

# RAILWAYS REFUSE DEMANDS OF MEN

## Increase Asked For Declared Equivalent to Capitalization of \$425,000,000.

### PUBLIC MUST PAY IN END

Managers Say Employes Have Everything to Gain and Nothing to Lose, and Hope to Win by "Splitting Difference."

NEW YORK, May 1.—Managers of Eastern railroads, in a reply to the Order of Railway Conductors and the Brotherhood of Railway Trainmen, today refused the men's demands for higher wages.

It was announced today that another conference of representatives of the railroads and of the trainmen and conductors would be held tomorrow, when the men will make response to the reply of the railroads. It was reported that new demands had been formulated by the men, but A. B. Garrison, who has been acting as spokesman for the employes, said it was not their intention to draw up a revised set. Mr. Garrison will be present at the railroads at the meeting tomorrow, and afterward a formal reply in writing will be sent to the conference committee of railroad managers.

**Increase Means \$17,000,000.**  
"The wages and working conditions which you request," says the reply, "would increase the pay of the 100,000 conductors and trainmen of the railroads in the United States approximately \$17,000,000, or 20 per cent per annum. The increase would be equivalent to placing on these properties a lien of \$425,000,000 of 4 per cent securities, which have preference over first mortgage bonds."  
"If the railroads are forced to pay extravagant wages to men in train service, the burden must fall on the public."  
"Already the traffic of a growing country has overtaken the existing facilities and the heavy burdens incurred through ill-advised legislation, such as extra-crew bills—for which the Brotherhood of Railroad Trainmen is alone responsible—have forced on the railroads, and consequently on the public, needless expenditures of millions of dollars annually."  
**Demands Deemed Too Pressing.**  
"All of these factors are making it impossible for many of the roads to provide those facilities which prudent foresight demands and which the interests of the public require."  
"In making demands for extravagant wages—wages entirely out of accord with the railroads' obligations as a whole—railway employes apparently put on the assumption that a strike would never be permitted by the public. They seem to think that if a strike is to be avoided, the railroads must give way—that the public will force them to give way, believing that arbitration must take place, and that in the end the splitting of difference between their demand and the wages they receive will result in their favor."  
"In other words, the employes have undertaken to gain and nothing to lose."
