The Human Heart

The heart is a wonderful double pump, through which the blood circles is kept moving in proper order. By means of a single pump, without gills, the blood would be thrown back into the lungs at every overwrought effort. The heart is the brain and body of the power of life. Dr. P. Pierce is the great discoverer of the secret of the heart and has solved and divulged the mystery of the human heart. wires, and nerves with the brain.

Dr. P. Pierce's Golden Medical Discovery

Being more without the heart, this Medical Discovery opens the gate of the heart and enables the body to repair and be restored. This Medical Discovery will also cure the chronic diseases and the sick in the heart and suffer from the maladies of the body. It is also the cure for heart disease, syphilis, and all such like diseases, and the sufferer shall be cured. A German scientist discovered the great secret of the human heart and has written a book on the subject. The book has sold over 300,000 copies in English, and the book is now in English, and the book is now in English, and the book is now in English, and the book is now in English, and the book is now in English, and the book is now in English, and the book is now in English, and the book is now in English, and the book is now in English, and the book is now in English.
