

Woman Denies Fear.

14

of Mulinomah County, and Vida Zackary. ters of "low," over Arizona, Louisiana, and STRICKLER - NEWMAN - To John H., the extreme Northeast, respectively. Withly destined to last forever, but which have to be continually rebuilt at huge expense to handle the increasing trade. France would do well, he says, to adopt the plan of using light struc-tures, which can be modified without much trouble when necessary. The present time, he believes, is a critical one for French trade in con-sequence of the vast economic changes which the canal will bring about, and be calls on his countrymen to study which the calls on his countrymen to study carefully the new conditions arising and concentrate their efforts on the re-organization and creation of centers of trade with the United States.

following that of the murder.
Woman Denies Fear.
Attorney Whitfield, who is conducting the cross-examination of witnesses for the defense, asked Mrs. Woolfolk if ther fear of Roberts had not led to his discharge by her husband. The witnesses denied that such was the fact. From all the witnesses who came in close contact with the defendant the defense is seeking to draw admission that Roberts was "queer," but so far there has been little success.
Beveral have stated on the stand that Roberts was "queer," but so far there has been little success.
Beveral have stated on the stand that Roberts asked many times for explicit directions on how to get to the road teading south along the river from Fortland. There also was evidence relative to a patient which Roberts decared he was going to get money to develop.
Acting on Judge Morrow's order of Friday, the defense to be produced tending to support this contert to making to support this contert to make the direct by them.
The REIGN OF HIGH PRICES
Population Increases 41 Per , Centi

Population Increases @1 Per .Cent; Production of Cereals 1 Per Cent.

New York Journal of Commerce. To those intercested in cost-of-living problem we advise perusal of the census statement published elsewhere, giving the production of cereals in the United States. It sheds an important light on this question. In the decade covered by the last census the population of the United States increased 21 per cent, while the production of cereals in-creased only 1.7 per cent and the value of cereals rose 50 per cent. The further such investigation re-garding high prices goes the more con-

The further such investigation re-garding high prices goes the more con-vincing becomes the proof that they are chiefly the result of demand exceeding supply. The gold theory does not ade quately account for present abnorman conditions. Not long ago statistics on the cattle supply in this country were published showing that there were 2,-400,000 less cattle in the country and qualely account for present abnormal conditions. Not long ago statistics on the cattle supply in this country were published showing that there were 2, 400,000 less cattle in the country and 1.200,000 less sheep than a year ago. This, of course, has much to do with the present high prices for meat. Such instances of relative scarcity could be multiplied almost indefinitely. In nearly all parts of the world there is relative scarcity of mean commodities scalt

Dealing With Strikers.

Atlantic. We paid off the men and inclosed in every pay envelope a letter stating that we should not fill the men's places but merely wait until they found out that all the unions in Chicago could not

but merely wait until they found out that all the unions in Chicago could not furnish them another job; after which, if they chose to come back, the old jobs would be ready under the old con-ditions. If they found other work and did not return in a reasonable length of time, we should feel free to start up with new employes, first giving each man ten days' notice so that he could, if he chose, apply for his old situation. So the shop remained closed for near-hy eight weeks. The unions picketed it in the meantime, but without reason. After six weeks the majority of the men indicated that they wished to re-turn to work, and we gave them the agreed ten days' notice. Before starting up, as many of the men expressed the fear of slugging, we agreed to put the property under the protection of the courts, and applied for an injunction restraining the unions and our union employees from picketing, intimidation and violence. Nevertheless, on the first day of re-sumption of work, two men were slugged. We caught the sluggers, brought them before the court, had them sentenced, and then had the sen-tence suspended during good behavior. We also furnished our men with police escort to and from work. These pre-cautions ended all difficulties.
