APPLE CROP SHORT

Will Be Far Below That of Last Year.

YIELD MAY BE AVERAGE ONE

Good Prospects in Pacific Northwest, but Poor Reports From Leading Sections in Middle West and East,

The apple crop of the United States will be shorter this year than lest year. Dut there promises to be a good average yield. The Government's report for July, the lastest lessed, indicated a production slightly better than in 1911. The condition on July 1 was 50.4 per cent as compared with 157,1 per cent on June 1, 61.5 per cent on June 1, 61.5 per cent on June 1, 61.5 per cent on July 1 was 50.4 per cent as compared with 57,1 per cent on June 1, 61.5 per cent on Jun

The Government's estimate for the state is but little over half a crop.

The Virginia crop will be very small, the general average being 25 per cent. A low production is indicated in Pennsylvania and home consumption will take care of most of the crop. Ohlo apples were hadly injured by frost and the outturn will be less than the small crop of last year. Michigan will have two-thirds. Connecticut and Rhode Island about the same, Vermont a quarter of a crop. New Jersey and Delawars each polity receipts were of fair size, but

Island about the isine, Vermont a quarter of a crop. New Jersey and Delawars each about half a crop.

West Virginia will have none to ship and in some sections not enough for home consumption. Other states show up about as follows: Massachusetts and Kenucky, two-thirds: Tennessee, Maryland and Maine, hallf a crop; Georgia, 75 per cent or less.

FALL GRAIN OF HEAVY WEIGHT

Spekune disivion-The weather the past The soil has dried out a good deal, but still contains sufficient moleture to take new bluestern, Sic: new forty-fold, Yugsoci care of the Spring grain. The warm weather new red, 77@78s. had a slight effect on Spring grain, as FLOUR-Patents, \$4.70 per barrel; same was in the milky state, and it is straights, \$4.10; exports, \$3.55@2.65; valley.

thought the borry was somewhat shriveled.

Fall grain is being cut and shows a good quality, test weights indicating 61 to 61 pounds per bushel. None of this grain MILSTUFFS-Bran, 244.50 per ten; worthy of mention has yet arrived at ware shorts, \$25.50 per ten; middlings, \$51 per

Have made some investigation as to noment, providing a favorable market prevails. Camas Fratrie—Fall wheat and barley are in good condition, excepting that a small percentage of the barley in the vicinity of

percontage of the party to be stained. C. Lewiston has been found to be stained. The harley on the Nos Perco and Camas 17c prairies is good. Spring grain, buriey and sale

Vegetables are in good condition, and potatoes are being shipped. Fruit is in good condition and is being shipped in car loads.

will be all up by the end of the week. This crep was in first-class comittee. Compared with last year the fruit shipmoits have been very slow. Pears in straight car loads will move during the coming week, and Elberta peaches about 2

aniko branch-Vsry little change in estimatea. Weather continues favor-Estimate of average grain yield raised.

some buying by the Japanese for Japan and North China account. No trade with Hong-keng and South China is looked for until ples, firm, prones, steady; peaches, firm.

The wheat market was quiet yesterday

The whest market was quiet yesterday. There was a little demand for aced wheat on the banks of 70 cents for club and 75 cents for red, but no important inquiry for milling or export account. In his weekly international wheat review, Broomhall says. "Markets show a declining tendency, moddent to the warm weather throughout Europe and rapid progress in harvesting. Crop reports have been mostly favorable, with the exception of France, Italy and Hungary. It is fortunate for consumers that America has a large crop at Winter wheat, because, owing to the late harvest in Europe, and this must continue for some time longer, as other exporting countries, excepting India, are not able to ship but sparingly. I feel sure that the big European demand will continue during the Winter wheat movement, and thereafter much will depend on the Spring whost crop of the United States and Canada. Assuming that all goes well in Europe and North America, I expect an abundance of wheat the fore part of next season, and after that Argentine, Australia and Irdia will be the Indianous. Consump. season, and after that Argentine, Australia and India will be the influences. Consumption will continue large."

Local receipts, in cars, were reported by

The Westingston crop is in good condition, but the percentage is irregular and varies from 180 to 20 per cent. Cambiners reports 80 per cent of a full crop and the Yakima Valley the same percentage. The Government's estimate for the state is Sper cent.

Idaho will not equal last year's production ner will Montana.

California will short of last year.

Estimates range from 1800 to 2000 cars for the Pajaro Valley. Utab will have a smaller crop than a year ago.

Missouri growels do not believe that attat will come up to the Government's estimate, of 86. Minnesota will have a good crop, some estimating it ai double that of 1912.

Oklahoma will have half of a crop. New Mexico and Texes will not out much figure to the shipping movement. Iowa estimates ingree crop than last year.

The Indiana crop was damaged in many places by frost and the reports the respinary produced inst year. Arkmans reports the casts two-thirds of a crop, and Wisconsin over three-fourths.

Colorado, an important state, because of the larse quantity of hox apples usually safting the crop illinois will have almost a normal viold. Het winds will cause the Ransas crop to fail below that of 1912.

The New York crop will be smaller than last year. In Western New York the shurtage is estimated at 10 to over 25 per cent. Haldwins are showing up the high sate years. In Western New York the shurtage is estimated at 10 to over 25 per cent. Haldwins are showing up the high sate years. In Western New York the shurtage is estimated at 10 to over 25 per cent. Haldwins are showing up the high sate years are showing up the high shurtage and melous continue erry large is estimated at 10 to over 25 per cent. Haldwins are showing up the high shurtage and melous continue for the shurtage is estimated of the large and worth \$2.50. Cantal large and worth \$2.50.

Enterprise—All grain, Spring and Fall, in first-class condition. Hay crop now being harvested.

ORIENTAL TRADE IS NOW EXPECTED Freight Rates Are Settled and Orders from Far East Should Appear.

With the trans-Pacific freight rate question settled, some Oriental business should now develop in the flour and wheat markets. The rates have been fixed at 14 to Japan, 55 to Hongkong and 53.00 to Shanghal and Manila. This is a reduction of 50 cents a ten from the customary Fall and Winter tariff.

It has been the understanding that if a reduction were obtained there would be reducted. Science of the counter of the counter
