"1219th FRIDAY SURPRISE SALE"

OUR FREE EXHIBITION OF THE Panama Canal

Working Model in Actual Operation

—has occasioned varied and interested inquiries as regards the designing and mechanical construction of this wonderful topographical display of the Panama Canal and Canal Zone.
It is truly a work of genius—this working model—and was designed and supervised in construction by GUSTAV H. MULLDORFER, for the past five years a resident of Portland. It required the continuous efforts and thought of ten men, including artists and electricians, for the period of three months to complete this model of the Panama Canal. It is, in every sense of the word, a "MADE IN OREGON" display, and requires five electric motors to operate it. You will be well repaid for a visit to our Fifth Floor today to see this display and listen to the ten-minute lecture. It is an extraordinary attraction and is **SHOWN WITHOUT CHARGE.**

A Festival of Surprises Awaits You Here Today!
