Joseph T. Ellis, attorney and former Tenth Ward Councilman, who is circulating a petition for the purpose of having the name of Theodore Roosewelt placed on the Republican primary Presidential ballot in Oregon, said yesterday that he had received a letter from Colonel Rossevelt, which, to use Mr Ellis' own words, "had an effect exactly opposite to discouraging on my activity in circulating the Rossevolt partition".

petition."

Mr. Ellis refused to show the communication, saying that in a few days he will make it public.

There is not the slightest doubt in the world that Colonel Roosevelt is an active candidate for the Republican Fresidential nomination and that he will accept if nominated. You can put that down in black and white as gospel truth, said Mr. Ellis.

The Roosevelt petition has taken well in Multnomah County, Ellis said, and in a short time will be sent to other counties of the state for circulation. Only 500 signatures are required, but the law provides that these must come from several counties.

Reported Use of Oleomargarine at Asylum Condemned.

FOOD INSPECTOR FEARFUL

E. T. Judd Declares if State Puts Its Brand of Approval on Butter Substitute Oregon's Big Industry Will Suffer.

That the reported action of the State Insane Asylum officials in authorizing the use of electmargarina instead of butter at that institution is a grave menace to one of Orogon's growing in-dustries was the declaration yesterday of E. T. Judd, chief deputy in the office of the State Dairy and Food Com-

missioner.

While appreciating the humor of the experience of the asylum authorities in failing to distinguish between butterine and the pure article when the ice chest was inspected recently and the transfer of butter and butterine was made, the food and dairy officials say there is danger of crippling the dairy industry.

dustry.

The fact of the substitution not being discovered until after the use of elemangarine was established, only aggravates the danger, they say.

Industry Seen Imperiled. "We hate to think this change will be made," said Mr. Judd yeaterday, "for if there is any industry in Oregon upon the development of which the hopes of the state are set, it is the dairy indus-

"It is almost inconceivable that a state institution that is supported by taxpayers, hundreds of whom are dairymen, could make such a discrimination, instead of using good Oregon butter using a substitute made by the beef

using a substitute made by the best trust.

"Oregon was one of the first states in the Union to enact laws against the manufacture and sale of oleomargarine in competition with butter. Through the rigid enforcement of those laws we have been able to keep oleomargarine off the market, so that the honest dairyman does not have an unfair competitor. But when one of the institutions in this state favors the use of the tions in this state favors the use of the butter substitute it is certainly discour-aging to men who are trying to build up the dairy industry.

Growth of Use Feared. "There can be no doubt that people of the most discriminating tastes do not and will not use oleomargarine. It would seem just a little pathetic that a per n who at home would use only the best butter should be obliged to use butterine, if he were unfortunate enough to have to reside at the asylum. If this combination of beef tallow and cottonseed oil is to be used hereafter the action who may if not be used at the Asylum, why may it not be used at the Penitentiary, the Reform School, or all of the state institutions?

"How will it be for the state that is offering inducements to the immigrant in the field of dairying when the new settlers arrive and discover that oleo-margarine is used in its institutions? What an advertisement for the beef What an advertisement for the beef trust to be able to say that the State of Cregon is using its product! The packers can well afford to pay this state thousands of dollars for the benefit such advertising would give them. But how about the adverse publicity our dairy industry would receive? Undoubtedly the action of the Asylum authorities will be resented by the varieus associations of dairymen and the One of the longest lines that ever ous associations of dairymen and the waited before a theatrical box office granges when the fact becomes known."

Traveler Visits Philanthropic Notables After Attending Methodist Conclave in Pensylvania.

Fietcher Homan, president of Willamette University at Salem, has returned from his trip to Meadville, Pa, where he attended the annual meeting of the Methodist Episcopal Educational Association. Between 50 and 75 presidents of Methodist colleges, academies and theological schools were in attendance. The relation of denominational education to institutions of the state was discussed, and the sentiment was expressed that there ought

From Meadville, President Homan went to New York City, where he called on Dr. Wallace Buttrick, secretary of the General Educational Board, founded by Rockefelier, a \$52,000,000 corporation. Mr. Homan was received cordially, and learned that Dr. Buttrick is much interested in educational institutions of the West.

Y., Mr. Homan attended the university senate of the Methodist Episcopal Church, January Methodist Episcopal Church, January 8. The senate fixes the standard of education in the Methodist church. These standards conform to those of Carnegie Institute, and to those of leading educational institutions the country over. Mr. Homan found that the campaign for the endowment of Willamette University has taken its name into Methodist circles the world over. At Syracuse he spoke in the chapel of the Syracuse University, being introduced by Chancellor Day, who has a reputation for his support of John D. Rockefeller.

At St. Paul the university president interviewed James J. Hill, the railway magnate, and found that Mr. Hill has 16 colleges on his list as beneficiaries, and believes in denominational educa-tion. Mr. Homan says Ma Hill asked particularly about the well-to-do mem-bers of the Methodist church in Port-land and Oregon, and was interested to know what they had done for the

WOOD PRESERVING COMPANY WOULD HALT ASSESSMENT.

M. G. Thorsen Promises Good Paving on East Morrison Street After Crossings Are Laid.

A letter has been filed with the Mayor and City Council by M. G. Thor-sen, on behalf of the Carbolineum Wood Preserving Company, relative to the wood block pavement recently laid on East Morrison street. It sets forth that the contractors never have asked for the assessments to be made on the work and that they do not want this action and ask that the city wait until the work is completed. The letter is:

the work is completed.

The letter is:

We note that steps have been taken toward the acceptance of the work performed by this company on East Morrison street.

We wish to say that said work has as yet not been completed by reason of the fact that the quadruple railway crossing on East First street has not been put in at the present time and the one on East Second street was put in but a short time ago. For these reasons we could not complete this work in accordance with the terms of our contract, although we were assured that no delay would occur at the time we began the construction of this pavement.

Owing to the non-arrival of these crossings at the proper time our work had to remain in an unfinished condition, permitting water to congregate in the crossing excavations and causing serious damage to portions of pavement already completed. Further damage was caused by reason of the fact that the street railway tracks broke through the concrete put under the siles by that company near Union avenue, permitting the water to get under the pavement.

In view of these facts we do not understand why these proceedings were inaugurated, as no steps whatsoever had been until this work has been completed in a substantial, satisfactory and proper manner.

As soon as the crossings have been put in place and the converse foundation put under the tracks of the street railway in a proper manner we shall proceed at once to complete the tracks of the street railway in a proper manner we shall proceed at once to complete the work. We wish to assure you that it will be as good a piece of pavoment as can be found in Portland, and in substantial to of this fact will refer you to the pavement laid by us on Pine street, between Third and Fourth streets, at the ways of the street inse.

We were not responsible for this delay and eccasequent damage which has caused

between Third and Fourth streets, at the same time.

We were not responsible for this delay and consequent damage which has caused us a great deal of additional expense, but at the same time we wish to assure the property owners that they shall not suffer in any way by reason thereof and that this pavement will be completed in a substantial and proper manner, satisfactory to them and strictly in accordance with the terms of the specifications and contract, before we ask that the work be accepted.

By this programme the defense gained the advantage of preserving its two remaining peremptories for application, if desired, in getting rid of the next two veniremen who should be examined, if they proved unsatisfactory. By its action the defense waived the right of challenging the 11 men who already had been passed and were seated in the jury box, but strongly fortified itself in the selection of the final juror. It so happened, however, that Mr. Randolph, who was called to take the place of Lacey, proved entirely satisfactory and it did not become necessary for the defense to exercise either of the two available peremptories in the possible contingency against which it had

He admitted an im-pression as to the guilt or innocence of Morris in the pending trial which would require evidence to remove. This impression was formed at the time Morris was first convicted for defraud-Morris was first convicted for defrauding the bank.
