CIRCULAR INTELLIGENCE

New York, N.Y., Sept. 3.

Good rains are expected in the interior of the State and in the Pacific Northwest, according to the United States Department of Agriculture. The rain will favor the growth of grain, particularly corn, and will also increase the supply of hay and other forage for livestock. The weather will be warm, but there is no indication of a prolonged drought. The outlook is favorable for the harvest of crops in the region.
