though sentiment continues to be considered ative, especially as regards speculative it transactions. The International money markets are it slightly easier, as the outlook for pence in the Balkans has improved and the German position has been strengthened by accumu-iations of gold, drawn in part from the United States. Weather conditions were responsible for some decrease in activity in the shoe trade, but on the whole, retail distribution is large and the Spring outlook is favorable. New building operations are increasing as the Spring outlook is favorable. The textile industries and dry poods dis-tributing trade are in a wholesome con-dition. While there has been some shading of the price of wool, the woolen and worsted mills are exceedingly well employed. Prices of cotton and the leading grains tend downward, but there is little specula-tion. Reports from the principal trade cen-ters are for the most part satisfactory. The labor situation has improved. CONSUMPTION DEMAND IS GOOD Trade, Crop and Industrial Reports Are TRIAL FULL OF FIREWORKS the
