STATE TO TRADE BOOKS

SAN FRANCISCO COMPANY GETS PUBLISHING CONTRACT.

SALEM, Or., Sept. 29.—(Special.)—The State Printing Board today entered into a contract with the Bancroft-Whitney Company, of San Francisco, to publish the Supreme Court reports for five years, it being the belief of the board that at least \$25,000 will be saved annually. J. C. Moreland, Clerk of the Supreme Court, says there is about \$40,000 of "dead stock," consisting of old reports, in possession of the state which it cannot dispose of. These will be traded to the company for new books. Secretary of the Board Phipps gave out the following statement of the transaction tonight: "The State Printing Board today entered into a contract by which the state is assured of the publication of the reports of the Oregon Supreme Court, both the old opinions and the future opinions as they are rendered. Of the reports of the Supreme Court published by the state since 1888 there have accumulated about 6000 copies, which is about 3000 copies in excess of the needs of the state. The demand for copies varies so much that the state is entirely out of some of the volumes and has an over-supply of from 100 to 300 copies of other volumes. "Arrangements have been made whereby the state will exchange books of which it has too many for copies of other volumes of which it has none. The state thereby will acquire a desirable stock without any expenditure of money. "To reduce the stock of the state to a reasonable number, the Bancroft-Whitney Company has further agreed to print the future opinions of the court and to exchange these new books for book for all of the old volumes that the state desires to exchange. After the state has reduced its stock, the Bancroft-Whitney Company is to

ALFALFA ROTATION GOSPEL PREACHED

Holden Special Stops at Farming Towns Throughout Palouse Country.

BIG CROWDS HEAR TALKS

Women as Deeply Interested in Lectures as Men—Salt Bush is Found in Luxuriant Growth in Eastern Washington.

WASHTUCNA, Wash., Sept. 29.—(Special.)—After a day's rest at Colfax the alfalfa special, in charge of Professor Holden, continued to spread the alfalfa gospel with renewed vigor at Diamond and other towns in the Palouse country. W. R. Skay, of the O.-W. R. & N., and W. R. Baughman, of the Holden party, spoke to the farmers on the benefit of alfalfa raising and the use of the rotation of crops. Soil was tested and the inoculation of seed was fully explained. Women displayed as deep interest in the lecture as the men.

The next stop was at Endicott. Mr. Foster of Washington State College, held a meeting and motored out to the Littenberg farm, where he explained alfalfa raising.

In the town a committee consisting of Charles Merriman, chairman; M. A. Sherman, John Eaton, F. Claveno, Barney Martin and C. L. Wakefield, had arranged for two meetings. Professor Holden spoke at one meeting and C. W. Farr and C. L. Smith addressed a gathering of pupils at the other.

Professor Holden, while going out of the car window just before arriving at Winona, discovered a new forage plant. He motored back to the Smith ranch, about seven miles northeast of Winona, where the plant is raised. The common name for this new stock food is "salt bush," and at the first glance appears to be but an ordinary weed.

"We have tested this salt bush at the college numerous times," said Professor Holden, "and have found it to contain as much potash, lime and protein as alfalfa, and is nearly as good as alfalfa for feeding value, but it does not preserve the richness of the alfalfa when it is fed to stock. It often grows to a height of between seven and eight feet. Salt bush seems to be well adapted to this soil. The Smith ranch is feeding 550 sheep on only 30 acres of this plant."

Professor Holden and the photographers rejoined the party at Lacrosse, where the train stopped for two hours and two meetings were held, one at the opera-house and at the high school. "The soil of Eastern Washington and Eastern Oregon is similar," said Professor Holden, "it is particularly adapted to the raising of alfalfa and corn, and is easily worked and its wonderful fertility will be productive for years to come if it's properly handled through diversification and rotation."

Two side trips were made from Lacrosse. W. D. Foster motored out to Hooper, where he spoke to 40 farmers. Mr. Skay and Mr. Baughman made a side trip to Kahlutus, 37 miles south of Lacrosse.

The last stop of the day was at Washington. The train was met by a large delegation. L. L. Bassett, acting as chairman, John Scott Mills, of the O.-W. R. & N., and Professor Holden and Smith spoke at a big meeting.

More than 200 farmers were present and evinced a deep interest in the demonstrations and many announced that they would give alfalfa a trial this coming spring.

At 6:30 this evening business men, aided by the women of the town, entertained the Holden party at dinner. Informal speeches were made by J. S. Mills, L. L. Bassett, W. R. Baughman, C. L. Smith and Professor Holden.

The alfalfa special left here at 8 o'clock for Dayton. Following the Dayton visit, the train will stop at Walla Walla, Prescott and Walla Walla.
