Wheat Yield Promises to Be Good: Corn Is Uncertain. Money Is Easier.

HEAT CUTS DOWN TOTALS

Railroads in Good Shape to Handle Grain-Losses Due to Weather in Kansas, Nebraska and Oklahoma May Extend East.

CHICAGO, Aug. 3.—(Special.)—Secretary McAdoo's offer to deposit \$25,000,000 or even \$50,000,000 of the Government funds with the banks of the West and the Southwest this Fall removed the last vostige of fear about the financing of the crop movement. This proposition, following his recent announcement that the Treasury Department was ready to go to the limit in the issue of emergency currency if that should be necessary, was accepted as the best evidence that the Government was ready and willing to assist the business interests at need in the most practical way possible.

the business interests at need in the most practical way possible.
Fairly adequate provision has been made for commercial paper maturities during the Fail months, and there is less anxiety on that score than there was a short time ago. The deposit of Government funds will make it easier for the banks to grant renewals on loans and without interfering with the crop-moving requirements. Furtherways the recent heavy movement of crop-moving requirements. Further-more, the recent heavy movement of grain has released considerable money that had been tied up and will now be available for the maturing crops.

Good Wheat Crop Expected. As to the crop itself, there is less certainty now than there was a week ago. Recent dry weather and hot winds out down the corn in several important localities. But all indications point to a bumper crop of fine quality wheat in the United States. The Winter wheat crop has already justified these claims, and sufficient progress has been made and sufficient progress has been made on the Spring wheat to show that, barring harvest accidents, it will be a fair average and large enough to swell the country's total crop to a record

The Winter wheat crop was large enough, with the talk of tight money prevailing at that time, to depress prices to an export basis and to result prices to an export basis and to result in the largest sales aboard in July that have been made in a similarly brief period in years. Winter wheat, which ripened before the period of sensational heat prevailed over the country, appears to be the only one that has escaped from its blasting effects. A bumper crop promise indicated for several grains a menth ago has been turned into a full, a fair or even a light average outlook. Fortunately last year's crops were phenomenally large and there is a larger carry-over from them than usual.

Corn Crop Uncertain.

At this moment the corn crop is going through a period of great uncertainty. There is the possibility even of a great disaster, but with thinely rains a fair or even a full crop may be produced. All possibility of the bumper crop that was promised a month ago has vanished. The intense feverishness shown in the markets during the last 10 days was born of the fear that the large producing states cast of the Mississippi River may share the fate that appears now to be conceded for those west of the Missouri.

Almost "blow-pipe" heat with strong winds in the latter part of July had the natural effect on a large share of

the natural effect on a large share of the Kansas, Nebraska and Oklahoma crops. The unusual heat in the entire corn belt, along with deficient reserves of moisture in the soil, have put the op in a critical position. The losses the three states named, which pro-uce a total of less than 500,000,000 ushels, romise to extend to five other

# before; he personally selected the chiefs of bureaus in his department, and he picked men for their competency, and not because of their political indorsements. The President gave him a free hand, and he used it. Secretary Lane will have important recommendations to make to Congress at the regular session next Winter, and if the Democrats in Congress have as high regard for the Secretary's judgment as do Western Senators and Representatives who have had business with him, the much-talked-of revision of the land laws will be at hand. Garrisch's Policy Indorsed.

Garrisch's Policy Indersed.

Secretary Garrison has pursued a policy in the War Department that has met with favorable response to the country, and yet it is a strange fact that the War Secretary has gone contrary to the policy heretofore pursued by the Democratic party in Congress. He started in by retaining General Leonard Wood as chief of staff, over the protest of Democratic politicians, who had sworn to "get Wood" when the Administration changed. Secretary Garrison not only retained General Wood, but gave his approval to the important Wood policies, and unblased "BLACK FLEET" INVADING

### Some Persons "Flinch" When Truth Hunts Them

"If any rian is able to convince me and show me that I do not think or act right, I will gladly change, for I seek the truth, by which no man was ever injured."-Marcus Aurelius, Roman Emperor.

Some shrink and try to close their eyes and ears to the haunting fact that the little 21/2 grains of Caffeine in every average cup of coffee is the demon which relentlessly pursues and starts various ailments, such as biliousness, headache, nervousness, sleeplessness, bowel trouble, heart failure and a long string of aches and ails, taking one form in one person and another in another.

The effect of repeated doses of coffee, on those who are susceptible to caffeine poisoning, is so complex that it is difficult to foretell where its hurt will be most serious; in Heart, Head, Eyes, Nerves or

The stroke of trouble will come somewhere if the daily doses are persisted in.

Of course if anyone prefers to treat his body in

that way it is useless to suggest relief. Let him "folow the trail" until badly wounded.

Some go so far they can't get back to health. Others quit the foolish, losing game before fixed chronic disease sets in.

There is a mighty army of sensible ones, however, who have bravely tested the truth with their own bodies to see whether or not it was the truth that coffee caused their ailments.

It's an easy test. Quit coffee absolutely for 10 days. Take Postum hot and well-made and keep track of the change toward health day by day.

It's the most exquisite pleasure in the world to be perfectly well with all the delicate and beautifully adjusted machinery of the body working in harmony, not interfered with by drugs, one of the most insidious and deceptive of which is caffeine in coffee

This is Truth.

Meet it bravely with head up and a hearty handclasp.

Truth thus made welcome will prove your best friend.

These are facts without regard to our own opinion, or to whether or not you use Postum.

However, it is well to consider that famous fooddrink because it supplies a hot beverage of the deep seal-brown color of coffee, which turns to the rich golden-brown when cream is added.

It has a snappy flavor much like the old-time real Java, but there is no "sting" in it, no caffeine or other drug of any sort. It is skilfully manufactured of wheat and a trace of New Orleans molasses.

It comes in two forms. One called Regular Postum, must be boiled full 15 minutes.

The other, Instant Postum, is in powder form and a level teaspoonful in a cup of hot water makes the beverage instantly. Grocers keep both kinds.

"There's a Reason" for
