What Does This Mean To Real Estate?

E UROPE supports 360 people to every square mile. America to the square mile.

Just think what this means to the future values of American real estate. For it's the people who make the values every time.

Is it any wonder that Morgan's wise old father told him to bet on the future of America. Is it any wonder that every capitalist, every man with foresight and farsight is betting on the future of America.

As you walk about the town today there isn't a paving stone you step on that hasn't got to be more valuable in the future than it is today. You can't walk across a vacant lot that hasn't got to increase in value as the years go by. You can't look at a three-story building that hasn't got to become a six-story building with the sure progress of time.

There isn't any place you go nor anything you buy that will not increase in value as the years go on. The very property failures of yesterday are the successes of today. And here in the Want Ads of this paper that you are reading now

is the real estate market place of this city. Every one of these little real estate want ads is an opportunity to buy or sell or to lease to advantage. You will find property here in the heart of the city and on the fringe; business property and residence; improved property and unimproved; income-bearing and investment property; every genuine offer of every kind is here. See what opportunities are offered today.

And when you find the chance that interests you most, please. mention The Oregonian when you answer the ad.
