DEMAND FOR POULTRY IS SLOWER

Demand for poultry was not as keen yesterday as it has been recently, but receipts were not heavy, and dealers were not disposed to shade prices. The effect of the apple selling campaign.

Which will be inaugurated today, was seen on Front street yesterday in a material increase in the movement of the fruit. For several days apples have been going to the retail trade in good quantities, but yesterday the volume of the business was heavy. The total sales of the day probably exceeded those of any week heretofore this season.

The "Why" of Easter Eggs.

Woman's Home Companion.

Probably the fact that the egg holds, shut up in itself, the elements of future if the allife which may long be dormant and then come forth into vigor and beauty, into consciousness and activity—made it a proper symbol of the Resurrection. But of all the millions who have decorated eggs at the Easter season or played with them as a pretty toy, or fed upon them as a delicacy, very few have ever stopped to reflect upon the profound meaning of the emblem. In my own boyhood a breakfast of eggs was one of the unwritten regulations of Easter Sunday; the main question with the boys was the number per capita that could be consumed. Among us there was none of that dainty decoration with dyes and pigments which has given so much pleasure in old times and new. This fashion, in the opinion of an old writer, arose among the Christians from the joy occasioned by their returning to their favorite food after so long an abstinence from them during Lent. This is not impossible, for the egg was formerly counted as flesh and denied to good Christians during the Lenten season.

BREAK AT MINNEAPOLIS

tine Prices Decline With Predictions of Larger Shipments.

CHICAGO, March 5.—Wheat buyers lost courage today when confronted by more receipts at Minneapellis alone than there were at all primary points a year ago throughout the United States. In consequence the market closed weak, with prices ranging from last night's level to '\$c decline. Each of other leading staples made a net gain, corn is \$0 %c, cats is \$1 %c and provisions 50 to \$100 \$35 %c.

It was in the last half hour of trading that wheat suffered a tumble. Disappointment set in because demand from Europe was comparatively scant. Then came reports of a sharp break in the cash market at Minneapells and rumors of a sudden down turn at Buenos Ayres increased the bear sentiment during the final dealings. There also were predictions of larger shipments from Argentina for the week.

Primary arrivals of wheat today were 650,000 bushels, against \$13,000 bushels a year ago. Scaboard clearances of wheat and flour equalied 240,000 bushels.

There was a strong swell in the corn market, owing to gossip concerning supposed heavy sales for export. Prices, however, weakened a little after the break in wheat.
