

YOUNG DIGGS' TRIAL WILL BEGIN TODAY

Violation of White Slave Act on Six Counts Are Charged in Indictment.

CAMINETTI HEARING NEXT

Instructions From Washington, Attorney Roche Says, Are to Prosecute Defendants to Limit.

SAN FRANCISCO, Aug. 4.—(Special.)—Maurice I. Digger, former state architect, will go to trial on an indictment charging violation of the Mann White Slave Act on six counts, before Judge William C. Van Fleet in the First Division of the United States District Court at 10 o'clock tomorrow.

The trial of Digger will be followed by that of Drew Caminetti, son of Anthony Caminetti, Commissioner General of Immigration and former State Senator. It has been decided to try the young men separately. Both are charged with inducing Martha Worthington and Lola Norris, of Sacramento, to accompany them from Sacramento to Reno for immoral purposes. The penalty is 10 years in the penitentiary. At the conclusion of Caminetti's trial, Digger and Charles H. Harris, a Sacramento attorney, will be placed on trial on an indictment charging conspiracy to suborn perjury. Judge Van Fleet will be on the bench for all three trials.

Conspiracy Charge Abandoned.

Theodore Roche, special prosecutor, said today that the conspiracy to suborn perjury to violate the Mann act, which was intended first to bring the young man to trial, will not be pressed in case of conviction of actual violation of the act, because the act on receiving instructions from Washington to prosecute Digger and Caminetti to the limit, it was decided to abandon the conspiracy charge, for which the maximum penalty is two years' imprisonment, and proceed with the more serious charge of actual violation. The maximum penalty on this charge is five years, but owing to the six counts against the defendants, they may be sentenced to 30 years.

The Six Counts of the Indictment are:

That Digger transported and assisted in transporting, with intent to induce to prostitution, the woman known as Lola Norris, to Reno for immoral purposes; that he purchased the tickets by which she was transported; that he induced her into accompanying him to Reno; that he is guilty of these same three charges in the case of Lola Norris.

Trial Should Be Short.

Prosecutor Roche said that the length of the trial depends on whether the defense is prevented from employing certain tactics. The prosecution hopes to avoid going into each of the six counts separately, in which case, Roche asserts, the trial will take only a few days. Otherwise it may require weeks.

Tomorrow will be taken up with the selection of jury.

Of the 100 names on the venire 35 have been returned. Prosecutor Roche expects that the jury will be complete when court adjourns in the evening. The prosecution will be conducted by Roche and Matt T. Sullivan, opposing statement of the prosecution will be made by Sullivan. The prosecution has subpoenaed 25 witnesses. The defense will have a larger number, many being witnesses against the character of the girls.

The attorneys for the defense are

Ernest Wood, Nat. G. Coghlan and S. Luke Howe.

TRAVELER LEAPS TO DEATH

Hallucination Suddenly Attacks Man on Train Who Jumps in River.

SEDALIA, Mo., Aug. 4.—A man believed to be Oscar Hedrick, traveling from Waco, Tex., leaped from a Missouri & Kansas Railway passenger train near here today and was drowned in the Saline River. Letters and papers in the man's possession practically identified him. He wore an emblem of the Masonic lodge at Amarillo, Tex.

It is believed by the man's fellow

passengers that he was under some hallucination. He suddenly turned to a man sharing his seat and with whom he had chatted several hours and said: "You're a detective, aren't you?" His companion replied it, but he rose, took off his coat and leaped through the window. The train was crossing the river and he fell into the water and disappeared.

RIVER NEWSBOY MISSING

Willamette Draged in Search for Ralph Brady.

Missing the cheery face of Ralph Brady, a newsboy, who has made many friends along the waterfront, and finding 13 copies of The Oregonian lying on Couch-street dock, prompted a search to be made in the river yesterday for him, and though Hugh Brady, the municipal grapple, made two attempts to drag the stream, vessels berthing there to discharge caused him to postpone operations again until today.

Harbormaster Spuler was given an

address at 495 Albina avenue as the home of the boy. He investigated gang-plank loading on all steamers lying there and determined that the boy could not have fallen from one of them while on his way aboard to sell papers. It is supposed that he lost his balance while standing at the edge of the dock and fell in. He did not make his customary visit in the afternoon along the front, and a complete search will be made today.

JACKSON'S SHARE \$13,507

School Census Gives 7381 Children of School Age.

ASHLAND, Or., Aug. 4.—(Special.)—On the basis of a school population of 7381, Jackson County's allotment of the interest on the irrevocable school fund amounts to \$13,507, the distribution for each pupil being \$1.85. This is the census for the year ending August 1.

125 NEW PLANTS FOUND

Botanists Carefully Studying Every Acre of National Forests.

WASHINGTON, Aug. 4.—(Special.)—In making a study of grazing lands on the National forests, 125 entirely new species of plants have been discovered by the Government's experts, and will be named and classified by the botanists of the Department of Agriculture.

Their discovery came about through

the collection of some 9000 different plant specimens, with notes as to their habits of growth and forage value. This work is part of a comprehensive plan to determine the grazing value of every acre of National forest land, in which the capacity of the soil to grow certain forage crops is to be determined and an effort made to decide for which class of stock—sheep, cattle or goats—the range is best suited.

The men who have made the studies

have combined the qualities of practical cedar and pine, which, apparently, should furnish excellent grazing, but which were not of a character (relished by the stock) to grow, therefore, had little or no stock-carrying capacity. As a result of the study, the forest service announces that it will be in a position to perfect its system of range management to bring about still better conditions for both stock and range.

RATES OF EXPRESS ORDERED REDUCED

Notable Reforms in Practice Demanded by Interstate Commission.

REVENUE CUT 16 PER CENT

New System to Be Put Into Effect October 15, Originated by Secretary Lane, Will Cost Companies \$26,000,000 Year.

WASHINGTON, Aug. 4.—Reductions

in express rates which will cost the companies fully \$26,000,000 a year, approximately 16 per cent of their gross revenue, were ordered by the Interstate Commerce Commission today to become effective on October 15, 1913. Notable reforms in practices also were ordered.

The most important change

prescribed by the order is by way of modification of the present graduated scale of parcel rates. One-hundred-pound rates for short distances either have been left unchanged or slightly reduced, for longer distances they have been lowered; for 50 pounds or less all rates have been reduced. For packages of more than four pounds going more than 200 miles and less than 3000, the new express rates are generally lower than the parcel post rates; for more than 3000 miles the rates are practically the same.

Lane Author of System.

The report and order of the Commission prepared by Commissioner John Marble, are a virtual affirmation of the findings of former Commissioner Franklin X. Lane, now Secretary of the Interior.

By prescribing so-called block

system, dividing the United States into 350 blocks averaging 2500 square miles, as originally proposed by Lane, 900,000 different rates now published by the express companies will be reduced to less than 850,000, and the Interstate Commerce Commission believes that the system points the way to a solution of the existing problem of freight rates.

The express companies had filed

statements indicating that the new system would be intolerable and argued strenuously that the establishment of the parcel post had deprived them of 50 per cent of the revenue they formerly received from parcels of 11 pounds or less. They contended that the express business could not survive the losses from both sources.

"This is equivalent to saying,"

comments Commissioner Marble in his report, "that inasmuch as shippers have been given the convenience and economy of the parcel post, the express carriers must, on that account, be allowed to charge higher rates than the parcel post would be reasonable. That is to say, the Commission is called on to take from the shippers the benefit of the parcel post, and give it to the express companies in the form of higher rates on the remaining business."

New System Simple.

The new system of rates is not only a simplification of existing rate methods, but in the opinion of rate experts, lays the foundation for future practice in all rate revisions.

While the Commission has not

considered the practicability of the application of the block system to the making of freight rates, it is known that the question may be taken up almost at any time. With a standard freight rate once established between blocks instead of between points and all other rates stated in percentages of the standard, the mystery of the present complicated maze of freight rates, in the opinion of the Commission's experts, would be solved.

The rates of newspapers and periodicals

as well as for bread and such articles of daily necessities, which are charged, are substantially the same as the present rates.

NAVAL-BASE RUMOR DENIED

General Bullock Says Britain Will Not Fortify at Bermuda.

NEW YORK, Aug. 4.—Lieutenant-General Sir G. M. Bullock, Governor of Bermuda, who arrived here today on a vacation trip, deprecated the report that Great Britain is contemplating establishing a strong naval base in Bermuda.

"I think a great deal has been

made out of small material," he said. "England has for a long time maintained a sort of naval base at Bermuda, and often there are a number of other war craft there. Our real naval base is, of course, at Jamaica. It may be that the opening of the Panama Canal will call for a coaling depot in Bermuda, but the idea of a great naval base there is largely imagination."

"As a private individual I should

say that there is no necessity for a naval base in Bermuda."

ROAD BOND PETITION OUT

Workers in Jackson County Propose \$500,000 Issue.

ASHLAND, Or., Aug. 4.—(Special.)—Petitions are out for a special election on a proposed road bond issue of \$500,000, bearing 5 per cent interest. The plan has the approval of the Jackson County Court.

It is proposed to retire \$100,000

of the bonds ten years after issue, and a like amount every five years thereafter, it being thought that such a plan would greatly aid in disposing of the securities. This movement supplants a former one providing for a \$700,000 bond issue.

July Receipts \$125,719.88.

SALEM, Or., Aug. 4.—(Special.)—Corporation Commissioner Watson today announced that the department collected \$125,719.88 in July. The office collected \$14,169.41 on July 25 and \$10,375.50 on July 26, foreign corporations paying their license fees on those days.

Girl of 16 and Boy of 20 Married.

VANCOUVER, Wash., August 4.—(Special.)—Warren Goodwin, 29 years old, son of Mrs. Cora Goodwin Moon, and Marie Kluge, 16 years old, were married today.

Fifty Years Ago and Now

—Did you ever notice when you pick up a newspaper and read the advertisements—it doesn't matter whether in this city or another—that every concern ranks itself as the greatest, biggest and most complete of its kind?

—Doesn't it seem strange that the world got along so well before each of us came along?

—Merchandising on a scale broader than that of the crossroads merchant dates back to 1861. In that year the idea of serving the public with things needed for household use and personal adornment, all under one roof, came to one man, and was the foundation for the immense mercantile establishments of today.

—The cardinal idea with this store is to reach the greatest number of people—to serve the public in every walk of life—to study the demands of the wage-earner equally as well as those of the opulent. To accomplish this we employ experts who understand their particular lines thoroughly—who purchase merchandise from every section of the world in order to meet every demand.

The air in this Store is changed five to eight times an hour, maintaining an even temperature

50c-65c Kerchiefs—French Hand-Embroidered On Sale Tuesday, 35c—3 for \$1.00

—We bought up an importer's stock of initial handkerchiefs which retail from 50c to 65c each. In the assortment are initials in five or six different designs. Every initial will be found in these handkerchiefs, but not all in one pattern. They are all French hand embroidered, and some of the hemstitching is also hand work.

—The linen is very sheer and fine count. This is a most unusual offering, and the lot will be placed upon the special sales tables.

—Daintiest of tea aprons, made of fine lawn, and trimmed in a number of quaint and pretty ways. Buttonholed edges in different colors—pink, blue and lavender—lace insertion and embroidered designs.

—These aprons, too, are made of the fine lawn, with buttonholed edges. Some are embroidered in spray or vine designs, and edged with lace. In white or colored effects.

—Practical work aprons, made of light and dark colored percales, in dots, figures or stripes. They are made in fitted style, with large bib, and large pocket at side. Piped prettily in white.

—Blue checked gingham work aprons, made in the fitted style, with large pockets at side, and piped with a contrasting checked banding.

SECRET AGENT FREE

Blackmail Charge Against Officials Falls Flat.

FEDERAL INQUIRY BEGINS

Department of Justice Releases North, but Not, It is Said, Because of Charges—Bribery Question Still Open.

NEW ORLEANS, Aug. 3.—J. L. Mott, secret agent of the Department of Justice, and Ernesto Fernandez, representative of the Constitutional party of Mexico, were released from prison without bail today. This is interpreted to mean that there will be no prosecution in connection with the payment last week of \$500 by Emmanuel Sastillo Brito, former provisional Governor of Campeche, Mex., on an alleged promise of immunity from arrest on criminal charges preferred by the Mexican government.

G. Raymond Matthews, special agent of the Department of Justice who accepted the \$500 from Brito, and who asserted that it was done in connection with a plan to detain Brito until a warrant for his arrest should arrive from Washington, was released Saturday.

The release of Mott and Fernandez followed an investigation made by a special representative of the Department of Justice, who arrived here Saturday night.

Tomorrow Judge Foster, of the Federal court, will hear the habeas corpus petition of ex-Governor Brito.

WASHINGTON, Aug. 4.—The release from custody at New Orleans of agents

of the Department of Justice charged with accepting a bribe to prevent the arrest of ex-Governor Brito, of Campeche, Mexico, means, it is believed by officials here, the transfer of the case from the state to the federal authorities.

The meager official advice received by the Department of Justice tonight led officials to conclude that the state charge of blackmail originally preferred against Special Agent Matthews, J. L. Mott, his assistant, and the Mexi-

can, Fernandez, practically had been dropped and that the federal government would investigate to determine whether any attempt had been made to solicit a bribe by those accused. This would be a federal offense. The charge of blackmail was preferred, it is said, on the assumption that the telegram directing the arrest of Brito was a fake, but as this was a genuine dispatch, the allegation now resolved itself into a question of alleged bribery.

Mott was released from the govern-

ment service by the Department of Justice tonight. It was explained that this was not due to the charges against him but to the fact that there was no further need for him. He had been employed to watch shipments of arms and ammunition.

Detroit has a dog-catching automobile. It is a double-decker with 22 compartments.

Now Comes the Test in the Sale of Manhattan Shirts
