ELECTRIC CENSUS OF PORTLAND.—In order to secure the necessary statistical information regarding electricity in Portland and vicinity, we have engaged a large number of high school boys, carefully chosen and recommended by their principals, to assist our regular force in making a house-to-house canvass of the entire city. These young gentlemen will visit your homes and places of business, and we hope the result of their efforts will lead to pointing out methods for the improvement of the service. It is our aim to give Portland the very best electric service possible, and for that reason a census of the useers and present non-users will be of great assistance. We respectfully solicit your kind co-operation in adding these young men in their work. Each representative will carry a credential card signed by the sales manager of the company.
