

LOU BEAUCHAMP OLDEST LECTURER

Temperance Talk at Gladstone Park Proves Interesting to 600.

"SUFFRAGE DAY" ARRIVES

Dr. Luther R. Dyott, Pastor of Portland Church, Will Speak on "Equal Suffrage as Justice."

Gladstone Park, Or., July 15.—(Special.)—Fred Emerson Brooks and Lou J. Beauchamp were the two veteran lecturers that delighted last Monday audiences this afternoon and evening.

Beauchamp appeared at the forum today in an address to about 600, along temperance lines.

"Equal Suffrage" set aside the hour from 4 until 5.

As soon after the luncheon hour as possible Miss Helen Varick Boswell, introduced by Samuel Hill, will give an address on social and industrial conditions surrounding the woman and the child at work in factories and offices.

As to the musical part of the program, Mrs. D. C. Rees, who is in charge of the musical part of the program, will give an address on "The Musical Part of the Program."

man in the employ of Secore Brothers, of Kelson, Wash., subcontractors having charge of the rock crushing on the Goldendale street work, was instantly killed last night about 9 o'clock by the premature explosion of a blast of 60 sticks of dynamite.

Had the explosion occurred half a minute later Mr. Secore and several men would have been injured and probably killed, as they were coming up to the scene of the accident with a ladder for another blast. Both men are residents of Kelson. Compton is survived by a wife and five children, who recently came to Goldendale to reside for the Summer. The body will be sent to Kelson for burial. Compton's family will get the benefit of the insurance.

WILLAMETTE UNIVERSITY SECURES EASTERN EDUCATOR TO HEAD ENGLISH DEPARTMENT

Dr. Emory N. Ferriss, of Salem, Or., July 15.—(Special.)—The controversy between Idaho and Oregon over interstate water rights is reaching such an acute stage that State Engineer Lewis today forwarded a letter to A. E. Robinson, State Engineer of Idaho, in which he declared that if an understanding cannot be reached between the two states he will make every effort to grant of state property by his office for diversion of water from Sucker Creek for reclamation of a large tract in Idaho.

Dr. Emory N. Ferriss, of Salem, Or., July 15.—(Special.)—Willamette University has added another instructor to the department of English Language and Literature for the College of Liberal Arts. Dr. Emory N. Ferriss, the latest addition to the growing faculty of Old Willamette, will act as head of this important department. Mr. Ferriss, after completing his high school course, graduated from the Philosophical Department of the Leander Clark college, Toledo, Iowa, class of 1904.

Industrial insurance law of the State of Washington, Ritter, the injured man, has a fair chance of recovery.

HILL BELIEVED IN MOVE

SOUTHERN PACIFIC ENGINEERS RE-SURVEYING SURVEY.

Work of Eight Years Ago Gone Over Again, Due to Activity of "Portland West Coast" Railroad.

SHERIDAN, Or., July 15.—A party of Southern Pacific engineers left here today to resurvey the old Southern Pacific survey from here to the coast.

The original survey was made some eight years ago and the present party is merely rechecking and checking the data as furnished by the original survey.

It is probable that when the electrification of the Southern Pacific proceeds this survey will be of great value to the Portland West Coast, which has a survey and large stretches of right of way through this section. It is said here that the Portland West Coast is merely a dummy corporation, operating for the Hill lines.

BILTMORE STUDENTS DUE

Forestry Will Be Studied Again in and About Marshfield.

MARSHFIELD, Or., July 15.—(Special.)—Dr. Schenck, president of the Biltmore School of Forestry, will arrive in this city tonight on a large class of forestry students.

The outdoor work in this locality concludes the college course of the forestry school, but before a diploma will be given the students must each work for six months for one of the logging companies and must at the end of that time show that he has given entire satisfaction to his employer.

He then receives his diploma, graduating him from the school. The Biltmore students were first brought here through an invitation from C. A. Smith and the companies of which he is the head.

Salmon Catch Fairly Good.

ASTORIA, Or., July 15.—(Special.)—There has been quite an improvement in the catch of salmon during the past few days and the prospects for the packing plants, while not large, are fairly good.

Some of the specimens weigh over 70 pounds. The quality is excellent and this year a much larger class will come to Coos Bay.

INTERSTATE WATER RIGHT WAR HEADS

Oregon - Idaho Controversy Reaches Climax and Action Is Demanded.

PERMIT MAY BE REVOKED

State Engineer Lewis Writes Gem State Officials That Understanding Must Be Found or Sucker Creek Water Use Halted.

SALEM, Or., July 15.—(Special.)—The controversy between Idaho and Oregon over interstate water rights is reaching such an acute stage that State Engineer Lewis today forwarded a letter to A. E. Robinson, State Engineer of Idaho, in which he declared that if an understanding cannot be reached between the two states he will make every effort to grant of state property by his office for diversion of water from Sucker Creek for reclamation of a large tract in Idaho.

The office of State Engineer in Idaho issued a permit for diversion of water from a source in Idaho to develop 60,000 acres of land in the Jordan Valley in Oregon. But under a recent decision of the Supreme Court of Idaho in the case of Walbridge and Bailey versus Robinson, the State Engineer is satisfied that the permit of the Idaho State Engineer is of no value.

State Engineer Lewis declares that a failure of the state to reciprocate in water grants will not only seriously affect the interest of such states, but will also injure the United States, as the land of the two projects involved is largely property of the United States Government.

Consequences Far-Reaching.

The far-reaching consequences of the decision are also difficult to measure at this time, as it involves practically all interstate water rights, when water is diverted from one state to use in another state, and if other states follow the Idaho decision it may affect Oregon on all sides.

In his letter to the State Engineer of Idaho, in which the anomalies of the situation are pointed out, State Engineer Lewis says: "I had known that the case of Walbridge and Bailey versus Robinson, recently handed down by the Supreme Court of Idaho, appears seriously to affect irrigation rights in Oregon, where the proposed water supply is to be obtained by storage or diversion in Idaho. If this case is as serious as it now appears to me, then some reciprocal state legislation must soon be enacted by our respective Legislatures to protect irrigation in our border territory. If this matter cannot be amicably adjusted, then I believe Oregon should endeavor to secure protection through some Congressional legislation."

The State of Oregon is interested in the reclamation of 37,870 acres of Government land in Jordan Valley which has been segregated under the provisions of the Carey act. The project also includes private lands, the total area involved being approximately 60,000 acres. It is proposed to reclaim this tract by water stored in a reservoir just over the line in Idaho. You have already very kindly approved a permit for the storage and diversion of this water.

Permit Believed Valueless.

"This permit, however, appears to be of no value under this recent decision. In your letter of April 1, 1912, you state that Idaho has passed no law relative to the diversion of water for use in adjoining states. The court held that it is necessary for adjoining states who claim a right under the laws of the state, which right is to be exercised beyond the jurisdiction thereof."

FIT AS A FUDDLE

A Reliable Means of Relieving Mental Depression, Languor, Sick Headache, Offensive Breath, Etc.

This is the time of the year when many people are dull and listless, suffer from torpidity of the liver, sour stomach, complaint that they have no appetite and sleep without being rested or refreshed.

This condition is deplorable and unless prompt action is taken, it soon becomes chronic, far reaching and serious.

When the human system becomes clogged or choked up with the products of imperfect digestion and assimilation, complete restoration of health can only be accomplished by the prompt and thorough removal of all effete material from the intestinal tract.

"For the weak and debilitated," says Dr. Philip Brooks, "a remedy is required which will relieve constipation without producing diarrhea and a commotion which I have found particularly beneficial in gastric or intestinal indigestion, sour stomach, heartburn and other ailments arising from either mal-nutrition or indigestion in the choice of food is the following: Purge the system with a cathartic as being more certain, prompt and agreeable in its action than any other which have used. For the aged or people of delicate constitution it will afford quick relief from your druggist 2 oz. Aromatic Extract of Rhamnus Purshiana, two oz. Tincture of Cardamom Compound, 2 oz. of Saffron and 2 oz. Aromatic Saffron. Mix all of the ingredients except the Saffron, taking three doses, add the remainder of the Saffron and continue taking 20 minutes before meals."

rest such right upon some specific legislative grant or authority, and every effort to grant of state property or a public franchise ought not to arise by mere inference or failure of the sovereignty to speak on the subject.

Recently a permit to store the waters of Sucker Creek in Oregon and to divert the same in Oregon for the irrigation of 20,000 acres of land in Idaho was approved by the State Engineer of Idaho in the case of Walbridge and Bailey versus Robinson, the State Engineer is satisfied that the permit of the Idaho State Engineer is of no value.

State Engineer Lewis declares that a failure of the state to reciprocate in water grants will not only seriously affect the interest of such states, but will also injure the United States, as the land of the two projects involved is largely property of the United States Government.
