PORTLAND, THURSDAY, MARCH 27, 1913.

THE MOVING FINGER WRITES. destruction" when the forces of nature are let loose upon him. The philosophical historian had in mind the walls of the high buildings in cities which topple over during an earth-quake and overwhelm the fugitives are to tax themselves by turning a below. He was thinking, too, of the percentage of each mouth's salary into unrestrained passions of the vicious and criminal classes which selze the opportunity of a great catastrophe to No doubt the fires rage unchecked. greed and cruelty of bestial humanity are as merciless now as they were when Antioch was destroyed, and if

that have been erected since his day his own destruction." The conven-iences of civilized life become menac-At Dayton the electric connections

were severed almost at the beginning of the flood and the city was left in total darkness. The rain was falling from the pitiless sky and the waters of the Miami River were rising momently. Houses had begun to crumble under the impact of the stream that surged through the streets, and the shricks of drowning women and children rent the thick blackness of the night and storm, but not a ray of light shone from any window. The horror of death was multiplied by the secrecy of its work. Had the inhabitants pended on the primitive lamps of their refathers, this recourse, pitifully in. adequate as it is for routine use, would not have failed them in the moment of their extreme need. Progress car-ries with it penalties so severe that they sometimes seem almost to counterbalance its benefits. With the lights of the city the waterworks also failed and the people, deprived of food and were compelled to endanger their lives still more by drinking the contaminated waters of the which had swept into its current the efuse of hundreds of square miles of

Men are never prepared for the great catastrophes of nature. "Their times and effects appear," says the "Their meditative historian, "to lie beyond the reach of human curiosity." Partly because the effort to predict their recurrence is vain and partly because scurity always breeds carelessness of the future, these dire events take their victims unawares and their destructiveness is multiplied because they are un-foreseen. "In the day when ye think foreseen. "In the day when ye think not" the windows of heaven are opened at a distance wonder at the improvidence of the people of Dayton who dence of the people of Dayton who he flood without boats Man wore to rescue the drowning. forced to stand idly by and listen to the screams of perishing families. It was impossible to save them, because there were no boats. But in this particular the people of Duyton resemble all the rest of us. When the earth-quake and fire fell upon San Francisco the inhabitants were as unprepared as were the people of Antioch, in that old misery which Gibbon describes with such tragic calm. lava of Vesuvius has swept down its verdant slopes a hundred times, carrying death with it and leaving desolation behind, but as often as burning current cools, the peasants return with their vinehooks and plows and build new homes under shadow of death. Over the ashes where Herculaneum lies buried, with all its stricken souls, men till the soil and rear their families, careless of the frowning volcane which only waits for the signal from destiny to repeat the leed it did on that fatal morning long

Hope springs eternal. If it did not, how could we endure to live in this world, where nature plays with us like a half-tamed tigress ready at the taste of blood to spring and slay? Perhaps in our secret hearts we feel in-stinctively that death is so near, whatever we may do to ward it off, that precautions are idle. The valley of the is one of these narrow chasms which eeth sheet of parchment whereon God was to write the history of the world. The streams scarcely the surface. Some that now reach the Ohio flowed in those days toward Lake Erle. In the course of ages their chan- this movement on the necessity of a that no great harm could be done by neis were blocked by glacial drift and thus their way was determined for down through the plain, slope so affer the people something definite, gressmen would but bottle up their steeply that the rain falling upon them something better than a mere promise oratory, legislation could be secured gathers instantly into raging torrents. At the headwaters of the streams there are no lakes to receive and retain the surplus rainfall, so that in seasons of unusual downpour the accumulated certainly awaken the people of our floods are compressed between the largest city to the necessity for a sheer cliffs that confine the river and nothing can resist their frightful onset, widest the valley of the Miami only opens over forty miles of land. At its mouth it hardly affords space for the escape of the river in the Imagine, then, the fury of grouths. oned floods which have guth. ered there after days and days of Tammany, which has been built up ceaseless downpour such as the memory of man can scarcely parallel.

With his eye, which nothing escapes, fixed upon the melancholy panorama

when the human race has been com-paratively free from the scourges of nature, but he saw other times when all the woes of fire, flood, earthquake and plague seemed to accumulate as if to sweep man from the face of the intration. As it now is, that city is a earth. The reign of Justinian afforded by-word for corruption, inefficiency "It was disgraced," such a spectacle. "It was disgraced," says Gibbon, "by a visible decrease of the human species." Faith in Providence forbids us to believe that such misery can ever recur, but if it could our own times are ominous. What with wars and rumors of wars, with floods desolating the world from China through Europe to America, with earthquakes and strange climatic disturbances taking place everywhere and storms sweeping across entire states like demons of destruction, does it not

PENSIONS FOR FIREMEN.

While it means much to them, the tax levy asked by the firemen for the ald of their proposed pension fund is small in fact and infinitesmal in consideration of the long service to public duty, or the injury or the life that

must be given in return for it. Speaking of the earthquake which destroyed 250,000 human beings at Antiech, in the reign of Justinian, the historian, Gibbon, remarks that "man has industriously labored for his own destruction" when the forces of pature children will receive relief. The prochildren will receive relief. The proposed tax is but one-tenth sophical historian had in mind the walls of the high buildings in cities assessed valuation in the city. As a which toppie over during an earth-The fireman's work is trying, exact.

ing, dangerous. Moreover, it is in bewhich added to the horror of that half of the public safety and welfare night of death in Dayton were for He is a soldier enlisted in a public the most part set by looters. The cause and differs from most other city employes who come and go and in whose work there is no element of risk. when Antioch was destroyed, and if the pensioning plan is not greatly the historian were to behold the works different in principle from the compensation system recently enacted by he would repeat with new fervor his the State Legislature to which all propment that "man has labored for erty in the state will contribute a percentage of the cost. If it is a public duty to aid in the relief of workmen ing dangers when nature falls into one engaged in private employment who of those angry moods which now and are injured as the result of the inherent risk of their employment, it is then demonstrate her power and sweep herent risk of their employment. It is her puny creatures by thousands to a public duty to aid in the pensioning of firemen, for, aside from the in-herent risk of their employment, the public is the employer as well. In the compensation system the employer is taxed, while the employe contributes against the day that he may be maimed or killed. Practically the only difference between the two plans is that the fireman is to be pensioned after a lengthy term of service.

We can think of no sound argument for defeat of the pension bill and of many for its approval. Not the of these is the encouragement it will give to capable men to enter the serv-ice and remain there permanently.

ONLY SAPE WAY IS TO WAIT.

The Oregonian prints elsewhere today a letter written by an Indiana physician who has made a personal inrestigation in Europe as to the widely Friedmann consumption exploited cure, and who had opportunity also to see and know more or less about Dr. Friedmann. It is sufficient to say convinced of the curative value of the the specimen cases, nor of the entire sincerity of the discovery. It may be true that this Indiana doctor is much imbued with the indurated skepticism of his profession, and that he saw only what was dublous or incidental or unimportant and refused to see what was worth while. We do not know. We will not know for some weeks or some months whether the Friedmann serum is a miracle of scientific truth, or a great fraud, or a

but does not restore. help has touched a whole Nation, From hold her servants in tutelage. every part of the United States word has come that some poor sufferer had upon their social inferiority. Men do had his hopes revived by stories of the business with their inferiors and never wonderful medicine administered by the German doctor, and the trains are dinner party, but this women have not eyes filled with invalids on their way to as yet been able to do. Perhaps some cue the drowned-out Daytonians. the magic healer. They spread con-tagion everywhere; they endanger the tion will be mitigated when they lives of everyone with whom they come quire the gift of buying work and letin contact. All this would be borne ting the worker look after her own without protest, of course, if it seemed manners and morals. that their hopes were to be realized, in or in part, at the end of their wretched journey. But they pursue an ignis falnus. Dr. Friedmann tells them not to come now. Common prudence requires that they wait. If there is a remedy it will be brought to them.

The Oregonian reprints the letter of Dr. Walker for what it is worth. I hopes that Dr. Friedmann is all he claims to be and that his cure will really cure. But it is to be remembered that half of all the cases of bone and fistulous tuberculesis cure th selves, and it is this class of patients to whom Dr. Friedmann appears to give the most attention. It is well to be cautious and wait. The Government experts are at work and will re port after full investigation. Then we shall know the truth.

UNITED AGAINST TAMMANY.

Champions of good government in of promoting economy and efficience New York City have once more united in the work of Congress itself. When Miami, where the city of Dayton lies, for a municipal campaign. Republicans, Democrats and Progressives have and yet how time is frittered away the slow action of the tireless elements joined in the appointment of a comhave carved from the level surface of mittee, which will take steps toward the great Ohlo plain. Stretching from an effective programme and the nom-Lake Erie to the bed of the Ohio ination and election of candidates who River, in primeval times this plain was will carry it out. This is to be no mere temporary fusion of National partie for the occasion. It is to be the or-ganization of a new municipal party, which will combat with Tammany for control of the city.

Emphasis is laid by the promoters of positive programme, not merely a neg. ative one of opposition to Tammany, sion. But the subject need give The leaders would have the new party to take the offices away from Tam- at the extra session while Senate or

LETTING PUBLIC ENFORCE LAW.

Massachusetts will undertake to enforce the findings of its minimum wage commission by force of public opinion The various steps taken to ascertain the proper compensation of women workers in each employment are much the same there as in Oregon, but in-stead of the commission's order being obligatory on the employers, as in Oregon, its report is to be published in seem as if the evil powers of nature gon, its report is to be published in had been let loose upon us to blight the newspapers. It is hoped that public sentiment will cause the employers the works of man?

lic and how far the public will go in discommoding itself in order to establish what it believes to be right. We fancy that the people will accept as Balkan allies from securing territory sion. But will they walk to the more sion. But will they walk to the mer-cantile establishment that pays the minimum wage when one that does not can be reached three blocks closer? Or will they accept from the former some article with which they are not exactly suited in preference to one that does fill the need that may be obtained at Hence he urges his sons and daugh the latter? How long, too, will the public remember which are the good and which are the bad establishments In the days of Rome and in the Middle

These are questions that occur the moment but even if they may be answered favorably to the cause of the minimum wage there remain the great textile mills of Massachusetts which employ large numbers of women and minors and whose trade extends to the confines of the country. There, at least, the hopes of the working woman are resting on forlornly remote chance Massachusetts has gained some credit for being first of the states to enact a minimum wage law, but the honor, we fear, is an empty one.

POINTS ON SERVANT PROBLEM.

In the March number of the National Review an English woman of the working class discusses the prob lem of domestic service. She calls her article "A Servant's View of the Servant Problem." In England, as in the United States, the comfortable classes are finding more and more difficulty every day in supplying their house holds with efficient help. Much has been published as to the causes of the trouble, but most of it has been from the standpoint of the mistress

It is therefore novel as well as in Their appearance in literature with an account of their woes and aspiration is a strictly modern phenomenon. Nothing of the kind was ever seen in former centuries. Our ancestors were disposed to look upon domestic ants as a superior kind of cattle whose opinions were of very little importance, Only when the humbler orders of society broke out into such disorders as the peasant war in Germany or the rehere that Dr. Walker was not at all revolt of the English boors under Jack Cade did their betters condescend to new serum, nor of the genuineness of take any notice of their preferences. No doubt the new faculty of expres sion which the tolling masses are de-veloping will in the end promote the harmony of the world, though it may make some disturbance to begin with. Nothing is ever lost by increased knowledge and understanding.

The servant girl who writes in the National Review takes the ground that the relation between mistress and maid ought to be one of pure business. The The mere tonic, or lymph, which relieves, tress buys it. There their relations The girl's morals are no conend. think of their fitness or unfitness for a of their troubles over the servant ques-

WORK FOR CONGRESS TO DO.

Should President Wilson recommend action on, and Congress take up, all the subjects suggested for legislation at the extra session, the National legislators might easily remain in session until the date for the regular session next December. Already is said to consider asking for currency legislation as soon as the tariff is posed of. Congress has also been urged to legislate for Alaska. Now come the advocates of the bill pro-viding for an international conference on the high cost of living and those who desire an amendment of the Erdman act, under which railroad labo disputes are settled.

So good a case is made for promp action on each one of these subjects other-an inquiry into the best means we consider how much there is to do on trifles, on mere emission volume of words, on personal wrangles on displays of "smartness" by Individun! members, there appears to be

great need of such an Inquiry The high cost of living is likely to be so greatly affected by legislation on the tariff and the currency, which is promised at the extra session, and by other laws which may be passed before an inquiry could be completed. deferring action until the regular ses to no serious controversy, and if Con-House is awalting the disposition

And will Ages what we now call "classical" was they take the pains to segregate them strictly practical and what we call "the ling list? higher reason" was utilitarian. Those men lived for the things of their own day, why should we not live for the things of ours?

> Persons who bewait the disappear ance of romance from modern life simply betray their own mental blindness. There is as much romance in a train of cars with its bold and agile brakemen as there was in a feudal tournament, but some of us lack the eyes to see it. And what could be more romantic than an aviator coursing through the clouds in his flying machine? Our forefathers would have taken him for a sorcerer. The realities of our world are more romantic than the dreams of our ancestors.

There are 150 girls studying agriculture at Cornell University. When they graduate they will follow farming for Some of the most suca livellhood. cessful practical farmers are women. They have tried all its branches from poultry to cattle ranches and usually their determination and ready wit enable them to forge ahead. With systematic training women ought to farm better than men, who are often too teresting to learn what the servants set in their old, superstitious ways ever themselves think about the situation.

Secretary Bryan's Commoner exults over the reorganization of the Senate bit of his system: as a victory over the seniority rule. It was a partial victory, but the committee list shows that the veterans still hold their places on the principal committees. The Democratic caucus adopted Mr. Bryan's theory, but was cautious about putting it in practice. The progressives may succeed in sweep-ing away seniority, but the battle they have won was only the first of the campaign.

Referring to Colonel Roosevelt's statement that the only place for good, honest men and women who are progressives is in the Progressive party. the Commoner asks: How can he keep his

Stars and Starmakers By Leone Cass Bner.

Florence Hart, a Portland girl an sister of Harry Hart, is playing leads with the Egam Lyceum Stock Company in New Britain, Conn., where

though bearing the John Cort brand as producer on the paper, the show was Miss Fealy's and Mr. Durkin's own of physicians, patients and friends. Mr. Cort loaned his name property. Mr. Cort loaned his name for the value it might give the piece had it played the Cort circuit as expected.

"The Right Princess" cost its prin cipals some money, and also a stock engagement at Wilmington for Mr. Durkin. He relinquished his hold upon the New Jersey proposition to join Miss Fealy in the starring tour.

bit of his system:

By reducing my working day to an absolute system, and living with clockwork regularity. I have learned to utilize every minute of every day, and by doing so I find time, in addition to my theater work, to read a good deal, write occasional verse and music and even drive an automobile. The latter furnishes my wife and myself with plenty of the outdoor air we should otherwise be deprived of. To reheams a play every morning, give two performances of another the same day, at the same time studying a new part, is certainly hard work, but with long working sensons practically assured, and the possibility of a long and thorough rest during the Summer. I find this side of professional work much more interesting and profitable than the "rehearse-six weeks-and-play-two," of which we hear so much just now.

Shed on School Grounds.

SHERWOOD, Or., March 25 .- (To the SHERWOOD, Or., March 28.—(To the Editor.)—Can a person take a horse shed away from school grounds, if he put it there two seasons ago and wants to sell it now? Can the directors keep him from taking it away? put tors keep

In the absence of agreement to the contrary, the shed becomes a part of the real estate and belongs to the

MAN'S PART IN THE SOCIAL EVIL False Promises, Liquor and Joy Rides Main Causes of Girls' Downfall.

PORTLAND, March 25.—(To the Edi-tor.)—The Oregonian's article headed. "What Makes Girls Go Wrong" is timely. Men are responsible in 90 per-cent of the cases. No need of arguing

the point.

The writer was active in work at the writer was active in work at the do with the The writer was active in work same years ago that had to do with those confined in julis, prisons and convict camps. Nearly all girls and women with whom we had to do said that "promises" of men were the principal cause of a girl's misstep. Most of them said it came about through the dance hall or places where liquors were served.
