Competition that competes, develop ment of the territory in which they operate and efficiency of service are three business hobbies of Mortimer Fleishhacker, who with his brother, Herbert Fleishhacker, of San Francisco are the principal backers of the North-western Electric Company, which is

Mr. Fleishnacker, a dynamic young man who is, perhaps, in his early '40s, but locks young enough to be taken for 30, is president of the Anglo-Cali-fornia Trust Company, of San Fran-cisco, and his brother is president of the Anglo & London-Paris National Bank. The two hold the controlling interest in the Great Western Electric Company, the principal competitor of the Pacific Gas & Electric Company, the so-called "power trust" in Cali-fornia. We could put them to work the next day if we could get the men. It will cost us fully \$1,000,000 merely to build our plant here. our plant here.

We will be ready to furnish power to Portland consumers probably within six or nine months after we have be-gun work here, though of course it will require longer to develop our plant to its highest efficiency. A musical education is the little lassies' greatest accomplishment and one of the greatest aids in life that any boy can have. A knowledge of music takes them into good company and opens the doors that would otherwise be closed against them. The ability to play will brighten many a gloomy day along life's journey. Now the path to a musical education is made smooth and straight. Under the terms of a huge purchase made by Eilers Music House,

## a number of the greatest piano manufacturers have agreed to pay outright for free music lessons.

The manufacturers will let you choose the teacher and they will pay for the lessons. This is the most revolutionary piano publicity ever launched.

One friendly teacher declared that this was as though a Carnegie had endowed a WESTERN COL-LEGE OF MUSIC.

The manufacturers, with a great many unsold pianos on their hands, let them go for prices amounting to no more than the cost of the labor and the material. They bear the names of the foremost makers in America. They are regarded as the standard by which other instruments are measured the country over. They have always commanded the highest prices. They have always commanded the admiration of critics and musicians. They have never gone a begging. But now, during this sale, you can get not only the finest pianos, but the lowest prices, easiest terms, and the free music lessons.
