State Department Gives Assurance That No Intervention is intended.

OUTLOOK BELIEVED GRAVE

Many Small Upheavals Looked Upon as Evidence of General Dissatisfaction and Madero's Control Is Doubted.

WARHINGTON, Feb. 8 .- Intervention in Mexico by the United States is not intended by any mobilisation of troops may be made again along the southern border. This was the attitude the State Department telegraphed today to various consular and diplo-matic representatives in Mexico who had complained that intervention talk there was fostering a dangerous anti-American sentiment. The State Department reiterated that

this Government had no interest in Mexico beyond the saftey of American lives and interests, but from the same consular agents came reports far from reassuring as to the stability of the Mexican federal government. No specific formidable uprising was recorded, but small upheavals, regarded as symptoms of general disastisfaction, led to an apprehension that the malcontents was units conferning the govern may unite, confronting the govern-ment with a serious crisis.

The National guardsmen, it was pointed out today, cannot be sent out of the country, being available only to repel an invasion. The activity of the general staff is attributed to its esginternational movements.

Reports of unsettled conditions in the interior of Mexico came from various points today. Fifteen hundred insurgents are threatening Santa Rosalia, and there are strikes at the Madero mines at Parras.

Conditions in South Grave. Matamoras, opposite Brownsville, Texas, also is scenting trouble. Rebels are said to be in control of the situa-tion from Juarez south to Casa Grandes, though no reports of any fighting have reached here. Grave conditions are believed to prevail in Southern Mexico, pessimistic reports being received from the states of Vera Cruz, Michoacan and

Hidalgo.
General Wood today instructed Colonel Steever, at El Paso, to send back

Expert Declares That Present Duty Is Necessary to Success of Industry--Seven-Day Working Week Is Defended

WASHINGTON, Feb. 8 .- Charles M. schawab, ex-president of the United States Steel Corporation, speaking be fore the Senate finance committee to-day, said serious consequences would

follow a reduction in the steel tariff. He attacked the Underwood bill. "On many occasions I have said that with equal conditions steel could be made as cheaply in the United States as in any other country," said Schwab. "This has been construed into a state-ment that steel is made as cheaply here as elsewhere. That I have not said and I don't say."

"With the same conditions, especially with labor as cheap, we ask no protection, but the labor account weighs heavily against us. Though we are only 100 miles from New York, it costs as much to put our steel there as it does to bring it from Holland.

Present Rates Needed. "I consider the present tariff rates necessary to prosperity of the steel business. Most emphatically I am op-posed to any reduction."

Schwab said that without pretection he would want no financial interest in

he would want no financial interest in the steel business, and would regard as wasted the \$35,000,000 which recently had been invested in his business. "After all my work and the invest-ment of my fortune, I have never taken a penny out of the industry and have never paid a dividend, and if the pro-posed tariff is to be the law, I repeat that I shall 'cash in,'" said Schwab, in closing his general statement. Schwab admitted he got less for the steel exported than for that sold here. steel exported than for that sold here "At times we even sell abroad at a loss," he said, "because the average cost of a large production is less than that of a small production; it is necessary to maintain the output to keep the machines going all the time.

Chinese Iron Imported. Schwab said pig-iron could be made in China for \$7.50 a ton and that he was importing iron from China for his San Francisco works rather than ship from Bethlehem, Pa.

Steel rails cost in this country from \$22 to \$23 a ton and in Germany about

\$18 or \$19. Schwab defended the seven days a week work in the steel industry, saying week work in the steel industry, saying it was the system throughout the world and that a change could not be made by any one manufacturer.

He agreed with members of the committee that there should be a change, and expressed interest in an experiment now in progress to that end. James J, Hill has been summoned to appear before the Stanley steel in-vestigating committee next Monday.

FTER you have trained yourself to look at the article you have to sell, from the viewpoint of the buyer. After you discover which of the facts concerning the article are the vital selling points—those only which appeal to the consumer's pecketbook, comfort pleasure or pride—you write them down. Now arrange them in such a manner, and clothe them with words that will accomplish this. First attract attention, then create interest, then a desire for the article, and last a determination to purchase. You will have written an advertisement that will pull.
