SERIOUS FIRES 14 FOR YEAR.—Fortland had last year only 14 fires where the losses exceeded \$10,000, according to the annual report of the Fire Chief, filed in the City Auditor's office. The losses last year were only 14 per cent of the property involved. The loss totaled \$24,000, and the amount of property involved was \$5,749,000. In the course of the year 1155 fire alams were turned in. There were \$25 actual fires, and 127 still alarms. Of the total number of fires, 417 were extinguished by water, and 169 by chemicals. The first big fire last year was that which destroyed the old Mount Tabor school, at East Stark and East Sixtleth streets.

WATER MAIN BURFTS.—A small flood Seventh and Morrison streets at Seventh and Morrison streets at the noon hour yesterday was caused by the breaking of a four-inch water main on Morrison street between Seventh and Park. The employes of E. W. Riner, who is laying a sewer along Morrison street, dug so close to the main that it burst, being in a weakeded condition. More than an hour elapsed from that time until the water was shut off. A. Albertini, West Side foreman of the Water Department, being notified. The basement of the new Healy building, Park and Morrison streets, was partially flooded.

POSTAL SAVINGS SWELL-With an existence of less than five months the postal savings depository has opened accounts with 4791 individuals with total deposits of \$472,127. In Jan-uary 926 new accounts were opened and the deposits of that month amounted to \$105,577, showing a net gain for the month of nearly \$60,000. The sale of postal savings cards and stamps have been comparatively slight as for some reason this form of the system does not appeal to the local patrons of the depository. 25-Teas-Old Gist. HEALTH LEAGUE HOLDS CON-TAGION MEASURE DANGEROUS.

Forbiddance of Handelasps in Exercises of Classes Declared to Miss Real Intent.

Declaring that the effect of the re-cent order prohibiting children from taking one anothers' hands in the symmastic exercises for the preven-tion of contagion is unwise in that it promotes fear, which the petitioners point out is the worst form of contagion, a resolution passed by the Health Defense League, of Portland, was read at yesterday's meeting of the School Board asking that the rule be

Guest of Great Northern.

The resolution is as follows:

Resolved, that this organization protests against the recently promulgated order of the School Board of Portland prohibiting children from taking one another's hands in the gymnastic games in school—the ground for the rule being that the child is in danger of contagion through such contagt.

The reasons for this protest are as follows:

First—If the danger were real it would be necessary also to prevent the child from suchool, or whenever schoolchilders are congregated. If the danger were real it would be necessary to prohibit their hand-ling the same books, balls, marbles and other articles. Second—The rule itself is danger-ous to the child. It promotes one of the worst forms of contagion, the contagion of fear. The impression of fear sinking into the ausceptible minds of the children produces morbid conditions, and these in time may develop into actual disease. Bo much modern psychology has established.

Therefore we respectfully urge upon the Board that the rule be resoluded and direct the secretary to transmit a copy of this resolution to the School Board.
