keep the stomach active and energetic and able and willing to do its work without special labor or effort. Don't forget this. Well people are often neglected, but the Stuart Dyspepsia Tablets will attend such cases as a preventive and cure.

A free trial package will be sent anyone who wants to know just what they are, how they look and taste, before they buy. Write for it. It will cost you nothing. Write for it to the drug store for them; everywhere, here or at home, they are in boxes and by getting them at home you save time and postage. Your doctor will prescribe them; if you are 40,000 doctors using them, but when you know what is the best, you will not care to be told of the expense of a prescription. For free trial package address E. A. Stuart Co., 116 Stuart Building, Marshall, Michigan.

Governors Name Exploiters. Governors of the states to be represented have named men prominent in the development work to look after exhibits, and these will be installed with the latter point by the allegation that the names of the states are equal to the entire cultivated area of Denmark—owned by 70 persons, and the reflection by the House of Lords of liberal measures for the increase of small holdings and the restriction of the powers of the landlords is regarded as at the root of the present evil. At present it is the opinion of the committee that the Scotchmen would prefer to stay at home if the hope of owning a bit of the soil were held out to them.

But the land question does not tell the whole story. The British colonies are making extraordinary bids for immigration, and the Scotchmen are equal to the entire cultivated area of Denmark—owned by 70 persons, and the reflection by the House of Lords of liberal measures for the increase of small holdings and the restriction of the powers of the landlords is regarded as at the root of the present evil. At present it is the opinion of the committee that the Scotchmen would prefer to stay at home if the hope of owning a bit of the soil were held out to them.
