FEDERAL CONTROL

tions Into Separate Parts

Not All, Says He.

WASHINGTON, Jan. 2.— The mere breaking up of large combinations into a number of separate parts by no means meets the whole trust question." mays Secretary Nagel, of the Depart-ment of Commerce and Laber, in his annual report transmitted today to President Taft.

President Taft. Bedretary Nagel declares that the Sherman law has been proved to be an effective statute beyond all doubt and that a degree of combination of capital is quite notessary. But he adds that the Supreme Court decisions in the Stand-ard Oil and tobacco cases have demon-strated that the next step in the con-trol of great industrial corporations will be the creation of a permanent Federal agency.

will be the creation of a period of a period agency. How such control shall be exercised, whether by commission, Federal incor-poration or sther means, which have been advocated recently by Judge El-bert H. Gary, George W. Perkins and other financiers before the Senate com-mittee which has been conducting hear-ings to determine what changes would mittee which has been conducting hear-ings to determine what changes would be desirable in the antitrust laws. Sec-retary Nagel does not definitely say. He favors, however, a development of the powers and scope of the Bureau of Corporations.

Some Combination Necessary.

"A certain degree of combination of capital is admittedly essential to the capital is similarly essential to the carrying on of our great business enter-prises," says Secretary Nagel. "To con-trol property such necessary combina-tions we must have some Administra-tive Federal office for commission which shall make this work its busi-

development. The decisions of the Supreme Court In the Standard Oli and American To-bacco Company cases have brought foretbly to the public attention a fact repeatedly presented in the reports of this department—the imperative need for the positive Administrative regula-tion of great industrial corporations. The recent decisions and reorgani-rations which followed have made it clear that another imperative step re-mains to be taken and that this is the establishment, by appropriate legisla-

"Whether this shall be done by means of Federal incorporation or by a Fed-eral office or commission exercising powers of regulation and supervision may be a secondary question. The first consideration appears to be the estab-ishment of permanent administrative publicity, regulation and supervision. The time is peculiarly ripe for such section. Fublic opinion and the views of many corporation managers are as ene."

ene." Secretary Nagel recommends that the Bureau of Corporations be developed to take up the form of supervision he suggests. It would be but a logical expansion of the bureau's operations and policy, which, he says, have relied solely on publicity for the lad eight years and have demonstrated beyond question what a system of permanent supervision can do.
