

CHRISTIAN SCIENCE
FEAT IS EXPLORED

Bicknell Young, in His Address,
Says Creed Is Scientific
Because Spontaneous.

LECTURE TO BE REPEATED

Over 1500 Hear Exposition of Mrs.
Eddy's Teachings—Process of
Healing Is Discussed
by Speaker.

An audience numbering more than 1500 taxed the capacity of the First Church of Christ, Scientist, last evening, where Bicknell Young, C. S. B., lectured on Christian Science. The lecture will be repeated this evening at 8 o'clock. Mr. Young was introduced by Frank W. Waters, who referred to the healing work being accomplished by Christian Science, citing as one instance his own healing from chronic stomach trouble of years standing. Mr. Young spoke in part as follows: "Nobody has been asked to believe in Christian Science, and nobody ever will be asked to believe in Christian Science. It is not a proselyting process, but explains divine principle. I should no more think of urging a person to believe in Christian Science than I should think of asking him to believe in the multiplication table. Neither one nor the other is in the realm of belief. We are not giving Christian Science lectures for the purpose of asking people to believe in it; we are giving Christian Science lectures because we want to help mankind because we want to help ourselves, and have realized that the best way to help ourselves is to help others. No human being can be selfish and ever put off mortality. For one to attain immortality, which is the natural heritage that God has provided for all, we shall have to be unselfish. Jesus did not voice a mere religious admonition but a scientific necessity when he gave the rule, 'Thou shalt love thy neighbor as thyself.' He also said, 'Deny thyself and follow me.' "It takes a great deal of instruction to convince the average human being that the word 'God' does not mean something remote or inaccessible. Now we can think certain ideas which reveal God. We have seen that these ideas reveal power because God and power are one. They are God with us, and therefore power with us. We can think of our bodies, and as a matter of fact we think of them a great deal too much. Nevertheless, so long as that is the tendency, it ought not to be difficult for us to understand that the true thought of what God is may affect our bodies, since some kind of thought is doing something to our bodies all the time. We talk because of mind; and talk and think, and wink our eyes, because of mind, and do everything else we are doing because of mind, and we do absolutely nothing because of matter, for matter cannot think nor talk nor walk by itself when thought is in it.

"To further understand the influence of thought on the body we should remember that it is impossible that what is governing the human body, ordinary speaking, is not a mind inside of it but the great mass of human belief which is entirely outside of the body. All that we do is done by mind, and we do it because of mind, for matter cannot think nor talk nor walk by itself when thought is in it.

"The human body never gets ill because of its capacity to do so. To put it exactly as we can, the human body does not know enough to suffer. Deprived of mind it never suffers. In the same way, and in her other works, Mrs. Eddy has most clearly set forth the fact that it is the human or mortal sense of things that suffers. The mortal mind, so-called, is the sufferer, and she has enabled thousands of people through her books to feel that immortal mind heals. The objection made to this is often to the effect that you cannot have thought without a thinker, and this contention is based upon the supposition that a person is a thinker, and that the thinker which he contains, Christian Science shows that mind is infinite, cannot be contained, therefore that a person is not a thinker. The mortal mind is the primary and only thinker. When we learn to think with that mind which Mrs. Eddy has called the 'Heavenly Mind,' we are able to see that the person who is not a thinker, but who is the primary and only thinker. When we learn to think with that mind which Mrs. Eddy has called the 'Heavenly Mind,' we are able to see that the person who is not a thinker, but who is the primary and only thinker. When we learn to think with that mind which Mrs. Eddy has called the 'Heavenly Mind,' we are able to see that the person who is not a thinker, but who is the primary and only thinker.

"If a human being un instructed by Christian Science should hear of a wonderful machine to which he could resort at any time and have it work in his behalf to remove his evil tendencies and any of his diseases, he would be lost in admiration at this extraordinary invention and he would exclaim, 'What a wonderful scientific discovery!' It goes without saying that no such machine has been discovered or will be, for the simple reason that diseases and sins are too deep seated to be reached by any mechanical means. There was something, however, discovered in the year 1866 by a New England woman whose thought was clear enough to perceive facts far more scientific than any which had been revealed through the evidence of the senses, and who was strong enough of purpose to set forth these thoughts in such a way that they could be discerned and practiced, which was of far greater importance to the human race than any other discovery that has ever been made. Christian Science as given to the world by Mary Baker Eddy is not less scientific because it is not mechanical or material, and it has the advantage of healing the diseases considered incurable, a thing which no material or mechanical thing could do."

CLUB IS AFTER PARK SITE
East Side Neighborhood Proposes
Bond Issue to Buy Land Desired.

The East Seventy-second Street Social Club has renewed its efforts to

Get a park in the South East Side district. The co-operation of all other improvement associations is asked. At the meeting held Wednesday night it was decided to ask all other clubs in the neighborhood desiring a park to select a site and secure an option on the land. When all clubs have made their selections they propose to initiate a bond issue covering the cost of the sites so selected.

A three-inch reinforcing water main was laid in the South East Side district south of Powell Valley road, and a committee was appointed to submit the matter to the Commissioners. Officers elected for the ensuing year are as follows: President, J. B. Straw; bridge, vice-president, A. W. Miller; secretary, Peter Wisner; corresponding secretary, Ruth Reiter; treasurer, F. W. Berkheimer; directors, G. P. Olson, L. Rossall, Frank Lindman and J. Jensen. These officers will be installed at the next regular meeting of the club.

2500 DO SUMMER STUDY
GOOD ATTENDANCE REPORTED
AT VACATION SCHOOLS.

Misunderstanding on Part of Parents Announced as Probable Cause of Shattuck's Closing.

More than 2500 children are attending the Portland Summer schools this year. This report was submitted to the School Board yesterday by L. R. Alderman, Superintendent of Schools. Of this number 475 are in the Ladd School, 152 in the Trades School, 450 in the Holladay School, 170 in the Lents School and about 200 in the various manual training schools. One discordant note appeared in this otherwise encouraging report. It was that the attendance at the Shattuck manual training school has been so small that it was necessary to close it. Only three or four boys attended. It is believed that this small attendance was due to a misunderstanding on the part of the parents and pupils. The manual training departments at Oakley Green, Mount Tabor, Peninsula and other schools are well attended, however.

The board awarded the contract for installing the fixtures in the rooms to be occupied by the School Board in the new Courthouse to the Union Store Fixture Company on a bid of \$250. Through the inefficiency of a former engineer in the new Lincoln High School one of the boilers has become damaged and repairs must be made. Contracts for repairs on the Woodmere and Peninsula schools were awarded to the W. G. McPherson Company on a bid of \$9875.

The application of Benjamin Brick for the official indorsement by the Board of the Juvenile Press, a paper that he proposes to publish in the interest of the youth of the city, was received. Action was deferred. A representative of the Russell Sage foundation explained to the Board the merits of moving picture education. It is probable that the plan will be tried here.

BODIES BROUGHT TO CITY
SEARCHERS TELL OF FINDING
MR. AND MRS. C. B. SMITH.

Funeral Arrangements to Be Completed on Arrival From Minneapolis of Dead Woman's Mother.

Particulars of the finding in the snowfields of Mount St. Helens of the bodies of Mr. and Mrs. C. B. Smith, of Portland, who perished in a landslide on the mountain July 6, were brought to the city early yesterday by the party of searchers who brought the bodies by automobile from the scene of the disaster. The body of Mr. Smith was found late Monday night at the bottom of a 300-foot precipice on the southwest side of the mountain. The body of Mrs. Smith was found about 1000 feet below and to the south of that of Mr. Smith. Apparently Mrs. Smith, after being separated from her husband, stepped on an ice slide and was pitched down the mountain side. Her slide was stopped by a pile of brush. It was apparent that she was unconscious before she reached the bottom of her long slide. The body was a short distance above the timber line of the mountain. The bodies are at a local undertaking establishment. The funeral, which will be arranged as soon as Mrs. Newkirk, mother of Mrs. Smith, arrives here from Minneapolis. The arrangements will be made of Guy H. Corliss, an old-time friend of the Smith family.

EXTRA POLES ELIMINATED
Common User Provision to Be Adopted for Stringing Wires.

Electric light and telephone poles throughout the city so placed that the present multiplicity of lines on some of the streets can all be fastened on the extra poles, in a system of improvement which will be worked out by City Commissioner Daly as soon as possible. The plan was made yesterday following an investigation of numerous complaints regarding unsightly poles in the streets of the residential districts. At present each utility company maintains its own poles. It is believed by Commissioner Daly that the new charter gives the city ample authority to enforce a common-user provision requiring all companies to use one set of poles. The poles will be owned by all companies jointly, each paying a pro rata share of the cost of maintenance.

LIQUOR LAW IN COURT
Physician Alleges He May Prescribe
Whisky in Dry Territory.

MARSHFIELD, Or., July 17.—(Special.)—Judge J. S. Cole is wrestling with a new problem in the Oregon prohibition law. Dr. Oglesby, of Cottage Grove, has just entered a demurrer to an indictment charging him with the illegal traffic in liquor by making a practice of issuing prescriptions to all who apply, alleviating their thirst. Cottage Grove being a dry town and the drug stores the only place liquors may be obtained there. The grounds for the demurrer are that the indictment does not charge a crime, as the Oregon law does not fix any penalty for a physician issuing prescriptions to whom he sees fit.

PIER WORK STARTS
Motorboat Landing to Be at
Foot of Stark Street.

HARBOR PATROL IS SHIFTED
Commission of Public Docks Takes
Advantage of Present Stage of
River to Start Operations
With Big Pile-driver.

Actual construction work on the motorboat landing and pier at the foot of Stark street, for which a contract was awarded early in the Spring by the Commission of Public Docks, will be inaugurated immediately and an order went forth yesterday for all launches tied up there to find other moorings.

The motorboat landing will be a large float and an adjustable slip at the end of the pier will permit free use of the landing facilities at all times. The pier will be of steel and concrete and while there will be roadways on each side as entrances to adjacent docks, there will be no pier for a small building to be utilized as waiting or rest rooms.

Filing was ordered yesterday and a big pile-driver will begin operations at once. It is said that hardpan found there has caused difficulty in the past in getting stiling sufficiently deep to hold, and submersible timbers remaining from the slip of the old Stark-street ferry may cause delay. The pier will be the first actual building carried on under the Commission of Public Docks and it will be a substantial structure. It will be on a level with Front street, and the highest freshets will put it out of commission.

VALLEY MILLS WANT DOCKS
Commission Will Hold Public Hearings on Wharves Next Week.

Whether the Commission of Public Docks will make provision in the construction of wharves for the accommodation of lumber to be determined after a session to be conducted July 24, at which time a delegation is to be present from the Willamette Valley Lumbermen's Association. David Davis, of that body, was before the commission yesterday, and advised that an open dock will include here, much of the material from the Valley would be sent to Portland for shipment. It was decided to communicate with George T. Collins, at Dallas, a director in the association, and request that a committee be named to confer with the commission.

The Commission heard from the Port of Portland Commission as to dredging in front of dock site No. 1, which will be started in a week. Commissioners Kellaher and Moores reported with reference to the Victoria dock property, which was offered the Commission, that the dock would include a strip 30 feet wide and 170 feet long as a roadway to reach the dock that will be a continuation of Dixon street. W. P. Honeyman, H. P. Burnett, arbitrators appointed to determine the damages to the Emerson Hardwood dock, which is in the process of being vacated, reported that the dock would include a strip 30 feet wide and 170 feet long as a roadway to reach the dock that will be a continuation of Dixon street.

ORPHANS WILL RIDE MONDAY
Speedy Steamer Hassalo to Carry
Juvenile Excursion.

For the next week the O.-W. R. & N. marine greyhound, the steamer Hassalo, will be the most talked-of vessel in the harbor, for she is to carry 200 orphans of the city on a free ride Monday afternoon when it will be loaded through which news filters among juveniles, that will not carry the glad tidings. It is not to be an open or free-for-all event, as the guests are to be those harbored by different institutions which have a mission to look after the parentless youngsters.

PASSENGER RUSH CONTINUES
Regular and Independent Carriers
Unable to Handle Throng.

Six steamers of the Independent fleet are to be dispatched from Portland during the coming week under the banner of the San Francisco, Portland & Los Angeles Steamship Company. Frank Bollman, agent, and he says that it is doubtful if the demand for accommodation could be fulfilled.

BRIGAVIA IS HEADED HERE
Hamburg-American Liner Leaves
Singapore for Portland.

Fritz Kirchhoff, Portland agent of the Hamburg-American line, was advised that the liner Brigavina had sailed from there for Portland July 15, and the German ship Harvestude had arrived there from Plymouth, July 17. The liner also comes here and will load grain for the United Kingdom.

To increase the steaming radius of the G. K. Wentworth, of the Hosford fleet, additional oil tanks were installed yesterday. To load more Oriental cargo the Royal Mail steamer Harpalace shifted yesterday from the Crown mill to Montgomerly dock No. 2. Her hull having been cleaned and painted and repairs made to her stem formerly the ship had sailed yesterday from the Oregon drydock to the North Pacific mill, where she will work a lumber cargo for Suva. Digging in front of the dock of the Associated Oil Company having terminated yesterday that the German steamer Brigavina, of that fleet, had departed from Singapore for Portland July 15, one day behind schedule. She is bound from Hamburg and is to arrive here September 8, sailing September 16. The steamer C. Ferdinand, which is to arrive by July 30 and depart August 7. That the former rates on wheat and flour to the Orient will be restored August 16 is certain, says Mr. Kirchhoff. It was thought by some exporters that owing to market conditions the steamship lines would not return to the former standard in advance of the free movement of new crop cereal, as the charges were dropped late in the Spring as an inducement to ship during the slack season. They assert that more buying would be carried on by Japanese interests, particularly under the present rates.

PAVING MAY WAIT
Main Extension Fund Almost Exhausted Now.

LAWYER SEEKS LOOPHOLE
Attorney La Roche Looking for Law
on Which Public Utility Certificates May Be Issued to Re-fill Empty Treasury.

Although many suggestions have been made by city officials, no practical way has been found by City Commissioner Daly to raise money for the extension of the city's water system. With the City Attorney and other lawyers holding that public utility certificates cannot be issued, and the charter clearly declaring that no bonds, water mains in advance of the paving of the street. If water main extensions are stopped it will not be possible to lay paving in many important streets of the city where water mains have been proposed but have not been laid. At present there are approximately 10 miles of streets in which there are no mains but upon which contracts for paving have been let. This work, it is said, will all have to be held up as well as much other paving which is contemplated.

MOVEMENTS OF VESSELS
PORTLAND, July 17.—Arrived—Steamer San Jacinto, from Ventura; steamer Breakwater, from Coos Bay; steamer Roma, from San Luis; steamer Willapa, from San Francisco; sailed—British steamer, from Balboa via Stella and San Francisco; sailed—British steamer, from Balboa via Stella and San Francisco; sailed—British steamer, from Balboa via Stella and San Francisco.

COLUSA IS OFF FOR BALBOA
Grace Liner Lowers Records for
Day's Work and Full Cargo.

That which was cleared yesterday with 3,500,000 feet of lumber loaded here the British steamer Colusa, of W. R. Grace & Co.'s line to the West Coast, to have over 5,000,000 feet aboard when she leaves the river, as she dropped down to Stella last night, where she will work 350,000 feet and take on a shipment of piling from the North Pacific mill Wednesday evening and while two gangs worked during the night a full force was engaged yesterday and she took on approximately 825,000 feet. The steamer reached the city Sunday morning and began work at once. It is expected she will be on her way to sea tonight, in which case she will not only have broken all records for loading the largest amount of lumber in a day here and in taking on so large a cargo in six days.

MARINE NOTES
In a bill of sale filed at the Custom-house yesterday the ownership of the river steamer Modoc passed from the Lewis River Navigation Company to the Sound Packet Lines, of Puget Sound. The steamer is at Supple's yards being prepared for her voyage to Puget Sound. Another bill of sale was filed concerning the steamer Monarch, formerly the Chat R. Spencer, which is now in the name of her original owner, Captain E. W. Spencer, who has been disposed of on an attachment in a day here and in taking on so large a cargo in six days.

GIRL OF 15 PLAYS FUGITIVE
Lassie Runs Away From Home and
Enjoys Eluding Brothers.

GOLDENDALE, Wash., July 17.—(Special.)—Maggie Watson, 15-year-old lassie who recently ran away from her home to her parents' near Indian Springs in the Simcoe Mountains, following a quarrel with her mother over the correction of a younger sister, was brought back to her home today by her brother. The girl left home riding a roan cow-pony with a shepherd dog for a companion and led her people a merry chase before she was finally detained by the Sheriff at North Yakima upon advice from Sheriff Fred Smith, of Klickitat County.

Wife-Deserter to Be Returned.
ONTARIO, Or., July 17.—(Special.)—Sheriff Dan Kerfoot left here today for Starbuck, Wash., where he goes to

MCCASH to Head Spokane College.
SPOKANE, Wash., July 17.—I. N. McCash, of Cincinnati, today accepted the presidency of the Spokane College. Mr. McCash is secretary of the American Christian Missionary Society.

bring back Will R. Stout, of Vale, who has been arrested at that place for wife desertion. He left a wife and family in Vale in poor circumstances.

Logger Commits Suicide.
ABERDEEN, Wash., July 17.—(Special.)—Ben Morgan, aged 69, for three years an employe of the Polson Logging Company, committed suicide last night by cutting his throat with a razor. His body was found at 5 o'clock this morning by the camp cook when Morgan did not respond to the breakfast call. He had been drinking and no other reason can be ascribed for the act. His relatives are not known.

The Joy Of
Coming Motherhood
A Wonderful Remedy That is a Natural Aid and Relieves the Tension.

Mother's Friend is the only remedy known that is able to reach all the different parts involved. It is a penetrating external application that the formula of a noted family doctor, and lubricates every muscle, nerve, tissue or tendon involved. By its daily use there will be no pain, no distress, no nausea, no danger of laceration or other accident, and the period will be one of supreme comfort and joyful anticipation.

Mother's Friend is one of the greatest of all helpful influences, for it robs childbirth of its agonies and dangers, dispels all the doubt and dread, all sense of fear, and thus enables the mind and body to await the greatest event in a woman's life with untrammelled gladness.

You will find it on sale at all drug stores at \$1.00 a bottle, or the druggist will gladly get it for you. Mother's Friend is prepared only by the Bradford Regulator, 121 Lamar Bldg., Atlanta, Ga., who will mail an instructive book to expectant mothers. Write for it to-day.

DRUNKENNESS
BEING WIPED OUT
This means thousands of men who are discouraged, helpless and useless as a result of drink habit are being restored to sobriety and usefulness, and are again making life endurable for their unhappy—in many instances destitute—wives and children. This wiping out of drunkenness is being accomplished by the Neal Drink Habit Treatment, which is successfully administered at sixty Neal Institutes, and which removes the craving for drink in three days, without the use of painful, dangerous hypodermic injections.

Call, write or phone for full particulars and for proof that the Neal Treatment will make you a sober man. The Neal Institute, 340 College Street, Portland, Or., Marshall 2400.

DRUG HABIT SUCCESSFULLY TREATED.

A 7% INVESTMENT
FOR SALE
Owing to illness and old age, will sell 140 shares of guaranteed cumulative preferred stock in established high-class flourishing Portland commercial institution. Par value is \$14,000 (\$100 per share), yielding a guaranteed 3 1/2 per cent semi-annual dividend; better than bank stock. Will sell in whole or in part in amounts of \$1000 or more at a liberal discount. Address or call V. A. CRUM, Atty., Suite 421, Chamber of Commerce Building.
