STREET INTROVEMENT STARTED.-Grad-ing has been started on Milwaukies street between Holigate street and Nehalem avenue, preparatory to laying Hassam pavement on that street. This improvement is considered one of the most important started in the South East Side as Milwaukie is the only street openset to Sellwood. While the improvement is in progress residents to the south will experience great in-convenience and hardships as there is no other street to that part of the dity. It was hoped to get East Sev-enteenth street openset to Milwaukie was started, but this cannot be done as a considerable number of property owners have remonstrated against the assessments and benefits and the mat-ter probably will be taken into the court before it is settled. Milwaukies street has been improved with gravel, all of which must be removed.

CURVED RAIL CONNECTIONS MADE.

CURVED RAIL CONSECTIONS MADE.-Chived connections are being made be-tween the Sellwood street railway on Milwaukic street and the Eastmoreland carine on Bybee avenue at the inter-section of Milwaukie street and Bybee avenue. Two connections are being made, one running directly on Bybee avenue and the other connects with the Sellwood line on Milwaukie street, the connection turning to the north. There is a double track to East Sev-enteenth street and then a single track on out to Eastmoreland. Heavy steel rails are used.
