Crop Conditions Indicate No Importation Will Be Required.

The Federal Horticultural Board of the Department of Agriculture has decided ntinue indefinitely the potato quarantithat has been maintained during the pa year against centain countries from whi main importations of potatoes com-The countries against which quarantine is be continued are the British Isles, German Austria-Hungaria, Newfoundland and twisiands belonging to France in the S. Lawrence River, called St. Pierre as

Lawrence River, called St. Pierre and Miqueion.

The object of the quarantine, which was first imposed a year ago, is to prevent the introduction into the dinited States of a dangerous potato disease, now unknown it this country. This disease is known as the potato wart, the petato canter or black scab, and is prevalent in those countries.

This notice is of considerable importance to potato-growers, as it not only insured their crops from the ravages of this disease, but also may affect the price of potatoes. The board states that the present condition of the 1913 potato crop in the United States is, on the whole, most promising. It do not seem apparent at this date that market conditions will require an importation of potatoes into the United States this Winter.

trade's requirements were thus well taken care of, and with the easing off of prices elsewhere, the buyers here slowed down or reduced their bids. Exportars appear to be in an easy position, as they are taking on more ships. Miliers are also believed to be well supplied with ships.

The impression prevails that Canadian wheat may very soon be offered in this country, and this is one factor that is keeping buyers of bluestem in check.

The oats market was quiet at Saturday's prices. Brewing barley was rather firm, but that was no demand for feed grade.

Local receipts, in cars, were reported by

Reading Advances Strongly on Dividend Rumor.

LEADING STOCKS ARE FIRM

Market Has Good Undertone, but Trading Is Languid-Prices Are Well Held in London, Bonds Irregular.

NEW YORK, Sept. 23 .- A few stocks made good gains today, but in the great majority of cases, changes were only nominal. Specu-lation was languid. The market was closed Mayor Gaynor.

The undertone of the market was dis-The undertone of the market was distinctly firm, with evidences of increasing strength until just before the close, when thers was a mild reaction.

Rumors of an extra dividend for Reading, of the kind which have been circulated from time to time for several years, were revived today and the stock rose strongly, eclipsing its recently established high record for the year. Union Pacific, Canadian Pacific, New Haven, Consolidated Gas and Third Avenue also were strong stock. Rock Island stocks and bonds were again weak, resching new low prices.

The day passed without developments of influence on marker values. Although American stocks in London were firmly held, London did virtually nothing here.

American stocks in London were firmly held, London did virtually nothing here.

Bonds were irregular with a continuance of pressure against Rock Island issues. Rock Island collateral 4s and refunding 4s dropped about two points each. Total sales, par value, \$1,075,000. United States bonds were unchanged on call.

Down Market.

WHEAT OFF AT CHICAGO

Report of Summering of Canadian Cabinet Creates Uneasiness. Huge Imports Are Feared From North of Line,

CHICAGO. Sept. 22.—Visible supply figures were close to 50,000,000 bushels, as against 30,000,000 a year ago. This acted as a weight today on wheat. The market finished nervous at %c to %c net decline. Corn wound up with a gain of %c to %G %c: oats off %c to %c and provisions higher by 5 to 20c.

Besides the increase in the United States' visible supply, enlargement in the Candian visible supply, enlargement in the Candian visible supply had the effect of swamping the wheat trade. Houses in the Northwest reported that a mountain of receipts appeared to be rolling up, and that a big portion might have to be hedged in the Chicago market. On this information, bear leaders here pressed the selling to such an extent that many stop-loss orders came into play.

leaders here pressed the sening to an extent that many stop-loss orders came into play.

Rallles in wheat were not held. Cables had given the market a weak start, and there was continued uneasiness in regard to Winnipeg reports that the Canadian Cablinet has been summoned to meet Premier Borden in Ottawa, and that despite the previous anti-reciprocity policy, the outcome might be to send Canadian wheat in huge shipments across the herder free of duty.

Fear that frost had caused more damage than popularly supposed, put the corn market on the up-grade, notwithstanding weakness early in sympathy with wheat.

Oats parted company with corn and followed wheat, influenced in a measure by apprehension as to possible reciprocity action by the Canadian government. More over, the visible supply was reported as the largest on record, 80,830,000 bushels, against \$,190,900 bushels a year ago.

Cold weather and higher prices for hogs lifted provisions. There was a fairly important increase of investment buying, chiefly of deferred deliveries.

Futures ranged as follows:

WHEAT.

WHEAT. CORN. Sept. .... .74% Dec. .... .72 May .... .73 OATS.
