Passage of Amendment Regarded as Improbable-Newlands Suggests Adjustment of Charges to Obviate Objection.

WASHINGTON. Feb. 6.—Presidentelect Wilson's attitude on Panama
Canal toils and free passage for American Coastwise ships is expected to have
so important bearing upon the Senate's
sction on the Root amendment proposing the repeal of the free ships provision of the bill passed last August.
While the Democratic National platform ndvocated the remission of tolts
to coastwise vessels, several leaders in
the anti-free passage fight think some
Democrats may be willing to vote for
the repeal of the provision now so that
the entire subject may be left open
when Mr. Wilson takes office.

Committee Will Hear Root.

Committee Will Hear Root.

The Root amendment will be taken up by the Senate committee on interoceanic canals tomorrow. Senator Root will be heard later. It is possible that the heard proposed probable will be given to advocate of the Root amendment do not count upon securing enough votes in the committee to report it favorably, the proposal probably will come before the Senate, either through a minority report or upon the demand of some Senator.

The no-toll provision passed the Senate by a large majority. Unless several Democrats change their position the passage of the Root amendment does not appear probable.
