The three corners of this three-cornered building are now vacant and only memory retains traces of the battle which was waged around them.

When Governor West "invaded" Portland a year ago, one of his first points of attack was these resorts, which, he asserted, were obnoxious to the traveling public. He first ordered the same than the best in years. Quite recognized as the best in years. Quite as much to the excellent acting, and the generally admirable stage production under direction of the veteran in this art, James A. Bliss, as to the intrinsic merits of the play can the success be ascribed. which, he asserted, were obnoxious to the traveling public. He first ordered them summarily to vacate, and a partial concession was made by the nailing up of the doors opening on the station platform. This being unsatisfactory to the Governor, suits to abate the alleged nuisance were commenced and hung fire in the courts until the Legislature convened. One of the measures it adopted was a prohibition of saloons in railway station buildings. This was opposed on the ground that

the lodging camp where he is work-ing and deprived of nearly all his re-sources, a Portland man is trying to stave off the time when he may have to appeal to the county for relief by peddling shoestrings and pencils on the street, and meanwhile the Associ-

are offered by membership, these privileges including free use of the Armory gymnasium and participation in indoor and outdoor athletics and social events, in addition to the many military features.

Good character, good health and American clitzenship are the only requirements for enlistment. Recruiting officers emphasize the point that no charge is made for any part of the expensive equipment and that the service is a source of actual profit, as well as long as his money like the in the county hospital, where he was a favorite among the visitors, but was promptly forgotten when he was dismissed from the hospital. He had taken a homestead claim in Wyoming but found when he attempted to prove up on it, that his illness and the time passed in the hospital had been long enough to run past the time limit and the claim was lost.

Still eager to take care of himself and apparently. Still eager to take care of himself and apparently not in the least soured by his misfortunes, he then went onto the streets as a peddler.

The bill chosen for the debut of the new organization as an acting body is "The Fortune Hunter." Winchell Smith wrote the comedy and George M. Cohan produced it, filling in at times with some of the Cohanesque brand of humor. Then a company of Broadway actors put it on for Cohan and it tickled the ribs of metropolitan show-shoppers for nearly a year, after which it traveled into adjacent territories, giving them all a treat. Last season it visited Portland, and although it played to crowded houses, there were just as many more who see the fortune just as many more who see the fortune hunter hunting.

Baker Does Mission Work.

Baker Does Mission Work.

So, for those people in particular and for all his stock patrons in general, whether they've laughed thier portion at this play, Manager Baker did a real bit of home mission work in selecting if or the opening play. Whether this impulse actuated him or not is food for discussion, because the box office and home mission work have little in common. One is inclined to the belief that he picked "The Fortune Hunter" as an introducing medium quite as much for its downright value as a play and because it holds a role for all but one of the new players.

This in itself presented a problem—to find a pleasing, rib-tickling play, "I don't think that there will be any to find a pleasing, rib-tickling play."
