A bullian view of the situation is taken by a large operator at Los Angeles, who experience the state of Chicago at \$2.23 a hundred in car lots. A sell-ing movement was begun at that time and some leading issues, including Union Fa-cific. Heading, Canadian Pagific. United States Steel and American Smelting were depressed a point or so below the previous close.

The distinctive movements of the earlier part of the day were among the specialities. One of the most prominent was International Mercantile Marine. The buying came largely from London and was reported to be based on steps taken by the company to enter more largely into the American comestic trade. National Hiscoil rese more than three points and North American, Great Northern Ora and some of the uppper and steel stocks rose a point or more. The afternoon deciline, however, either cancelled the gains or reduced them largely.

Among the railroad stocks pressure against Union Pacific was noticeable, because of the unfavorable November report of the system. Although the loss in not revocue was well above 550,000, the stock developed strongth, the preferred issue moving up it.
