

HEBREWS REVERE MEMORY OF DEAD

Impressive Services Held in Ahavai Sholom Synagogue by B'nai B'rith Society.

PROPHET MOSES EXTOLLED

Charles Robison Reads Poem He Composed Praising Divine Qualities of Leader, and Address Is Made by D. Solis Cohen.

In Ahavai Sholom Synagogue yesterday afternoon, members of B'nai B'rith held their first services in honor of the memory of their dead. Special music was rendered by the choir. D. Solis Cohen and Charles Robison delivered addresses. M. Mosessohn introduced the speakers. The attendance was large and the services were impressive.

The B'nai B'rith Society was established 50 years ago, by Hebrews, and the date of the death of Moses was chosen as an annual memorial day. Members of the Portland Chapter who passed away were L. A. Roskowitz, M. Magal, M. H. Hartzel, Baruch and Benjamin Wiesel. Mr. Cohen said in part:

Memorial services for the dead are not new to the Jews. They have continued to reverse the memories of their forefathers, no matter what other ties of the church they may have severed.

Fidelity to Duty Urged.
"Hypocrisy in an institution is as much to be deplored as in an individual. If committees appointed to visit the sick members of their order neglect to do their duty and fail to bring cheer into the homes of the afflicted, if but a few attend the funeral of a dead brother, then it is hypocrisy to hold memorial services after their former associates have departed into the great beyond."

"The brotherhood should look into these things carefully, and not allow cliques and classes to interfere with the good purpose of the order, which is to stimulate co-operation and usefulness among the Jews."

"Life is like a race, and should not be limited to the narrow lanes of selfishness to breed discord instead of harmony. A man lives or else he merely exists, according to the view he holds of life."

Robison Delivers Address.
Among other sentiments voiced by Charles Robison during his address were the following:

"All people copy the Jew. No matter what man does, a Jew has done the same thing before. We are following a precedent established by B'nai B'rith 50 years ago, but 5000 years ago the Jews mourned the death of Moses."

Mr. Robison then recited the following original poem on Moses, as an ode to the anniversary of his death:

Patience, prophet and leader,
Teacher, counselor sage,
Here in the mystic of the ages,
Thou who hast come through the sea,
Rest on thy couch on Beth-peor
Thou whom Jehovah called friend,
Straight and unswerving thy headstone,
Till thy tale of his end.

Out from their bondage he led them,
Savior and blessing and strife,
Freesmen he made and the Hebrews,
Liberty sweeter than life
Name of Jehovah he promised
At the opening of the way,
Ready to enter and rest him
On at the close of the day.

Dreamt of the days he had suffered,
Painful toils, and the pain,
Now was his full labor ended—
Heed now his labors were through,
Out from their bondage he led them,
Clear-sighted, definite, fate,
"Thou shalt enter the land ye have
dreamed of,
Thy work is ours—'tis late."

"Gaze ye your last look from Bethpeor,
Thy people will enter thy field;
Thou art the father of the Hebrews,
Come now the reaper, so yield."
Then on the heights of Bethpeor
Thou shalt enter the land ye have
dreamed of,
Thy work is ours—'tis late."

SPOKANE MAN TO DEFEND
Clark's Trial for Bar Murder Will Take Place on March 4.

CONVICT WHO REVEALED HIDING PLACE OF BULLION STOLEN FROM STEAMER HUMBOLDT, AND THREE MEN HE IMPLICATES.

Charles Barrett, Convict Who Has Confessed.

James E. Whealen, Saloonkeeper Under Indictment.

Orville Caviness, Convicted of Share in the Robbery.

Jay N. Saylor, Ex-Convict, Now Living in Portland.

CAVINESS GIVES FIRST TIP

San Quentin Prisoner, Begging for Opium, Lets Officers Have Facts Which Induce Salem Convict to Make Revelations.

(Continued from First Page.)
chased at the jewelry store and some gold was given in exchange. These facts were all reported to the officers and to Steve Connel, who has been actively engaged on the case for more than a year.

While officers declare positively that they have never suspected George Sims, father-in-law of Barrett, of being in any way connected with the case and that he was probably in ignorance of the complicity of his son in the bullion robbery, it was nevertheless believed that Barrett had cached the bullion either on the Sims place or the immediate vicinity.

Long Search Rewarded.
The finding of the bullion is the fruition of a search conducted over a year ago. In the course of which Portland detectives hovered on the very edge of the discovery, and at last gave up when the scent grew cold. For weeks the Sims place, where the bullion was buried, was under close scrutiny and Mrs. Pearl Barrett, wife of the man who has revealed the deposit and the discoverer of the bullion, was questioned hour after hour without result. A news story in The Oregonian at that time told of the existing belief that the gold was buried near Salem.

Officers who have been working on the case do not believe that Barrett has made a complete revelation, as there remains much of his "cut" to be accounted for. The 25 pounds so far recovered are estimated to be worth about \$600, and unless the conspiracy which preceded the robbery was much more extensive than is supposed, Barrett must have received a larger amount. While it is reported that he told of another hiding place in a distant city, it is believed that he has reserved something for himself when he comes out of the penitentiary before a year has gone.

Caviness Gives Tip.
It was Orville Caviness, the San Quentin prisoner, who gave the "tip" which led to Barrett's confession. Caviness, after a long wait, was sentenced recently to serve a year in the California penitentiary and, deprived of his customary drug, easily was prevailed upon to make a confession. When District Attorney Cameron was at San Francisco seeking the extradition of Louis J. Wilde, he was informed of the fact that Caviness was expected to weaken, and when he did so the District Attorney and Governor West were notified. Armed with the information thus obtained, he succeeded in getting the statement from Barrett.

With the confession of Barrett, the officers have been able to construct a continuous story of the handling of the bullion from the time it was put ashore in San Francisco. Orville Caviness, who is a drug-user, was caught in company with two other drug-users and a woman who consorted with him, peddling part of the bullion in San Francisco in small quantities. He was arrested and convicted.

The arrest of Caviness was a broad hint to Portland detectives, as Detectives Hellyer and Moloney knew that he had been in Portland, accompanied by Charles Barrett, both known as "bunco" men. The pair were traced to the door of James E. Whealen's saloon, who later was caught by the Federal authorities, transmitting bullion to the San Francisco mint. Further inquiry brought out the fact that the bullion was deposited in Whealen's saloon and later was transferred to another saloon, on Washington street, Portland. At that point the detectives lost their last definite trace of it, but they learned that Barrett's wife had been with her mother on the farm, a

WORK ON UMATILLA PROJECT ASSURED

West Extension, to Irrigate 30,500 Acres, Formally Approved by Taft.

DELAY NOT TO BE BROOKED

Plans Selected Overcome Objections and Leave Possibilities of Further Development—Plenty of Water Is in Sight.

OREGONIAN NEWS BUREAU, Washington, Feb. 25.—In fulfillment of his promise that Oregon shall have a square deal in the distribution of the Federal reclamation funds, President Taft has directed the approval of the west extension Umatilla irrigation project and within the next few days the report recently submitted by the special board of reclamation engineers will be formally adopted and arrangements will be made for beginning work on the project, which will reclaim 30,500 acres at a cost of approximately \$12,000,000.

The board of reclamation engineers, after examining five alternative projects, selected one of medium cost and dimensions as the most feasible for construction now. It can be enlarged if enlargement is found advisable. The present plan, however, is to build the 30,500-acre project in three units, the first unit to irrigate between 8000 and 10,000 acres by the construction of a simple diversion dam in the Umatilla River. The second unit will depend upon the construction of large storage dam.

Early Beginning Promised.
The report of the reclamation board is now before Acting Secretary of the Interior, who will shortly approve it formally in a day or two and authorize the reclamation service to begin operations.

A study of the project on the ground, perusal of five alternative plans proposed by the local engineers and exhaustive hearings at which interested parties were heard, led the special board to recommend the adoption of what is termed scheme No. 4, which contemplates the construction of the Umatilla extension embracing 30,500 acres of land, at a cost approximating \$12,000,000.

The special board gave the West Umatilla project careful study from both an engineering and practical standpoint; found five plans, any one of which would be feasible if there were an assured abundance of water, but settled upon scheme No. 4 as the safest, because it is not only feasible and practical, but is a project which will not be hampered by any possible lack of water. This, among all five projects, was deemed the best, for it is the least costly, and the one which is found, later on, that there will be a surplus of water not desired by private projects.

Cost Not Excessive.
While the cost per acre of the project recommended by the board will approximate \$400, the success met by farmers on the completed portion of the Umatilla project is regarded as ample guarantee that this land can stand the cost, and yield a good profit to the settler when his land is brought under cultivation. The board has the advantage of experience in the construction of the original Umatilla project, where conditions are similar to those on the proposed west extension.

Officers in Portland who worked on the case are thoroughly mystified by Barrett's confession at this time. When he was sentenced in Portland he went away jauntily, saying he would do the "two-spot" standing on his head, and from his conduct, spread the belief that he expected to return to the city in a few days. Renewed activity has been given to the search for the rest of the treasure.

Steps had been taken last night in the case of Barrett, who is supposed by the police to be a mere go-between, as he has never displayed the qualities of a brains or intelligent criminal. Indictments pending against Whealen have been withheld hitherto, awaiting the release of Caviness, who will be freed when he leaves the doors of San Quentin, and will be brought to Oregon to testify against the gang. District Attorney Cameron said last night that it was doubtful whether the confession of Barrett would hasten this action.

Whealen was also indicted along with Barrett on the charge for which Barrett is now serving two years, the defrauding of the Merchants' National Bank of a sum near \$2000 through forged certifications. The evidence against him on this charge is weak.

ADVENTISTS PLAN CHURCH

Structure to Be Erected at Walla Walla to Cost \$10,000.

WALLA WALLA, Wash., Feb. 25.—(Special.)—A church to cost \$10,000 will be erected at College Place, according to a resolution passed by the delegates in attendance at the 32d annual meeting of the Upper Columbia Conference of Seventh-Day Adventists, which was held here. The needs for a house of worship have been felt by the Seventh-Day Adventists residing at College Place for a long time, and the North Pacific Union Conference of Seventh-Day Adventists, of which the Upper Columbia Conference is a member, has agreed to co-operate with the College Place church in building the structure. The North Pacific Union Conference will pay one-fourth of the cost of the building.

The building will be of frame construction and the plans for it have been outlined by Architect G. C. Manning, of Portland.

FLOAT OF OREGON PLANNED

Bremerton Elks to Send Design as Feature of Parade in Portland.

BREMERTON, Wash., Feb. 25.—(Special.)—Plans to advertise Bremerton in a novel way have been launched by the Bremerton Lodge of Elks, which proposes to take a gigantic float of the battleship Oregon to Portland as a feature of the parade at the National convention of Elks in July. The same float will be entered in the Potlatch parade in Seattle. The battleship, which has its home port at this yard, has been adopted by the Elks as their publicity feature.

- 45c jar of Stuffed Dates for 30c
- 40c jar of Stuffed Figs only 30c
- 35c box of Layer Raisins for 25c
- Pretzels, three pounds only 25c
- Seeded Raisins, 3 packages 25c
- 25c pkg. Washing Powder at 18c

Mail Orders Filled

landholders requiring the execution of trust deeds in approved form which shall pledge the lands to their proportion of the irrigation charges. The board will make to individuals who shall perfect a water right at such time as the necessities of the project may require. It should be explicitly stated that the approval of the project and the availability of allotments is contingent upon the completion of satisfactory arrangements with not less than 95 per cent of the private lands involved.

Delay Not to Be Tolerated.
"That whatever action is taken in the premises should be taken without delay, owing to the legal status of the water rights of the United States and the urgent appeals of settlers on the reservoir site."

Scheme No. 4, (the one adopted), contemplates the irrigation of 30,500 acres of the low Columbia territory by a gravity system diverting from the Umatilla River at the upper end of the town of Hermiston, the water to the reservoir site. It has been considered as an ultimate development in itself, or it may be undertaken as a step in a broader scheme of development involving the reclamation of from 60,000 to 80,000 acres. In the latter case it may be deemed desirable to provide as large storage as practicable, extending the reservoir area as far upstream as demonstrates the existence of an adequate water supply. In the estimates submitted, scheme No. 4 has been considered as an ultimate development.

The diversion dam and headworks are plain concrete structures. The maximum height of the dam to be built is 21 feet and the foundation is solid basaltic rock. The water supply for this canal is partly furnished from the storage reservoir and chiefly from the natural flow in the river.

The main canal serves the entire area of 30,500 acres, has a capacity of 305 second feet at the upper end, and is 31.6 miles long. The normal flow of the Umatilla is the principal tributary of the main canal, and will serve 3430 acres of high land south and west of the town of Hermiston.

Two Units Provided.
Scheme No. 4 is possible of development in two units, the second or larger unit depending upon the construction of a large storage reservoir on Umatilla. It is proposed, however, to start with a smaller unit which involves the construction of a diversion dam at Three-Mile Falls for collecting seepage and return water at that point, estimated from 5000 to 100,000 acres.

The Board points out that data regarding the water supply in Umatilla is not complete as complete as might be desired, and leaves this question somewhat in doubt. This accurate determination of a future water supply in Umatilla is an impossibility, and only an approximation can be made, and because of this uncertainty as to the supply of water that will be available, the Board has set aside schemes 1, 2 and 3, which contemplate development of the maximum area, as being not altogether feasible. The Board believes that the irrigation of 30,500 acres would prove practicable, there is an element of doubt, and the Board deemed it advisable to run no risk.

"In our opinion," says the Board, "it would be unsafe to embark upon any scheme for the complete utilization of the waters by storage until water rights on Umatilla are thoroughly and finally established. The adjudication now in progress is likely to be completed and made effective within a year or two, and the recommendations of this Board may be revised to include larger development at that time without prejudice to the public interest."

Ample Water Supply Assured.
Scheme No. 4 provides for a smaller reservoir on the Umatilla River and the utilization of waters there stored in conjunction with seepage waters, for irrigation of 30,500 acres of land. This will leave so wide a margin that there is no possibility of shortage of water supply to run the project, and wide enough to permit, if found advisable, some further development of flood irrigation by private interests on the tributaries of the Umatilla River.

The lands to be irrigated in it general classified as ranging from sandy to sandy loam. Those lying nearest the Columbia River are sandy, being inter-spersed here and there with groups of drifting sand hills too rough for irrigation which have been excluded from the irrigable area. Next come the fossil sand dunes, which are rolling and contain a small percentage of silt or loam, and are covered with vegetation and are irrigable. These lands are similar to some lands now being irrigated on the present approved project, which are situated above their fertility when properly subdued, but which require

Irrigable Lands Classified.

The plan recommended irrigates lands, which are classified as follows:

Acres	Value
5,015	1,838
4,361	1,187
11,111	3,000
30,500	80,000

Concerning the objections offered to the plans, the board says: "Some of the residents upon the lands to be submerged by the proposed reservoir have filed objections to the West Extension based upon their unwillingness to sell their present homes, which in turn seems to be largely caused by doubt that they will be properly compensated for their property. In view of the safeguards thrown around the exercise of the right of eminent domain, the right of trial by jury and the absolute absence of any disposition to do injustice to these settlers, we believe the objection seems to be without any foundation than that always inseparable from the exercise of the right of eminent domain. There is considerable evidence, collected by a committee from Hermiston, to show that most of these land owners are entirely willing to sell if they can be assured that the price will be at least equal to the value of the property at the time of the sale. Upon the urgency of early action to remove the uncertainty now surrounding their future prospects, the board most strongly urged against the West Extension by any individual, the people of the village of Stanfield, the people of which allege that the proposed reservoir will deprive them of agricultural land tributary to the town; that the reservoir site will cut off other lands from access to Stanfield, and that their drainage conditions will be injuriously affected by the proposed reservoir. The latter objection applies only to projects contemplating the right of eminent domain, which might be used for minor projects of flood irrigation on the upper tributaries of this were deemed the

"One of the most striking instances of a broad-minded view of the situation is that taken by the Pendleton Commercial Club, in the county in which most of the opposition to the project is located. After giving extended hearings to all interests, this club, by a vote of 168 to 1 favored the West Extension, and in its report notes that not only were the opposing interests confined mainly to Umatilla county, of which Pendleton is the county seat, but the lands to be submerged in the reservoir site is tributary to Pendleton, and the land to be irrigated is not only at a much greater distance, but mostly in an adjoining county. The Commercial Club took the broad view that the general good is so much more important than temporary or local disadvantages incident to the development that the odds were greatly in favor of the construction of the project, provided the engineering features were regarded as favorable by the board. The officers, however, emphatically disclaimed any disposition to urge the expenditure of any money unless it

could be wisely done from an engineering and business standpoint.

"The board is of the opinion that the objections developed have been largely stimulated by persons who believe that the project will be detrimental to them, and have been based upon misconception of the plans or their effects. In view of the difficulty and cost of protective works about Stanfield, which would be necessary in case the reservoir were constructed to the full capacity, and of some uncertainty regarding the adequacy of water supply for these schemes, and in view of the further possibility of some beneficial use of additional flood waters upon the tributaries, the board believes that at the present time the approval and construction of a western extension to the Umatilla project should be carried out along the general lines of Scheme 4."

Juvenile smoking has greatly increased lately, and its effect will be most noticeable on the next generation.

The highest point of woman's happiness is reached only through motherhood, in the clasping of her child within her arms. Yet the mother-to-be is often fearful of nature's ordeal and shrinks from the suffering incident to its consummation. But for nature's ills and discomforts nature provides remedies, and in Mother's Friend is to be found a medicine of great value to every expectant mother. It is an emulsion for external application, composed of ingredients which act with beneficial and soothing effect on those portions of the system involved. It is intended to prepare the system for the crisis, and thus relieve, in great part, the suffering through which the mother usually passes. The regular use of Mother's Friend will repay any mother in the comfort it affords before, and the helpful restoration to health and strength it brings about after baby comes. Mother's Friend is for sale at drug stores. Write for our free book for expectant mothers which contains much valuable information, and many suggestions of a helpful nature. BRADFIELD REGULATOR CO., Atlanta, Ga.

BILIOUS HEADACHE, BAD BREATH AND SOUR STOMACH MEAN LAZY LIVER AND BOWELS

Turn the recals out—the headache, the biliousness, the indigestion, the sick, sour stomach and foul gases—turn them out tonight and keep them out with Cascarets.

Millions of men and women take a Cascaret now and then and never know the misery caused by a lazy liver, clogged bowels or an upset stomach. Don't put in another day of distress. Let Cascarets cleanse and regulate your stomach; remove the sour, undigested and fermenting food and that misery-making gas; take the excess bile from your liver and carry off the decomposed waste matter and poison from the intestines and bowels. Then you will feel great.

A Cascaret tonight will straighten you out by morning—a 10-cent box means a clear head and cheerfulness for months. Don't forget the children—your little insides need a good gentle cleansing, too.
