WIFE OF LOST CHIEF FEARS FOUL PLAY

Captain Bishop's Strange Absence From Vancouver Barracks Worries Family.

MISSING MAN ILL RECENTLY

Disappearance Thursday After Conversing With Friend in Portland Has Caused Wide Search, but All Inquiries Prove in Vain.

VANCOUVER BARRACKS, Wash. 17.--(Special.)--Despite publication in The Oregonian of the news concerning the mysterious disappearance of Captain Augustus H. Bishop and the thorough search made throughout this and other districts, all inquiries concerning his absence have proved unsuccessful. His wife is on the verge of collapse tonight from fear that her missing belpmate may have met with foul play.

Captain Bishop, who was leader of Cempany G. First Infantry, stationed at the barracks here, was last seen about 5 o'clock last Thursday after-

conversed with his officer was missed from his company's will Friday morning, when an attempt was made to locate him.

Mrs. Bishop is greatly shocked over her husband's disappearance and knows of no reason why he should have left. Some are inclined to believe a sudden attack of dementia may have selsed him and prevented his return to his post and his wife and two children, Mattie, aged 6 years, and of the Columbia. RANCHERS TO IRRIGATE

Private Systems to Be Installed Near

HUSUM, Wash., March 17 .- (Special.) Several private irrigation systems will be installed along the White Salmon River this year to increase the yield of vegetables, small fruits and grasses. Orchards thrive here without irrigation. Ranchers within a radius of four miles of Husum, who pur pose to turn water on their lands, are: William Campfield, C. J. Winchell, C. L. Colburn, E. W. Spencer, William Fordyce, Scott Edwards, H. M. Papst and William Peterson.

It has long been demonstrated in the land of the control of the southern ber-

Trout Lake region, the southern ber-der of which reaches within 16 miles of here, that immense crops of grain, hay, regetables and small fruits can be raised by irrigation. A generous supply of water running throughout that section has made it famous for dairying, while 50 bushels of wheat per acre is harvested, and 80 bushels of buts. There is the same opportunity for ranchers lower down the river to re-alize the same results with proper irri-

The time is not far distant when a disch will parallel the river from near its source to the mouth, where it flows into the Columbia. Those realizing the importance of irrigation for nearly everything except fruit trees, are al-ready interested in organizing and installing an irrigation system to better conditions that prevail during the dry months of the growing season.

YOUNG AND

No young woman, in the joy of coming motherhood, should neglect to prepare her system for the physical ordeal she is to undergo. The health of both herself and the coming child depends largely upon the care she bestows upon herself during the waiting months. Mother's Friend prepares the expectant mother's system for the coming event, and its use makes her comfortable during all the term. It works with and for nature, and by gradually expanding all tissues, muscles and tendons involved, and keeping the breasts in good condition, brings the woman to the crisis in splendid physical condition. The baby, too, is more apt to be perfect and strong where the mother has thus prepared herself for nature's supreme function. No better advice could be given a young expectant mother than that she use Mother's Friend; it is a medicine that has proven its value in thousands of cases. Mother's

STRIKERS WATCH TRAINS

Hoquiam I. W. W. Expect Strikebreakers, but None Appear.

HOQUIAM. Wash., March 17 .- (Special.)-First signs of possible trouble in the L. W. W. Greek strike of com mon labor in two of the Hoquiam mills developed at an early hour today, when about 150 of the strikers gathered in the railway yards here in anticipation of the arrival of a special train with a party of strikebreakers. The men had received a report that the mills were intending to bring in a large number of men on a special train to arrive in this city about 2 o'clock

this city about 2 o'clock.

The strikers congregated in the rail road yards about 1:20 A. M. and remained around the sheds and freigh cars until about 4 o clock. Every whis-tle of the engine of an arriving freight train, or of a switch engine in the yards toward Aberdeen was the signal for the men to draw together and prepare for the arrival of the supposed strikebreakers. The mill owners are not planning, they say, to bring in strike-breakers, as they are confident they can secure all the men they need in the city, and say they are not yet ready to resume operations on a large scale. Conditions in the strike are generally quiet. A big meeting of I. W. W/s and Greeks was held this afternoon at Finnish Hall, but these have been held daily and nightly since the strike began. Both mills have continued opera-tion of part of their plants since the strike was called.

Colds and How to Cure Them

When no additional cold is contracted a strong man will, as a rule, recover from a cold in about ten days' time without any treatment whatever. The trouble is he is almost certain to contract a fresh cold before he is rid of the first one and that is where the danger lies. This succession of colds or a prolonged cold is the forcumer or a protonged vold is the forerunner of catarrh, pneumonia and consumption. That is why all medical authorities say, "Do not neglect a cold." The most successful remedies for the cure of colds are those that aid nature, Chamberlain's Cough Remedy acts on this plan.
