# RATE TO NEW YORK BY WATER HIGHER

Minimum Tariff of 50 Cents Increased 21-2 Cents, Becoming Effective Soon.

CIRCULAR GIVES

California & Astoria Steamship Company Advises Shippers That Philadelphia Is No Longer Port of Origin.

Formal notice of the advance of 2½ cents on each 100 pounds of cargo consigned to Portland from the Atlantic side that is carried at present for 50 cents as the minimum tariff, will be mailed today from the office of the California & Atlantic Steamship Company to shippers in this territory. The new rate becomes effective January 15 and means that in the future the lowest charge will be 52½ cents.

A circular compiled yesterday covering the raise is as follows:

Please advise that, effective January 15, 1812, the following changes in westbound rates will be made by the Panama Railroad Company:

Tariffs above the former minimum are not altered by the increase, but there will be a change in the amount there will be a change in the amount absorbed on interior rates, as the company has absorbed 20 cents on shipments originating away from New York and after January 15 but 17% rents will be absorbed. Only west-bound tariffs are concerned in the new quotations, but as the change follows the action of the Government in eliminating the Panama-Philadelphila steamship service and all cargo formerly originating in the vicinity of the latter point must be shipped to New York, it works a double hardship on Portland consignees.

Limited facilities on the rail line extending across the Istimus, coupled with the inability of the steamship lines to obtain additional vessels with which to handle business available, are

Hose to obtain additional vessels with which to handle business available, are causing lumbermen deep concern. It is estimated that there remains 2,000,300 feet of lumber at Portland mills ready for shipment via the Ishmus and half as much is on Grays Harbor, but there is little prospect of moving it soon. Another objectionable feature is that the Government will not accept material in excess of 25 feet in length on the rail line.

Sound after a run of 13 days, within one day of the record between Honolulu and the Columbia River, which she made three or four days ago.

The French bark St. Rogatien, which arrived November 24 from Kahului, made the run to the river in 16 days which was a clip voyage, and the best done this season among vessels bound here. The schooner Crescent, a recent arrival on the Sound from Honolulu, in also said to have covered the distance in about 13 days, but the performance of the Searles had another feature in that she sailed from Everett November 2, with a cargo of lumber, and was but 17 days on the run to the lalands, and good time was made dis-

charging. Often vessels are a month on the way to the Coast and 20 days is re-garded as fair time.
